## **Selected Writings 1909-1953 Volume Two Vienna Circle Collection Volume 4b:**

**Selected Writings 1909-1953** M. Reichenbach, 2012-12-06 These two volumes form a full portrait of Hans Reichenbach from the school boy and university student to the maturing and creative scholar who was as well an immensely devoted teacher and a gifted popular writer and speaker on science and philosophy We selected the articles for several reasons Many of them have not previously been available in English many are out of print either in English or in German some especially the early ones have been little known and deal with subject matters other than philosophy of science The genesis and evolution of Reichenbach's ideas appeared to be of deep interest and so we included papers from four decades despite occasional redundancy We were for example pleased to include his extensive review article from the encyclopedic *Handbuch der Physik* of 1929 on The Aims and Methods of Physical Knowledge written at a time of creative collaboration between Reichenbach's Berlin group and the Vienna Circle of Schlick and Carnap Reichenbach was a pioneer opening new pathways to the solution of age old problems in many fields space time causality induction and probability philosophical analysis and interpretation of classical physics relativity and quantum physics logic language ethics scientific explanation and methodology critical appreciation and reconstruction of past metaphysical thinkers and scientists from Plato to Leibniz and Kant Indeed his own philosophical journey was initiated by his passage from Kant to anti Kant

**Reminiscences of the Vienna Circle and the Mathematical Colloquium** Karl Menger, 2013-03-07 Karl Menger was born in Vienna on January 13 1902 the only child of two gifted parents His mother Hermione nee Andermann 1870-1922 in addition to her musical abilities wrote and published short stories and novelettes while his father Carl 1840-1921 was the noted Austrian economist one of the founders of marginal utility theory A highly cultured man and a liberal rationalist in the nineteenth century sense the elder Menger had witnessed the defeat and humiliation of the old Austrian empire by Bismarck's Prussia and the subsequent establishment under Prussian leadership of a militaristic mystically nationalistic state capitalist German empire in effect the first modern military industrial complex These events helped frame in him a set of attitudes that he later transmitted to his son and which included an appreciation of cultural attainments and tolerance and respect for cultural differences combined with a deep suspicion of rabid nationalism particularly the German variety Also a fascination with structure whether artistic scientific philosophical or theological but a rejection of any aura of mysticism or mumbo jumbo accompanying such structure Thus the son remarked at least once that the archangels' chant that begins the Prolog im Himmel in Goethe's *Faust* was perhaps the most beautiful thing in the German language but of course it doesn't mean anything

*Time, Causality, and the Quantum Theory* S. Mehlberg, 2012-12-06

**Moritz Schlick Philosophical Papers** Moritz Schlick, 1978-12-31

**Logical Empiricism in North America** Gary L. Hardcastle, Alan W. Richardson, 2003 An essential overview of an important intellectual movement Logical Empiricism in North America offers the first significant sustained and multidisciplinary attempt to understand the intellectual cultural and political dimensions of logical empiricism's

transmission from Europe subsequent development in North America and influence on our understanding of science in the twenty first century BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved

**Empiricism, Logic and Mathematics** Hans Hahn,2012-12-06 The role Hans Hahn played in the Vienna Circle has not always been sufficiently appreciated It was important in several ways In the first place Hahn belonged to the trio of the original planners of the Circle As students at the University of Vienna and throughout the first decade of this century he and his friends Philipp Frank and Otto Neurath met more or less regularly to discuss philosophical questions When Hahn accepted his first professorial position at the University of Czernowitz in the north east of the Austrian empire and the paths of the three friends parted they decided to continue such informal discussions at some future time perhaps in a somewhat larger group and with the cooperation of a philosopher from the university Various events delayed the execution of the project Drafted into the Austrian army during the first world war Hahn was wounded on the Italian front Toward the end of the war he accepted an offer from the University of Bonn extended in recognition of his remarkable mathematical achievements He remained in Bonn until the spring of 1921 when he returned to Vienna and a chair of mathematics at his alma mater There in 1922 the Mach Boltzmann professorship for the philosophy of the inductive sciences became vacant by the death of Adolf Stohr and Hahn saw a chance to realize his and his friends old plan *Philosophical Papers* Moritz

