This intellectual portrait of Romain Rolland 1866 1944 French novelist musicologist dramatist and Nobel prizewinner in 1915 focuses on his experiments with political commitment against the backdrop of European history between the two world wars Best known as a biographer of Beethoven and for his novel *Jean Christophe* Rolland was one of those nonconforming writers who perceived a crisis of bourgeois society in Europe before the Great War and who consciously worked to discredit and reshape that society in the interwar period Analyzing Rolland s itinerary of engaged stands David James Fisher clarifies aspects of European cultural history and helps decipher the ambiguities at the heart of all forms of intellectual engagement Moving from text to context Fisher organizes the book around a series of debates Rolland s public and private collisions over specific committed stands introducing the reader to the polemical style of French intellectual discourse and offering insight into what it means to be a responsible intellectual Fisher presents Rolland s private ruminations extensive research and reexamination of the function and style of the French man of letters He observes that Rolland experimented with five styles of commitment oceanic mysticism linked to progressive democratic politics free thinking linked to antiwar dissent pacifism and ultimately Gandhism antifacism linked to anti imperialism antiracism and all out political resistance to fascism and most controversially fellow traveling as a form of socialist humanism and the positive side of antifascism Fisher views Rolland s engagement historically and critically showing that engaged intellectuals of that time were neither naive propagandists nor dupes of political parties David James Fisher makes a case for the committed writer and hopes to re ignite the debate about commitment For him Romain Rolland sums up engagement in a striking dialectical formula *Revolution and Its Narratives*

*World*, 1976      *Reason and Revolution* Murray Greensmith Forsyth, 1987      *Autopsy of Revolution* Jacques Ellul, 2012-06-13

In this significant and very timely book the author of *The Technological Society* *The Political Illusion* and *Propaganda* asks a tremendous question and shows that the answer we give it is decisive for the future of our society Can we learn from history what revolution really is necessary for our survival That is can we distinguish between senseless ineffectual revolt or rebellion and a genuine revolution that can alter fundamentals In his basic closely reasoned way Jacques Ellul examines past and recent history in light of the current overwhelming preoccupation with revolution which seems to have become the daily bread of Western man's thoughts and actions the immediate explanation for every historical movement Ellul insists on examining the possibility that today we are projecting onto past events a fairly recent and distorted image of revolution The new image was created by Marx in the nineteenth century and Ellul questions how long we can continue to live on his legacy More important he suggests that Marx may have brought about an abrupt deviation of the necessary revolutionary current and given a false meaning to the word revolution Is all our talk about Marxian revolution talk about reality or a way of filling a void with words Finally among so many social eddies and agitations are we today caught up in a really revolutionary movement or are we being led into blind combat by false lights that in reality are reflections in distorting mirrors Are we capable of discerning the real Revolution the needed Revolution Ellul does not map out a route in detail he clears paths into the future making it possible for a route to be found His masterly book should help to change our thinking and therefore our future

*Neoclassical Satire and the Romantic School 1780-1830* Rolf P. Lessenich, 2012-08-15 Romanticism was not only heterogeneous and disunited It also had to face the counter movements of the Enlightenment and Augustan Neoclassicism which were still gaining momentum in the decades around the French Revolution Neoclassicists regarded Romanticism as a heretical amalgam of dissenting new schools threatening the monopoly of the Classical Tradition Acrimonious debates in aesthetics and politics were conducted with the traditional strategies of the classical *ars disputandi* on both sides Under the duress of the heaviest satirical attacks Romanticism began to gradually see itself as one movement giving rise to the problematic opposition of Classical with Romantic This construction however was indispensable for the clarification of different positions among the hubbub of conflicting voices It has also proved critical in literary and cultural studies The Classical Tradition emerges as an ongoing event from Greek and Latin antiquity via Neoclassicism and Romanticism to our time

**The Challenge of Revolution** Vladimir Mau, Irina Starodubrovskaja, 2001-02-22 This volume provides an challenging and controversial explanation of the recent events in Russia It examines the causes processes and consequences of Russia's recent political development Drawing on and criticizing the existing literature the book also shows how the recent Russian experience casts light on general theories of revolution and comparative political developments The transformation in Russia is usually compared with transformations in other post communist countries The authors argue that the Russian transformation should be explained in the logic of the great revolutions of the past such as the English Civil War the French

Revolution and the Bolshevik Revolution The difficulties and inconsistency of Russian reforms are usually explained as a result of mistakes made by reformers This book argues however that these problems should be considered as a natural consequence of the weak state In revolution the weakness of state power is inevitable resulting from social fragmentation property rights transformation changes in the interests of different social groups Hence the authors argue that most of the transitional problems in Russia were unavoidable The authors go on to argue that revolutions are usually considered as rapid change made through violence However the spontaneous character of change in the situation of a weak state is a much more important feature of any revolution than violence The book contains unique interviews with four leaders of the Russian transformation Mikhail Gorbachev Alexander Yakovlev Yegor Gaidar and Gennadii Burbulis as well as the personal experience of the authors who were deeply involved in the practical process of Russian transformation *T. P.'s Weekly*, 1910
