## **Rebuilding Iraq Actions Needed To Improve Use Of Private Security Providers:**

*Rebuilding Iraq* William Solis (au), David Cooper (au), 2005-11 The U S is spending billions of dollars to reconstruct Iraq while combating an insurgency that has targeted military 2 the U S military 3 U S agencies assessed the costs of using private security providers on reconstruction contracts Includes recommendations to the Secretaries of Defense State the Admin U S Agency for International Development USAID Charts tables Hard Lessons: the Iraq Reconstruction Experience Stuart W. Bowen, 2009-05 A combination of poor planning weak oversight and greed cheated U S taxpayers and undermined American forces in Iraq and Afghanistan U S taxpayers have paid nearly 51 billion for projects in Iraq including training the Iraqi army and police and rebuilding Iraq s oil electric justice health and transportation sectors Many of the projects did not succeed partly because of violence in Iraq and friction between U S officials in Washington and Iraqi officials in Baghdad The U S gov t was neither prepared for nor able to respond quickly to the ever changing demands of stabilizing Iraq and then rebuilding it This report reviews the problems in the war effort which the Bush admin claimed would cost 2 4 billion Charts and tables Iraqi Reconstruction United States. Congress. House. Committee on Oversight and Government Reform, 2007

**Contractors' Support of U. S. Operations in Iraq** Daniel Frisk, 2009 Contractors play a substantial role in supporting the U S s current military reconstruction and diplomatic operations in Iraq This report examines the use of contractors in the Iraq theater from 2003 through 2007 It provides an overview of the fed gov t costs of employing contractors in Iraq and in nearby countries the type of products and services they provide the number of personnel working on those contracts comparisons of past and present use of contractors during U S military operations and the use of contractors to provide security Also investigates the command and control structure between the U S gov t and contract employees and the legal issues surrounding contractor personnel working in Iraq Tables and graphs **Iraq Reconstruction** United States. Congress. House. Committee on Oversight and Government Reform, 2008 **Private Security Firms Standards, Cooperation, and Coordination on the Battlefield** United States. Congress. House. Committee on Government Reform. Subcommittee on National Security, Emerging Threats, and International Relations, 2007 *Private Actors and Security Governance* Alan Bryden, Marina Caparini, 2006 The privatization of security understood as both the top down decision to outsource military and security related tasks to private firms and the bottom up activities of armed non state actors such as rebel opposition groups insurgents militias and warlord factions has implications for the state s monopoly on the legitimate use of force Both top down and bottom up privatization have significant consequences for effective democratically accountable security sector governance as well as on opportunities for security sector reform across a range of different reform contexts This volume situates security privatization within a broader policy framework considers several relevant national and regional contexts and analyzes different modes of regulation and control relating to a phenomenon with deep historical roots but also strong links to more recent trends of globalization and transnationalization Alan Bryden is deputy

head of research at the Geneva Centre for the Democratic Control of Armed Forces DCAF Marina Caparini is senior research fellow at the Geneva Centre for the Democratic Control of Armed Forces DCAF Betraying Our Troops Dina Rasor, Robert Bauman, 2007-05-01 In this shocking exposé two government fraud experts reveal how private contractors have put the lives of countless American soldiers on the line while damaging our strategic interests and our image abroad From the shameful war profiteering of companies like Halliburton KBR to the sinister influence that corporate lobbyists have on American foreign policy Dina Rasor and Robert H Bauman paint a disturbing picture Here they give the inside story on troops forced to subsist on little food and contaminated water on officers afraid to lodge complaints because of Halliburton's political clout on millions of dollars in contractors bogus claims that are funded by American taxpayers Drawing on exclusive sources within government and the military the authors show how money and power have conspired to undermine our fighting forces and threaten the security of our country *Terrorism*, 2009 **Terrorism: Documents of International and Local Control: 1st Series Index 2009** Douglas Lovelace, 2009-08-27 Although each main set volume of Terrorism 1st Series contains its own volume specific index this comprehensive Index places all the Index info from the last fifty main set volumes into one index volume Furthermore the volume specific indexes are only subject indexes whereas five different indexes appear within this one comprehensive index the subject index an index organized according to the title of the document an index based on the name of the document's author an index correlated to the document's year and a subject by year index This one all encompassing Index thus provides users with multiple ways to conduct research into four years worth of Terrorism 1st Series volumes **Shadow Force** David Isenberg, 2008-12-30 From their limited use in China during World War II for example to their often clandestine use in Vietnam ferrying supplies before the war escalated in 1964 and 1965 when their role became more prominent and public private military contractors PMCs have played made essential contributions to the success and failures of the military and United States Today with an emphasis on force restructuring mandated by the Pentagon the role of PMCs and their impact on policy making decisions is at an all time peak This work analyzes that impact focusing specifically on PMCs in Iraq since the fall of Saddam Hussein in 2003 Isenberg dissects their responsibilities the friction that exists between contractors and military commanders problems of protocol and accountability as well as the problems of regulation and control that PMC companies create for domestic politics Isenberg organizes his work thematically addressing all facets of PMCs in the current conflict from identifying who the most influential companies are and how they got to that point to the issues that the government military and contractors themselves face when they take the field He also analyzes the problem of command control and accountability It is no secret that PMCs have been the source of consternation and grief to American military commanders in the field As they work to establish more routine protocols in the field however questions are also being raised about the role of the contractors here at home The domestic political arena is perhaps the most crucial battleground on which the contractors must have success After all they make their corporate living off of taxpayer dollars

and as such calls for regulation have resonated throughout Washington D C growing louder as the profile of PMCs increases during the current conflict

