Monetary Economics P. D. Jonson,1978 *Forecasts for the World Rubber Economy to the Year 2000* Hidde P.

Smit,1984-06-18 **Essays in Monetary Economics (Collected Works of Harry Johnson)** Harry Johnson,2013-07-18

Reprinting the second edition which included a new introduction explaining developments which had emerged since first publication this book discusses explorations in the fundamental theory of a monetary economy a theoretical critique of the Phillips Curve approach to the theory of inflation and the theory of the term structure of interest rates in terms of the theory of forward markets pioneered by David Meiselman *Monetary Policy in Sub-Saharan Africa* Andrew Berg,Rafael Portillo,2018-02-23 Low income countries in sub Saharan Africa present unique monetary policy challenges from the high share of volatile food in consumption to underdeveloped financial markets however most academic and policy work on monetary policy is aimed at much richer countries Can economic models and methods invented for rich countries even be adapted and applied here How does and should monetary policy work in sub Saharan African Monetary Policy in Sub Saharan Africa answers these questions and provides practical tools and policy guidance to respond to the complex challenges of this region Most countries in sub Saharan Africa have made great progress in stabilizing inflation over the past two decades As they have achieved a degree of basic macroeconomic stability policymakers are looking to avoid policy misalignments and respond appropriately to shocks in order to achieve stability and growth Officially they often have adopted money targeting frameworks a regime that has long disappeared from almost all advanced and even emerging market discussions In practice though they are in many cases finding current regimes lacking with opaque and sometimes inconsistent objectives inadequate transmission of policy to the economy and difficulties in responding to supply shocks Monetary Policy in Sub Saharan Africa takes a new approach by applying dynamic general equilibrium models suitably adapted to reflect key features of low income countries for the analysis of monetary policy in sub Saharan African countries Using a progressive approach derived from the International Monetary Fund s extensive practice and research Monetary Policy in Sub Saharan Africa seeks to address what we know about the empirics of monetary transmission in low income countries how monetary policy can work in countries characterized by underdeveloped financial markets and opaque policy regimes and how we can use empirical and theoretical methods largely derived in advanced countries to answer these questions It then uses these key topics to guide policymakers as they attempt to adjust food price terms of trade aid shocks and the effects of the global financial crisis
