Without Good Reason Edward Stein, 1996-01-11 Are humans rational Various experiments performed over the last several decades have been interpreted as showing that humans are irrational we make significant and consistent errors in logical reasoning probabilistic reasoning similarity judgements and risk assessment to name a few areas But can these experiments establish human irrationality or is it a conceptual truth that humans must be rational as various philosophers have argued In this book Edward Stein offers a clear critical account of this debate about rationality in philosophy and cognitive science He discusses concepts of rationality the pictures of rationality that the debate centres on and assesses the empirical evidence used to argue that humans are irrational He concludes that the question of human rationality must be answered not conceptually but empirically using the full resources of an advanced cognitive science Furthermore he extends this conclusion to argue that empirical considerations are also relevant to the theory of knowledge in other words that epistemology should be naturalized

The New Aesthetics of Deculturation Thorsten Botz-Bornstein, 2019-08-22 What are the predominant aesthetics of the twenty first century Thorsten Botz Bornstein argues that deculturation embodied by the conspicuous vulgarity of kitsch is the overriding visual language of our times Drawing on the work of Islam scholar Olivier Roy who argued that religious fundamentalism arises when religion is separated from the indigenous cultural values Botz Bornstein shows that the production of absolute truths through deculturation also exists in contemporary education The neoliberal environment has separated learning from culture by emphasizing standardization and quantified learning outcomes In a globalized environment the idea of culture is no longer available as a referent instead we are taught to rely on the culturally neutral term excellence For Botz Bornstein this is an absolute value similar to the truth of religious fundamentalists Similarly kitsch is what happens when aesthetic values are separated from cultural contexts Kitsch is aesthetic fundamentalism Kitsch aesthetics are an aesthetics of

excellence The consumption of kitsch can be understood as an intrinsically narcissistic impulse reinforced by social media individuals recycling their own selves without being confronted with the culture of the other The existence of self centred alternative truths fake news and conspiracy theories and selfies are linked together in the fundamentalism neoliberalism kitsch pattern Including analysis of the intersections of cute excellent sublime and interesting in contemporary aesthetic culture this is a journey through philosophy psychology and cultural theory redefining a new aesthetics of deculturation

Ethical Issues in Modern Medicine: Contemporary Readings in Bioethics Bonnie Steinbock,Alex John London,John Arras,2012-03-29 **Reason and Relativism** Steve Hendley,1991-01-01 Sartre s Critique of Dialectical Reason deals with a problem that continues to dominate both continental and Anglo American thought the historical character of reason and the question of relativism This work deals with the issue of relativism in the context of Sartre s later philosophy and contemporary debates on the social historical character of reason as they emerge principally in the works of Foucault Lyotard Habermas Rorty and Feyerabend Philosophical Problems and Arguments James W. Cornman,Keith Lehrer,George Sotiros Pappas,1992-01-01 Widely used by instructors who emphasize the logical structure of philosophical theories and the dialectical play of argument this popular work provides clear reliable and up to date discussions of central philosophical debates The fourth edition incorporates major revisions the first since 1982 and features an extensive change in content Every chapter has been reworked to improve its organization to make it more accessible and engaging to the student and to reflect recent discussions **Justificatory Liberalism** Gerald F. Gaus,1996-03-14 Gerald Gaus draws on current work in epistemology and cognitive psychology to defend a modest version of cognitive relativism Building on this theory of personal justification he asks How do we justify moral and political principles to others Here the populist proposal put forward by political liberals that the assent of all reasonable citizens must be obtained is considered and rejected Because reasonable people often ignore excellent reasons moral and political principles can be considered conclusively justified even in the face of some reasonable dissent Conclusively justification however is difficult to achieve and Gaus acknowledges that most of our public justifications are inconclusive He then addresses the question of how citizens can adjudicate their inconclusive public justifications The rule of law liberal democracy and limited judicial review are defended as elements of a publicly justified umpiring procedure Political Reason A. Fives,2012-11-06 In modern democracies existing moral pluralism conflicts with a commitment to resolve political disputes by way of moral reasoning Given this fact how can there be moral resolutions to political disputes and what type of reasoning is appropriate in the public sphere Fives explores this by closely analysing the work of MacIntyre and Rawls **Tillich - Abingdon Notes** Donald W. The Human A Priori A. W. Moore,2023-07-09 The Human A Priori is a collection of essays by A W Moore one of them previously unpublished and the rest all revised These essays are all concerned more or less directly with something ineliminably anthropocentric in our systematic pursuit of a priori sense making Part I deals with the nature scope and limits of a priori sense making in general Parts II III and IV deal with what are often thought to be the three great exemplars of the systematic pursuit of such sense making philosophy in the case of Part II ethics in the case of Part III and mathematics in the case of Part IV Much of the attention throughout is devoted to the work of other philosophers Kant and Wittgenstein feature

prominently and five of the essays take the form of reviews or critical notices of recent work in philosophy. But the interest is never purely exegetical. One of the lessons that emerges from the essays, either in opposition to the views of these other philosophers or by invocation of their views, is that we humans achieve nothing of real significance in philosophy, ethics, or mathematics except from a human point of view, and hence that all three of these pursuits can be said to betoken what may reasonably be called the human *a priori*.