Schlick,1980-03-31 **The Law of Causality and Its Limits** Philipp Frank,2012-12-06 The Law of Causality and its Limits was the principal philosophical work of the physicist turned philosopher Philipp Frank Born in Vienna on March 20 1884 Frank died in Cambridge Massachusetts on July 21 1966 He received his doctorate in 1907 at the University of Vienna in theoretical physics having studied under Ludwig Boltzmann his subsequent research in physics and mathematics was represented by more than 60 scientific papers Moreover his great success as teacher and expositor was recognized throughout the scientific world with publication of his collaborative *Die Differentialgleichungen der Mechanik und Physik* with Richard von Mises in 1925 27 Frank was responsible for the second volume on physics and especially noted for his authoritative article on classical Hamiltonian mechanics and optics Among his earliest papers were those beginning in 1908 devoted to special relativity which together with general relativity and physical cosmology occupied him throughout his life Already in 1907 Frank published his seminal paper *Kausalgesetz und Erfahrung* Experience and the Law of Causality much later collected with a splendid selection of his essays on philosophy of science in English 1941c and 1949g in our Bibliography Joining the first Vienna Circle in the first decade of the 20th century with Hans Hahn mathematician and Otto Neurath sociologist and economist and deeply influenced by studies of Ernst Mach's critical conceptual histories of science and by the striking challenge of Poincare and Duhem Frank continued his epistemological investigations *Foundations for a Scientific Analysis of Value* V. Kraft,2012-12-06 In English speaking countries Victor Kraft is known principally for his account of the Vienna Circle That group of thinkers has exercised in recent decades a significant influence not only on the

philosophy of the western world but also at least indirectly on that of the East where there is now taking place a slow but clearly irresistible erosion of dogmatic Marxism by ways of thinking derived from a modern scientific conception of the world. Kraft's work as historian of the Vienna Circle has led to his being classed without further qualification as a neo-positivist philosopher. It is however only partially correct to count him as such. To be sure he belonged to the group named he took part in its meetings and he drew from it suggestions central to his own work but he did not belong to the hard core of the Circle and was a conscious opponent of certain radical tendencies espoused at least from time to time by some of its members. Evidence of this is provided by the theory of value now presented in English translation since no less a thinker than Rudolf Carnap had originally at any rate obeyed a very narrowly conceived criterion of sense and declared value judgements to be senseless.

**Economic Writings** Otto Neurath, 2006-03-03 This book makes available for the first time in English a substantial part of Otto Neurath's economic writings. The essays and small monographs translated here extend from his student years to his last ever finished piece. They chart not only Neurath's varied interests in the economic history of antiquity in war economics and schemes for the socialisation of peacetime economies in the theory of welfare measures and social indicators and in issues of the theory of collective choice but also show his philosophical interests emerging in his contributions to seminal debates of the German Social Policy Association. This volume shows that Neurath's important contributions to the socialist calculation debate are but one aspect of a many-sided and original oeuvre. The translations are preceded by an introductory essay by one of the editors which contextualises the selections by locating them in the various debates of the time that provided their original setting. This book is of interest to economists, philosophers of social science and of economics as well as to historians of philosophy of science and of analytic philosophy.

**Carnap and the Vienna Circle** Ramon Cirera, 2022-06-08 It is not inaccurate to say that from 1928 to 1936 Carnap was a member of the Vienna Circle even though during this period he was not always present in Vienna. During this years which spanned roughly the period from the Aufbau to Testability and Meaning he worked or at least discussed frequently with the members of the group. However traditionally it has been difficult to form a proper view of the development of Carnap's ideas throughout this period mainly because of three errors which have persisted in the commonly accepted historical interpretation of Carnap and the Vienna Circle: emphasis on the Circle as a unit rather than a collective of individuals; insistence on verificationism as the defining characteristic of Logical Positivism; and the systematic abstraction of the work of the Circle from its historical context. As against this historically distorted image this book argues for an alternative reading evaluating the different influences on Carnap of Schlick, Wittgenstein, Neurath and Popper and making sense of Carnap's evolution from physicalism to phenomenalism and the syntactic point of view.

