Nations and Democracy Amanda Machin,2014-11-13 A figure of enduring ingenuity the nation has for centuries played a part on the socio political stage Whether centre stage or background scenery it has featured in violent tragedies revolutionary drama and nostalgic fable Today the nation is cast simultaneously in the roles of villain and hero While it is renounced by those advocating trans national post national and cosmopolitan forms of belonging it has lately also been asserted as the solution to various social failures in liberal democracies This appears to leave us with two alternatives to jettison the nation in order to move towards a less parochial world a world in which new forms of belonging underpin more inclusive politics Or to celebrate the nation as way of ensuring the social cement that can unite a diverse society Using the ideas of Wittgenstein and Lacan Amanda Machin expertly explains that the overlapping and conflicting language games of the nation produce it as an object of desire in an uncertain world The nation is not a pre political thing but a matter of persistent political contestation and coalition She reveals that the nation still has a vital part to

play in democratic politics but that this role is one of improvisation While they endure as tools of emancipatory promise nations nonetheless remain potential categories of violent exclusion They cannot be pinned down as easily as anti national and pro national alternatives suggest It is precisely the indeterminacy of the nation that gives it ongoing importance for democracy today Providing an urgent riposte to dominant accounts this thought provoking and highly original account demands a re politicisation of the nation This book will appeal to those engaged in theory and empirical research on nations and nationalism and the question of their link to democracy in a changing world as well as those interested in psychoanalysis and Wittgenstein *Borderline Welfare* Andrew Cooper, Julian Lousada, 2018-10-08 Which forms of feeling are facilitated and which discouraged within the cultures and structures of modern state welfare This book illuminates the social and psychic dynamics of these new public cultures of welfare locating them in relation to our understanding of borderline states of mind in individuals organizations and society Drawing upon their idea of a psychoanalytic sensibility rooted in Wilfred Bion's notion of learning from experience the authors aim to access the new structures of feeling now taking shape in marketized and commodified health and social care systems Integrating their reflections on clinical work with patients consultancy with public sector organizations political analysis and the tradition of Group Relations Training they offer a wide ranging perspective on how contemporary social anxieties are managed within modern public welfare Our collective struggle with fears of dependency and loss and the demands of living and working in an interdependent networked world give rise to fresh challenges to our ability to maintain depth of emotional engagements in welfare settings Part of the Tavistock Clinic Series