**The War on Terror** James P. Terry, 2013-05-30 A former Marine judge advocate and legal counsel to General Colin Powell James Terry explores the genesis of the United States approach to terror violence and the legal foundation for the nation's response to the conflicts in Afghanistan and Iraq Terry first reviews the entire spectrum of legal issues that arise before offering creative and practical legal and political solutions to counter terrorist activities The author examines the development of rules of engagement and their application in the terrorist environment while differentiating the law of self defense in this environment from more traditional conflicts He also addresses the role of interrogation and the line between harsh interrogation and torture and the jurisdictional claims that arise This volume examines a large number of topics related to the struggle and in a remarkably concise exploration makes them understandable to experts in international law as well as those who do not have a strong background in the field This text provides a serious but concise review of the legal issues in 20 interrelated chapters All constitutional law scholars and political scientists will greatly benefit from reading this book No other text offers such a comprehensive or detailed review of the issues arising from the War on Terror

**Private Military and Security Companies** Andrew Alexandra, Deane-Peter Baker, Marina Caparini, 2009-10-16 Over the past twenty years Private Military and Security Companies PMSCs have become significant elements of national security arrangements assuming many of the functions that have traditionally been undertaken by state armies Given the centrality of control over the use of coercive force to the functioning and identity of the modern state and to international order these developments clearly are of great practical and conceptual interest This edited volume provides an interdisciplinary overview of PMSCs what they are why they have emerged in their current form how they operate their current and likely future military political social and economic impact and the moral and legal constraints that do and should apply to their operation The book focuses

firstly upon normative issues raised by the development of PMSCs and then upon state regulation and policy towards PMSCs examining finally the impact of PMSCs on civil military relations It takes an innovative approach bringing theory and empirical research into mutually illuminating contact Includes contributions from experts in IR political theory international and corporate law and economics and also breaks important new ground by including philosophical discussions of PMSCs

*The Markets for Force* Molly Dunigan, Ulrich Petersohn, 2015-01-21 The Markets for Force examines and compares the markets for private military and security contractors in twelve nations Argentina Guatemala Peru Ecuador the United Kingdom the Czech Republic Ukraine Russia Afghanistan China Canada and the United States Editors Molly Dunigan and Ulrich Petersohn argue that the global market for force is actually a conglomeration of many types of markets that vary according to local politics and geostrategic context Each case study investigates the particular characteristics of the region's market how each market evolved into its current form and what consequence the privatized market may have for state military force and the provision of public safety The comparative standpoint sheds light on better known markets but also those less frequently studied such as the state owned and managed security companies in China militaries working for private sector extractive industries in Ecuador and Peru and the ways warlord forces overlap with private security companies in Afghanistan An invaluable resource for scholars and policymakers alike The Markets for Force offers both an empirical analysis of variations in private military and security companies across the globe and deeper theoretical knowledge of how such markets develop Contributors Olivia Allison Oldrich Bures Jennifer Catallo Molly Dunigan Scott Fitzsimmons Maiah Jaskoski Kristina Mani Carlos Ortiz Ulrich Petersohn Jake Sherman Christopher Spearin

**of Conflict** Derek L. Braddon, Keith Hartley, 2011-01-01 The Handbook on the Economics of Conflict conveys how economics can contribute to the understanding of conflict in its various dimensions embracing world wars regional conflicts terrorism and the role of peacekeeping in conflict prevention The economics of conflict is a relatively new branch of the discipline of economics Conflict provides opportunities for applying game theory involving strategic behaviour interactions and interdependence between adversaries The Handbook demonstrates that conflict and its prevention is costly it considers new dimensions such as ethnic cleansing destructive power terrorism corruption the impact of new technology peacekeeping the role of economists in defence ministries and the use of private contractors in conflict **America's Mercenaries: War By Proxy** Major Kevin G. Collins, 2014-08-15 Although the government's reliance on contractors to support military forces is not a new phenomenon the degree to which contractors are involved in Operations Enduring Freedom and Iraqi Freedom OIF has increased substantially In OIF in particular contractors perform a wide range of services in support of stabilization and reconstruction efforts Perhaps the most controversial and arguably the most troublesome of these contractors are those that are armed and use violence in the course of fulfilling their contractual obligations This thesis explores whether or not such contractors herein identified as private security providers PSPs have a destabilizing influence on United States political and military objectives In doing so the thesis identifies and evaluates the legal environment in which PSPs operate the intersection between PSP activities and critical requirements and vulnerabilities of coalition forces and PSP involvement within logical lines of operation within Iraq In concluding the author posits that PSPs have a destabilizing impact on not only the political and military mission but the United States military as well Finally the author provides recommendations for employing PSPs in the present and future conflicts