*Hans Reichenbach* Hans Reichenbach, 1978-12-31 Reality and Experience E. Kaila, 2012-12-06 Philosophically there is a book which was a tremendous experience for me. Eino Kaila's psychology of the Personality \_ His thesis that man lives strictly according to his needs negative and positive was shattering.

to me but terribly true And I built on this ground Ingmar Bergman J 1 This introductory essay is neither intended to be a full presentation nor to be a critical evaluation of the contributions to philosophy made by Eino Kaila Kaila's work will speak to the reader through the four papers here published in English translation from the German They belong in the tradition of the Vienna Circle and of logical empiricism They cover however only one period or sector of Kaila's rich and varied life work This is the sector best integrated into the mainstream of contemporary philosophic thinking The primary aim of this essay is to portray an impressive intellectual personality and to make a modest contribution to Finnish and Scandinavian intellectual history Much of its content may be thought to be of local relevance only But considering the position which Kaila held in his country and considering his decisive influence on the development of philosophy in Finland I hope that this local background will also interest an international circle of readers

*Physics, Philosophy and Psychoanalysis* Robert S. Cohen, Larry Laudan, 1983-04-30 A festschrift dedicated to Adolf Gr nbaum on the occasion of his 60th birthday this volume contains contributions which are original works on scientific and philosophical issues related to his fields of scholarship Adolf Gr nbaum is a leading philosopher of space and time and of the logical foundations of psychoanalytic theory in the English speaking world The philosophers who have contributed are a noteworthy group The collection is complemented by a biographical memoir and a complete bibliography of Gr nbaum's publications

**Principles of the Theory of Heat** Ernst Mach, 2012-12-06 xi should hope for first and foremost from any historical investigation including his own was that it may not be too tedious II That hope is generally realized in Mach's historical writings most of which are as lively and interesting now as they were when they appeared Mach did not follow any existing model of historical or philosophical or scientific exposition but went at things his own way combining the various approaches as needed to reach the goals he set for himself When he is at his best we get a sense of the Mach whom William James met on a visit to Prague the Mach whose four hours of unforgettable conversation gave the forty year old well traveled James the strongest impression of pure intellectual genius he had yet received and whose absolute simplicity of manner and winningness of smile captivated him completely 12 Consider for example the first few chapters of this book *Principles of the Theory of Heat* which Mach devotes to the notion of temperature that most fundamental of all thermal concepts He begins by trying to trace the path that leads from our sensations of hot and cold to a numerical temperature scale

**Einstein Was Right** Jed Z. Buchwald, 2020-10-13 An authoritative interdisciplinary account of the historic discovery of gravitational waves In 1915 Albert Einstein predicted the existence of gravitational waves ripples in the fabric of spacetime caused by the movement of large masses as part of the theory of general relativity A century later researchers with the Laser Interferometer Gravitational Wave Observatory LIGO confirmed Einstein's prediction detecting gravitational waves generated by the collision of two black holes Shedding new light on the hundred year history of this momentous achievement *Einstein Was Right* brings together essays by two of the physicists who won the Nobel Prize for their instrumental roles in the discovery along with contributions by leading scholars

who offer unparalleled insights into one of the most significant scientific breakthroughs of our time This illuminating book features an introduction by Tilman Sauer and invaluable firsthand perspectives on the history and significance of the LIGO consortium by physicists Barry Barish and Kip Thorne Theoretical physicist Alessandra Buonanno discusses the new possibilities opened by gravitational wave astronomy and sociologist of science Harry Collins and historians of science Diana Kormos Buchwald Daniel Kennefick and Jürgen Renn provide further insights into the history of relativity and LIGO The book closes with a reflection by philosopher Don Howard on the significance of Einstein's theory for the philosophy of science Edited by Jed Buchwald Einstein Was Right is a compelling and thought provoking account of one of the most thrilling scientific discoveries of the modern age     Selected Papers in Logic and Foundations, Didactics, Economics Karl

