Reason Enough

**Kenneth Einar Himma, Miodrag
Jovanovic, Bojan Spaic**

Reason Enough:

Reason Enough: A Case for the Christian Faith Clark H. Pinnock, 1997-10-02 A book written for those who do not believe the truth of Christianity and for those who are experiencing difficulties in their believing Pinnock does not call for mere fideism but feels that faith should be tested in light of the knowledge and experience we have at our disposal He claims that there is reason enough to put out trust in Christ Reason Enough to Hope Philip Morrison, Kosta Tsipis, 1998 In this blue sky effort to rethink humanity's basic challenges Philip Morrison and Kosta Tsipis both eminent scientists with deep expertise in arms control issues sketch the broad outlines for a global approach to the problems of security and development ,

The Tyranny of Architecture: A Vegan Apologetic Thomas Aiello, 2017-03-04 The Tyranny of Architecture is a full philosophical defense of veganism one that defends the practice in a way fundamentally unique among such arguments It makes the case that in a human society built on artificial constructs the only demonstrable ethics not part of an imagined community is that of respecting the right to life and contentment construed for farmed animals as adequate food space and other basic amenities along with the right not to be tortured and killed for the unnecessary whims of humans existing mentally within a subset of artificial constructs that do not include those nonhuman animals **Oxford Studies in Agency and Responsibility Volume 5** D. Justin Coates, Neal A. Tognazzini, 2019-02-07 Oxford Studies in Agency and Responsibility is a series of volumes presenting outstanding new work on a set of connected themes investigating such questions as What does it mean to be an agent What is the nature of moral responsibility Of criminal responsibility What is the relation between moral and criminal responsibility if any What is the relation between responsibility and the metaphysical issues of determinism and free will What do various psychological disorders tell us about agency and responsibility How do moral agents develop How does this developmental story bear on questions about the nature of moral judgment and responsibility What do the results from neuroscience imply if anything for our questions about agency and responsibility No one has written more insightfully on the promises and perils of human agency than Gary Watson who has spent a career thinking about issues such as moral responsibility blame free will weakness of will addiction and psychopathy This special edition of OSAR pays tribute to Watson's work by taking up and extending themes from his pioneering essays Educating Oneself in Public Michael S. Moore, 2000 The eleven essays in Educating Oneself in Public Critical Essays in Jurisprudence constitute an education in the Anglo American jurisprudence of the second half of the twentieth century The book examines both the thought of major figures such as H L A Hart Joseph Raz Ronald Dworkin Lon Fuller and Richard Rorty and the general themes of major movements such as legal realism post modernism and pragmatism Despite this focus on the thoughts of others the book is not a survey but is a critical probing of particular ideas often attributed to such figures Detailed depth of understanding is sought about Hart's conception of a general jurisprudence that describes law in general Dworkin's conception of an internal jurisprudence that interprets the concept of law of our legal culture Fuller's ideal of a functional

jurisprudence that seeks the essence of law in the values it serves the place of rules in legal and moral reasoning Raz's idea that laws give exclusionary reasons to legal actors subject to such laws how judges should reason according to the legal realists whether there are right answers to all disputed law cases whether behind the obvious law of legal rules there can exist an unobvious law of legal principles Finnis's conception of the common good as the function law uniquely serves in what sense law practice and legal theory are interpretive activities whether all knowledge or some discrete realm of knowledge is peculiarly interpretive in character Michael Moore's views on each of these topics are detailed and original even if the springboards for each discussion are the writings of those who introduced such topics into modern discussions The introductory chapter includes responses by many of the figures examined in the other essays together with the author's rejoinders

Objects Daniel Z. Korman, 2015 One of the central questions of material object metaphysics is which highly visible objects there are right before our eyes Daniel Z. Korman defends a conservative view according to which our ordinary natural judgments about which objects there are are more or less correct He begins with an overview of the arguments that have led people away from the conservative view into revisionary views according to which there are far more objects than we ordinarily take there to be permissivism or far fewer eliminativism Korman criticizes a variety of compatibilist strategies according to which these revisionary views are actually compatible with our ordinary beliefs and responds to debunking arguments according to which these beliefs are the products of arbitrary biological and cultural influences He goes on to respond to objections that the conservative's verdicts about which objects that are and aren't are objectionably arbitrary and to the argument from vagueness which purports to show that the sort of restriction that conservatives want to impose on which composites there are is bound to give rise to vagueness about what exists something that is ruled out by widely accepted theories of vagueness Finally Korman responds to the overdetermination argument the argument from material constitution and the problem of the many all of which are meant to motivate eliminativism by showing that accepting ordinary objects commits one to one or another absurdity

Rethinking the 21st Century Doctor Amy Eckert, Laura Sjöberg, 2013-07-04 Rethinking the 21st Century brings much needed context and perspective to the security problems we face today In recent years the Bush Doctrine that the security threats we now face are entirely unprecedented has echoed around the world Global security and stability is now challenged not only by states and nuclear war but by insurgency disease environmental degradation and military privatisation Yet this creates a deep sense of disconnect in the way we perceive politics and can be dangerously stark and ahistorical The chapters here show that far from being a clean break the new problems faced today might actually have old solutions What can Locke tell us about terrorists What does Bentham have to say about sanctions What are the ethics of outsourcing war to private companies By looking back to decades and even centuries of ethical analysis and political theory this book provides fascinating insight into all these questions

Unpacking Normativity Kenneth Einar Himma, Miodrag Jovanovic, Bojan Spaic, 2018-11-01 This book provides a new and wide ranging

study of law's normativity examining conceptual descriptive and empirical dimensions of this perennial philosophical issue. It also contains essays concerned with among other issues the relationship between semantic and legal normativity, methodological concerns pertaining to understanding normativity and legal interpretation, and normativity as it pertains to transnational law. The contributors come not only from the usual Anglo-American and Western European community of legal theorists but also from Latin American and Eastern European communities representing a diversity of perspectives and points of view including essays from both analytic and continental methodologies. With this range of topics the book will appeal to scholars in transnational law, legal sociology, normative legal philosophy concerned with problems of state legitimacy and practical rationality as well as those working in general jurisprudence. It comprises a highly important contribution to the study of law's normativity.

The Beckoning Fair One Oliver Onions, 2004-08-01 Miles ahead of the average ghost story. Sunday Times. A novelist retreats to an abandoned house in the heart of London where he becomes enthralled by an 18th century spirit and where his contact with the outside world gradually diminishes. Acclaimed by such masters as Lovecraft as one of the best ghost stories in the English language.

The Methodology of Legal Theory Michael Giudice, Wil Waluchow, 2017-07-05 The last decade has witnessed a particularly intensive debate over methodological issues in legal theory. The publication of Julie Dickson's *Evaluation and Legal Theory* 2001 was significant as were collective returns to H. L. A. Hart's *Postscript to The Concept of Law*. While influential articles have been written in disparate journals, no single collection of the most important papers exists. This volume, the first in a three-volume series, aims not only to fill that gap but also propose a systematic agenda for future work. The editors have selected articles written by leading legal theorists including among others Leslie Green, Brian Leiter, Joseph Raz, Ronald Dworkin, and William Twining and organized under four broad categories: 1 problems and purposes of legal theory; 2 the role of epistemology and semantics in theorising about the nature of law; 3 the relation between morality and legal theory; and 4 the scope of phenomena a general jurisprudence ought to address.
