Patent and Trademark Office, 2000 **The Mahler Companion** Donald Mitchell, Andrew Nicholson, 2002 The Mahler Companion consists of a collection of original essays on Mahler written especially for the occasion by Mahler specialists from around the world It addresses all parts of his life and work symphonies songs and song cycles each of which is discussed individually his conducting activities compositional habits and aesthetic development and sets these within the cultural and political context of his time In addition it responds to the global spread of this remarkable composer's music and an almost universal fascination with it by attempting to give an account of the reception of Mahler's music in many of the countries in which it eventually came to flourish eg Holland France Japan Russia England and the United States This particular series of chapters reveals that the Mahler Phenomenon earned its description principally in the years after the Second World War but also that the Mahler revival was already well under way pre war perhaps especially in England and the States and most surprisingly of all Japan The selection of contributors who between them cover all Mahler's musical output shows that here too this volume significantly crosses national boundaries The very diverse approaches analyses and commentaries amply illustrated with music examples are evidence of the uniquely rich and complex character of a music that spans more than one culture and more than one century The volume includes the most significant and up to date Mahler research and debate and illumines some hitherto unexplored areas of Mahler's life eg his visit to London in 1892 his sculptor daughter Anna and the hall in which the Seventh Symphony was first performed in Prague in 1908 It has often been claimed that Mahler born in 1860 was in fact a prophet of much that was to come in the 20th century His later works undeniably anticipate often with dazzling virtuosity many of the principal techniques and aesthetics of the new century only the first decade of which he lived to see Small wonder that among his earliest admirers was a collective of some of the most important and innovative composers of our time Schoenberg Berg and Webern Their successors Copland Shostakovich and Britten to name a few were to range across contrasting cultures and national frontiers Drawing on the best resources and the most up to date information about the composer this volume fulfils the need in Mahler literature for a genuinely comprehensive guide to the composer and will be the authoritative guide for Mahler enthusiasts for years to come **The Biology of Horror**,

Unearthing the fearful flesh and sinful skins at the heart of gothic horror Jack Morgan rends the genre's biological core from its oft discussed psychological elements and argues for a more transhistorical conception of the gothic one negatively related to comedy The Biology of Horror Gothic Literature and Film dissects popular examples from the gothic literary and cinematic

canon exposing the inverted comic paradigm within each text Morgan's study begins with an extensive treatment of comedy as theoretically conceived by Suzanne Langer C L Barber and Mikhail Bakhtin Then Morgan analyzes the physical and mythological nature of horror in inverted comic terms identifying a biologically grounded mythos of horror Motifs such as sinister loci languishment masquerade and subversion of sensual perception are contextualized here as embedded in an organic reality resonating with biological motives and consequences Morgan also devotes a chapter to the migration of the gothic tradition into American horror emphasizing the body as horror's essential place in American gothic The bulk of Morgan's study is applied to popular gothic literature and films ranging from high gothic classics like Matthew Lewis's *The Monk* Ann Radcliffe's *The Mysteries of Udolpho* Charles Maturin's *Melmoth the Wanderer* and Mary Shelley's *Frankenstein* to later literary works such as Poe's macabre tales Melville's *Benito Cereno* J S Le Fanu's *Uncle Silas* H P Lovecraft's *The Shadow over Innsmouth* Shirley Jackson's *The Haunting of Hillhouse* Stephen King's *Salem's Lot* and Clive Barker's *The Damnation Game* Considered films include *Nosferatu* *Invasion of the Body Snatchers* *Friday the 13th* *Halloween* *Night of the Living Dead* *Angel Heart* *The Stand* and *The Shining* Morgan concludes his physical examination of the Gothic reality with a consideration born of Julia Kristeva's theoretical rubric which addresses horror's existential and cultural significance its lasting fascination and its uncanny positive and often therapeutic direction in literature and film

The Cambridge Companion to Mahler Jeremy Barham, 2007-12-13 In the years approaching the centenary of Mahler's death this book provides both summation of and starting point for an assessment and reassessment of the composer's output and creative activity Authored by a collection of leading specialists in Mahler scholarship its opening chapters place the composer in socio political and cultural contexts and discuss his work in light of developments in the aesthetics of musical meaning Part II examines from a variety of analytical interpretative and critical standpoints the complete range of his output from early student works and unfinished fragments to the sketches and performing versions of the Tenth Symphony Part III evaluates Mahler's role as interpreter of his own and other composers works during his lifelong career as operatic and orchestral conductor Part IV addresses Mahler's fluctuating reception history from scholarly journalistic creative public and commercial perspectives with special attention being paid to his compositional legacy