Menger, 1979-03-31 This volume brings together those papers of mine which may be of interest not only to various specialists but also to philosophers Many of my writings in mathematics were motivated by epistemological considerations some papers originated in the critique of certain views that at one time dominated the discussions of the Vienna Circle others grew out of problems in teaching fundamental ideas of mathematics still others were occasioned by personal relations with economists Hence a wide range of subjects will be discussed epistemology logic basic concepts of pure and applied mathematics philosophical ideas resulting from geometric studies mathematical didactics and finally economics The papers also span a period of more than fifty years What unifies the various parts of the book is the spirit of searching for the clarification of basic concepts and methods and of articulating hidden ideas and tacit procedures Part 1 includes papers published about 1930 which expound an idea that Carnap after a short period of opposition in the Circle fully adopted and under the name Principle of Tolerance he eloquently formulated it in great generality in his book Logical Syntax of Language 1934 through which it was widely disseminated The New Logic in Chapter 1 furthermore includes the first report 1932 to a larger public of Gödel's epochal discovery presented among the great logic results of all time Chapter 2 is a translation of an often quoted 1930 paper presenting a detailed exposition and critique of intuitionism     *Time, Causality, and the Quantum Theory* Henry

Mehlinger, 1980     *Methodological Variance* G.L. Pandit, 2012-12-06 For a philosopher with an abiding interest in the nature of objective knowledge systems in science what could be more important than trying to think in terms of those very subjects of such knowledge to which men like Galileo Newton Max Planck Einstein and others devoted their entire lifetimes In certain respects these systems and their structures may not be beyond the grasp of a linguistic conception of science and scientific change which men of science and philosophy have advocated in various forms in recent times But certainly it is wrong headed to think that one's conception of science can be based on an identification of its theories with languages in which they may be my own alternatively framed There may be more than one place in book 1983 87 where they may seem to get confused with each other quite against my original intentions The distinction between the objective knowledge systems in science and the dynamic frameworks of the languages of the special individual sciences in which their growth can be

embedded in significant ways assumes here therefore much importance. It must be recognized that the problems concerning scientific change which these systems undergo are not just problems concerning language change.

**Inquiries and Provocations** Herbert Feigl, 1980-11-30. The title is his own. Herbert Feigl, the provocateur and the soul, if we may put it so, of modesty wrote to me some years ago: "I'm more of a catalyst than producer of new and original ideas all my life but then he completed the self appraisal with just a few exceptions perhaps. We need not argue for the creative nature of catalysis but will simply remark that there are new and original ideas in the twenty four papers selected for this volume in the extraordinary apparatus of the 25 year old Feigl in his Vienna dissertation of 1927 on Zufall und Gesetz in the creative critique and articulation in his classical monograph of 1958 on The Mental and the Physical and the reader will want to turn to some of the seventy other titles in our Feigl bibliography appended. Professor Feigl has been a model philosophical worker above all else: honest, self aware, open minded and open hearted, keenly devotedly and even arduously the student of the sciences, he has been a logician and an empiricist. Early on he brought the Vienna Circle to America and much later he helped to bring it back to Central Europe. The story of the logical empiricist movement and of Herbert Feigl's part in it has often been told importantly by Feigl himself in four papers we have included here.

Selected Writings 19091953 Volume Two Vienna Circle Collection Volume 4b: Bestsellers in 2023 The year 2023 has witnessed a noteworthy surge in literary brilliance, with numerous engrossing novels captivating the hearts of readers worldwide. Lets delve into the realm of top-selling books, exploring the engaging narratives that have enthralled audiences this year. Selected Writings 19091953 Volume Two Vienna Circle Collection Volume 4b : Colleen Hoover's "It Ends with Us" This poignant tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover skillfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can prevail. Uncover the Best : Taylor Jenkins Reid's "The Seven Husbands of Evelyn Hugo" This intriguing historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reid's compelling storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens' "Where the Crawdads Sing" This captivating coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens weaves a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These popular novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and thrilling novel that will keep you wondering until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
