The Schirn Ring - Peter Halley Max Hollein, 2016 Already 30 years ago Peter Halley 1953 was far ahead of his time With his Prison and Cell paintings he manifested the reasoning interdependencies and organizational forms of the artwork and the social space Since the 1980s Peter Halley examines in his geometrical abstract painting and site specific installations the spatial as well as communication and organizational structures that dominate everyday life In today's world where our lives are influenced and modified by algorithms of the digital industry and by the surface appeal of the media world we find ourselves as it were amidst a Halleyian composition In an installation exclusively developed for the free accessible Rotunda of the SCHIRN Halley will work intensively with the quite specific spatial conditions The combination of various motives from the spectrum of the artist oeuvre will create both an explosive energy field and an analytical map of his work Halley will form a cell for a key work from his historical oeuvre an art work that could hardly be any larger more elaborate or more expansive and which in turn feeds back to the original nucleus of the artist's creative power Exhibition Schirn Kunsthalle Frankfurt Germany 12.05.21.08.2016

Abstraction Maria Lind, 2013 This anthology reconsiders crucial aspects of abstraction's resurgence in contemporary art exploring three equally significant strategies explored in current practice formal abstraction economic abstraction and social abstraction In the 1960s movements as diverse as Latin American neo concretism op art and eccentric abstraction disrupted the homogeneity universality and rationality associated with abstraction These modes of

abstraction opened up new forms of engagement with the phenomenal world as well as the possibility of diverse readings of the same forms ranging from formalist and transcendental to socio economic and conceptual In the 1980s the writings of Peter Halley Fredric Jameson and others considered an increasingly abstracted world in terms of its economic social and political conditions all of which were increasingly manifested through abstract codes or sites of style Such economic abstraction is primarily addressed in art through subject or theme but Deleuze and Guattari's notion of art as abstract machine opens up possibilities for art's role in the construction of a new kind of social reality In more recent art a third strand of abstraction emerges a form of social abstraction centered on the strategy of withdrawal Social abstraction implies stepping aside a movement away from the mainstream suggesting the possibilities for art to maneuver within self organized withdrawn initiatives in the field of cultural production Artists surveyed include Lee Bontecou Louise Bourgeois Amilcar de Castro Paul C zanne Lygia Clark Kaja Dahlberg Stephan Dilleuth Marcel Duchamp Gardar Eide Einarsson G nther F rg Liam Gillick Ferreira Gullar Jean H lion Eva Hesse Jakob Jakobsen Jasper Johns Donald Judd Wassily Kandinsky Sol LeWitt Piet Mondrian Bruce Nauman H lio Oiticica Blinky Palermo Lygia Pape Mai Thu Perret Jackson Pollock Tobias Rehberger Bridget Riley Emily Roysden Lucas Samaras Julian Stanczak Frank Stella Hito Steyerl Theo van Doesburg Writers include Alfred H Barr Jr Ina Blom Lynne Cooke Anthony Davies Judi Freeman Peter Halley Brian Holmes Joe Houston Fredric Jameson Lucy R Lippard Sven L tticken Nina M ntmann Gabriel Perez Barreiro Catherine Qu loz Gerald Raunig Irit Rogoff Meyer Schapiro Kirk Varnedoe Stephan Zepke Blitzen Benz Bang Renate Wiehager, 2009 The Daimler Art Collection was founded in 1977 and has since grown to include about 1 800 works by more than 600 artists The focus of the collection is on Constructivist Concrete and Minimalist works by artists of the Stuttgart avant garde the Bauhaus and today's international Contemporary scene This follow up volume to 2006's collection catalogue Minimalism and After concentrates on the photographic video mixed media sculptural and commissioned works that the Daimler Collection has acquired since the early 1990s Detailed essays present and discuss approximately 300 works by more than 125 artists including Nam June Paik John M Armleder David Goldblatt Guy Tillim Walter de Maria Anthony Cragg Jeff Koons Andy Warhol and Sylvie Fleury Not only does Blitzen Benz BANG explore central aspects of one of the oldest and most important German corporate collections in existence today but it is also a survey of the important stylistic developments in international art from the 1960s to the present Updike and Politics Scott Dill, Matthew Shipe, 2019-06-27 Presenting the first interdisciplinary consideration of his political thought Updike and Politics New Considerations establishes a new scholarly foundation for assessing one of the most recognized and significant American writers of the post 1945 period This book brings together a diverse group of American and international scholars including contributors from Japan India Israel and Europe Like Updike himself the collection canvases a wide range of topics including Updike's too often overlooked poetry and his single play Its essays deal with not only political themes such as the traditional aspects of power rights equality justice or violence but also the more

divisive elements in Updike's work like race gender imperialism hegemony and technology Ultimately the book reveals how Updike's immense body of work illuminates the central political questions and problems that troubled American culture during the second half of the twentieth century as well as the opening decade of the new millennium Heidegger in the Face of the Environmental Question Enrique Leff, 2023-12-22 This volume engages with the work of Heidegger to argue that the modern environmental crisis is fundamentally a crisis of understanding Life resulting from the symbolic codification of the world from the Logos of Greek philosophy to the rationality of the modern world and resulting in a metaphysics that privileges ontological thinking on the question of being over the environmental question and the concern for the conditions of life Exploring the work of the three principal thinkers of the Lebensphilosophie Bergson Dilthey and Husserl it charts the itinerary of Heidegger's work and exposes its conflicts with the work of Marx Plessner Heidegger and Derrida A critical argument against the colonization of the world by Eurocentric reason and for the deconstruction of Capital Heidegger in the Face of the Environmental Question draws on Latin American environmental thought to re think the conditions for life on Earth It will therefore appeal to scholars of philosophy political theory and political sociology with interests in environmental philosophy political ecology and socioeconomic transformation
