Patterson, 2020-04-14 Finalist 2021 John

Hope Franklin Prize given by the American Studies Association Seeking ways to understand video games beyond their imperial logics Patterson turns to erotics to re invigorate the potential passions and pleasures of play Video games vastly outpace all other mediums of entertainment in revenue and in global reach On the surface games do not appear ideological nor are they categorized as national products Instead they seem to reflect the open and uncontaminated reputation of information technology Video games are undeniably imperial products Their very existence has been conditioned upon the

spread of militarized technology the exploitation of already existing labor and racial hierarchies in their manufacture and the utopian promises of digital technology Like literature and film before it video games have become the main artistic expression of empire today the open world empire formed through the routes of information technology and the violences of drone combat unending war and overseas massacres that occur with little scandal or protest Though often presented as purely technological feats video games are also artistic projects and as such they allow us an understanding of how war and imperial violence proceed under signs of openness transparency and digital utopia But the video game as Christopher B Patterson argues is also an inherently Asian commodity its hardware is assembled in Asia its most talented e sports players are of Asian origin Nintendo Sony and Sega have defined and dominated the genre Games draw on established discourses of Asia to provide an Asiatic space a playful sphere of racial otherness that straddles notions of the queer the exotic the bizarre and the erotic Thinking through games like Overwatch Call of Duty 4 Modern Warfare Shenmue II and Alien Isolation Patterson reads against empire by playing games erotically as players do seeing games as Asiatic playthings that afford new passions pleasures desires and attachments

Anime's Knowledge Cultures Jinying Li, 2024-03-12 Unlocking the technosocial implications of global geek cultures Why has anime a low tech medium from last century suddenly become the cultural new cool in the information age Through the lens of anime and its transnational fandom Jinying Li explores the meanings and logics of geekdom as one of the most

significant sociocultural groups of our time In *Anime's Knowledge Cultures* Li shifts the center of global geography in knowledge culture from the computer boys in Silicon Valley to the anime fandom in East Asia Drawing from film studies animation studies media theories fan studies and area studies she provides broad cultural and theoretical explanations of anime's appeal to a new body of tech savvy knowledge workers and consumers commonly known as geeks otaku or zhai Examining the forms techniques and aesthetics of anime as well as the organization practices and sensibilities of its fandom *Anime's Knowledge Cultures* is at once a theorization of anime as a media environment as well as a historical and cultural study of transnational geekdom as a knowledge culture Li analyzes anime culture beyond the national and subcultural frameworks of Japan or Japanese otaku instead theorizing anime's transnational transmedial network as the epitome of the postindustrial knowledge culture of global geekdom By interrogating the connection between the anime boom and global geekdom Li reshapes how we understand the meanings and significance of anime culture in relation to changing social and technological environments

Empire of Hope David Leheny, 2018-11-15 *Empire of Hope* asks how emotions become meaningful in political life In a diverse array of cases from recent Japanese history David Leheny shows how sentimental portrayals of the nation and its global role reflect a durable story of hopefulness about the country's postwar path From the medical treatment of conjoined Vietnamese children victims of Agent Orange the global promotion of Japanese popular culture a tragic maritime accident involving a US Navy submarine to the 2011 tsunami and nuclear disaster this story has shaped the way in which political figures writers officials and observers have depicted what the nation feels Expressions of national emotion do several things they construct the boundaries of the national body they inform and discipline appropriate expression and they depoliticize messy problems that threaten to produce divisive questions about winners and losers Most important they work because they appear to be natural simple and expected expressions of how the nation shares feeling even when they paper over the extraordinary divergence in how the nation's citizens experience each incident In making its arguments *Empire of Hope* challenges how we read the relations between emotion and politics by arguing unlike those who build from the neuroscientific turn in the social sciences or those developing affect theory in the humanities that the focus should be on emotional representation rather than on emotion itself

Fear, Cultural Anxiety, and Transformation Scott A. Lukas, John Marmysz, 2010-06-22 This collection was inspired by the observation that film remakes offer us the opportunity to revisit important issues stories themes and topics in a manner that is especially relevant and meaningful to contemporary audiences Like mythic stories that are told again and again in differing ways film remakes present us with updated perspectives on timeless ideas While some remakes succeed and others fail aesthetically they always say something about the culture in which and for which they are produced Contributors explore the ways in which the fears of death loss of self and bodily violence have been expressed and then reinterpreted in such films and remakes as *Invasion of the Body Snatchers* *Night of the Living Dead* and *Dawn of the Dead* Films such as *Rollerball* *The Ring* *The Grudge* *The Great Yokai Wars* and

Insomnia are discussed as well because of their ability to give voice to collective anxieties concerning cultural change nihilism and globalization While opening on a note that emphasizes the compulsion of filmmakers to revisit issues concerning fear and anxiety this collection ends by using films like Solaris King Kong Star Trek Doom and Van Helsing to suggest that repeated confrontation with these issues allows the opportunity for creative and positive transformation

Japanese Idols Go to China Xiaofei Tu, Wendy Xie, 2022-10-25 This book situates the Chinese acceptance of Japanese popular culture specifically the intriguing and sometimes awkward relationship between the idol groups AKB48 and SNH48 within the broad context of nationalist ideology and international relations in East Asia It aims to enhance the knowledge and understanding of the reader about contemporary East Asian cultural exchanges and nationalist expressions in concrete forms Additionally this book attempts to discover heretofore overlooked aspects of nationalism s metamorphosis in both China and Japan and challenge the existing scholarly and popular understandings of nationalism By interrogating the nationalism factor in popular culture in Chinese and Japanese contexts this books concludes that popular culture fandom can both be a culprit in promoting hegemonic political ideologies and serve as a potential antidote

Media Franchising Derek Johnson, 2013-03-22 Johnson astutely reveals that franchises are not Borg like assimilation machines but rather complicated ecosystems within which creative workers strive to create compelling shared worlds This finely researched breakthrough book is a must read for anyone seeking a sophisticated understanding of the contemporary media industry Heather Hendershot author of *What s Fair on the Air* Cold War Right Wing Broadcasting and the Public Interest While immediately recognizable throughout the U S and many other countries media mainstays like X Men Star Trek and Transformers achieved such familiarity through constant reincarnation In each case the initial success of a single product led to a long term embrace of media franchising a dynamic process in which media workers from different industrial positions shared in and reproduced familiar culture across television film comics games and merchandising In *Media Franchising* Derek Johnson examines the corporate culture behind these production practices as well as the collaborative and creative efforts involved in conceiving sustaining and sharing intellectual properties in media work worlds Challenging connotations of homogeneity Johnson shows how the cultural and industrial logic of franchising has encouraged media industries to reimagine creativity as an opportunity for exchange among producers licensees and even consumers Drawing on case studies and interviews with media producers he reveals the meaningful identities cultural hierarchies and struggles for distinction that accompany collaboration within these production networks *Media Franchising* provides a nuanced portrait of the collaborative cultural production embedded in both the media industries and our own daily lives

Western Japaneseness: Intercultural Translations of Japan in Western Media Frank Jacob, Bruno Surace, 2021-03-02 Our images of non Western cultures are often based on stereotypes that are replicated over the years These stereotypes often appear in popular media and are responsible for a pre set image of otherness The present book investigates these processes and the media representation of otherness especially as an artificial

construct based on stereotypes and their repetition in the case of Japan Western Japaneseness thereby illustrates how the Western image of Japan in popular media is rather a construct that in a way replicated itself instead of a more serious encounter with a foreign and different cultural context This book will be of great value to students and academics who hold interest in media studies Japanese studies and cultural studies It will also appeal to a broader audience with interests in Japan more generally
