

A Selected Bibliography of Typographical Research Relevant to the Production of Instructional Materials¹

JAMES HARTLEY

SUSAN FRASER

PETER BURNHILL

In preparing this bibliography of research in typography relevant to the design of instructional materials we have tried to be comprehensive, but in a limited way. We have tried to make the coverage broad, but to select within different areas only those papers that have comprehensive reference lists, or that have been recently published and thus are not included in other bibliographies. For a complete overview of the field, readers are especially referred to Herbert Spencer's (1969) *The Visible Word* which has a bibliography containing over 400 entries.

In this bibliography we have divided the material as follows:

¹The authors express appreciation to friends and colleagues who commented on an earlier version of this bibliography, and to the Social Science Research Council who financed its preparation.

James Hartley is senior lecturer in psychology and Susan Fraser is research assistant in the Department of Psychology, The University of Keele, Staffordshire, England. Peter Burnhill is head of the Design Department, Stafford College of Further Education, England.
