**Receptor Activation by Antigens, Cytokines, Hormones, and Growth Factors** David Naor,1995 Upon ligand binding cell surface receptors transmit activity signals into the cell activating multiple metabolic and mitogenic pathways Although the nature of the stimulatory molecules is infinitely varied the principles involved in propagating the signals are ubiquitous Thus such different stimulators as antigens cytokines hormones and growth factors use similar transduction principles including ligand induced receptor internalisation of receptor ligand complexes activation of G proteins oligomerisation increases in Ca<sup>2</sup> uptake activation of tyrosine kinases or other kinases and phosphatases protein phosphorylation or dephosphorylation and the triggering of oncogenes and transcription factors The signalling molecules interact with each other through universal zippers such as SH2 and SH3 domains This volume integrates the work of the most significant contributors to the field in elucidating the mechanisms involved in these signal transduction pathways **Receptor**

Holgate,Lanny J. Rosenwasser,2009-11-10 When I entered the field of allergy in the early 1970s the standard textbook was a few hundred pages and the specialty was so compact that texts were often authored entirely by a single individual and were never larger than one volume Compare this with Allergy Frontiers Epigenetics Allergens and Risk Factors the present s volume text with well over 150 contributors from throughout the world This book captures the explosive growth of our specialty since the single author textbooks referred to above The unprecedented format of this work lies in its meticulous attention to detail yet comprehensive scope For example great detail is seen in manuscripts dealing with topics such as Exosomes naturally occurring minimal antigen presenting units and Neuropeptide S receptor 1 NPSR1 an asthma susceptibility gene The scope is exemplified by the unique approach to disease entities normally dealt with in a single chapter in most texts For example anaphylaxis a topic usually confined to one chapter in most textbooks is given five chapters in Allergy Frontiers This approach allows the text to employ multiple contributors for a single topic giving the reader the advantage of being introduced to more than one vi point regarding a single disease **Biomedical Index to PHS-supported Research: pt.
