

BERTRAM D. LEWIN, M.D.

This lecture marks the anniversary of the founding of the Institute for Psychoanalysis in Chicago twenty-five years ago by Franz Alexander. Fortunate Franz Alexander, *non sine honore* a prophet, who robbed Juvenal's goddess Fortuna of her divinity by his foresight. But this anniversary is not a local matter. It is a significant mark for all who esteem psychoanalysis and are concerned for its teaching and for its progress as a science. It is a moment for retrospection and reflection. I deeply appreciate the honor shown me by the invitation to deliver the First Alexander Lecture and to voice some of the thoughts appropriate to the occasion.

Many come to mind readily which relate to the rapid rise and development of psychoanalytic education. The year 1932, in which the Institute in Chicago was founded, was a good one for psychoanalysis in the United States. For some years previously, many Americans had studied psychoanalysis abroad, and the example of the new institutes there, particularly the one in Berlin, was making a strong impression on this side of the water. In several American cities the psychoanalytic groups, having grown in membership, desired and were better able to organize the education which was necessary for a psychoanalyst. Dr. Alexander was the first distinguished teacher invited to this country from one of the admired foreign institutes. Other signs of the same *elan* were the similar invitations to other teachers in the older European communities, the founding of the New York Psychoanalytic Institute in the same year 1932, and the first issue of the *Psychoanalytic Quarterly* in April of that year. In 1933 came the real beginning

¹ Delivered on November 15, 1957, before the Chicago Institute for Psychoanalysis, as the First Alexander Lecture; also at the Midwinter Meeting of the American Psychoanalytic Association, New York, December 8, 1957.

Lewin* Bertram David Lewin,1973 **The Oceanic Feeling** J.M Masson,2012-12-06 By way of a personal note I can reveal to the reader that I was led to Sanskrit by an exposure to Indian philosophy while still a child These early mystical interests gave way in the university to scholarly pursuits and through reading the works of Franklin Edgerton Louis Renou and Etienne Lamotte I was introduced to the scientific study of the past to philology and the academic study of an ancient literature In this period I wrote a number of books on Sanskrit aesthetics concentrating on the sophisticated Indian notions of suggestion This work has culminated in a three volume study of the Dhvanyaloka and the Dhvanyalokalocana for the Harvard Oriental Series Eventually I found that I wanted to broaden my concern with India to learn what was at the universal core of my studies and what could be of interest to everyone In reading Indian literature I came across so many bizarre tales and ideas that seemed incomprehensible and removed from the concerns of everyday life that I became troubled Vedantic ideas of the world as a dream for example to which I had been particularly partial seemed grandiose and megalomaniac I turned away with increasing scepticism from what I felt to be the hysterical outpourings of mystical and religious fanaticism

Essential Papers on Dreams Melvin Lansky,1992-04 This collection traces the history of psychoanalytically informed thinking about dreams using selected contributions from Freud to the present to highlight both the legacy of The Interpretation of dreams and the evolving use of the dream as a research tool of the mind first later of the psychoanalytic process and of pathology and logic predicaments and finally as a tool to be integrated with other methods of investigation

Bibliography of the History of Medicine , *Catalog of Copyright Entries. Third Series* Library of Congress. Copyright Office,1975 *National Library of Medicine Current Catalog* National Library of Medicine (U.S.),1973 First multi year cumulation covers six years 1965-70 **Relatedness, Self-Definition and Mental Representation** John S. Auerbach,Kenneth N. Levy,Carrie E. Schaffer,2005-07-08 Over the course of a long and distinguished career psychologist and psychoanalyst Sidney J Blatt has made major contributions to cognitive developmental theory psychoanalytic object relations theory applied psychoanalysis and current research in the areas of psychopathology and psychotherapy This book presents chapters by Dr Blatt's many colleagues and students who address the key areas in which Dr Blatt focuses his intellectual endeavours Personality development Psychopathology Issues in psychological testing and assessment Psychotherapy and the treatment process Applied psychoanalysis and broader cultural trends Relatedness Self Definition and Mental Representation explores Dr Blatt's unique contributions within both psychoanalysis where empirical research is often neglected and clinical psychology where psychoanalysis is increasingly ignored It will be engaging reading for

psychoanalysts and clinical psychologists as well as all those concerned with psychotherapy and personality theory and development Taking the Transference, Reaching Toward Dreams M. Gerard Fromm, 2018-03-08 This book reports on clinical work in and at the boundaries of the intermediate space between patient and therapist perhaps the space between reaching toward dreams and taking the transference Though the clinical work to be described here was influenced quite deeply by the writing of Winnicott primarily and then of Lacan it is meant to stand for itself as the record of and a set of stories about one therapist's experiences and learning The chapters that follow take up a range of clinical conditions hopelessness self destructiveness psychosis clinical phenomena regression impasse trauma technical issues interpretation transference free association and related topics dreams creativity the analytic setting Most of this work took place at the Austen Riggs Center a small psychiatric hospital in Stockbridge Massachusetts in which quite troubled patients are offered intensive psychoanalytic psychotherapy in a completely open and voluntary therapeutic community setting *Relational Psychoanalysis, Volume 14* Stephen A. Mitchell, Lewis Aron, 2013-04-15 Over the course of the past 15 years there has been a vast sea change in American psychoanalysis It takes the form of a broad movement away from classical psychoanalytic theorizing grounded in Freud's drive theory toward models of mind and development grounded in object relations concepts In clinical practice there has been a corresponding movement away from the classical principles of neutrality abstinence and anonymity toward an interactive vision of the analytic situation that places the analytic relationship with its powerful reciprocal affective currents in the foreground These developments have been evident in virtually all schools of psychoanalysis in America from the most traditional to the most radical The wellspring of these innovations is the work of a group of psychoanalysts who have struggled to integrate aspects of interpersonal psychoanalysis various British object relations theories and psychoanalytic feminism Although not self selected as a school these theorists have generated a distinct tradition of psychoanalytic thought and clinical practice that has become extremely influential within psychoanalysis in the United States *Relational Psychoanalysis The Emergence of a Tradition* brings together for the first time the seminal papers of the major authors within this tradition Each paper is accompanied by an introduction in which the editors place it in its historical context and a new afterward in which the author suggests subsequent developments in his or her thinking This book is an invaluable resource for any clinical practitioner teacher or student of psychoanalysis interested in exploring the exciting developments of recent years **The Annual of Psychoanalysis, V. 18** Jerome A. Winer, 2014-05-12 A highlight of Volume 18 is two developmental studies that attempt to situate psychoanalysis within the landscape of contemporary science R Galatzer Levy and B Cohler's examination of the developmental psychology of the self and F Levin's consideration of psychological development and the changing organization of the Brain Clinical studies focus on analytic stalemate J G Maguire the dream screen transference D Edelstein and varieties of therapeutic alliance B Brandchaft and R Stolorow **Psychoanalysis and the Nuclear Threat** Howard B Levine, Daniel Jacobs, Lowell J. Rubin, 2013-05-13 The

analytic literature has heretofore been silent about the issues inherent in the nuclear threat As a groundbreaking exploration of new psychological terrain Psychoanalysis and the Nuclear Threat will function as a source book for what it is hoped will be the continuing effort of analysts and other mental health professionals to explore and engage in depth nuclear issues This volume provides panoramic coverage of the dynamic and clinical considerations that follow from life in the nuclear age Of special interest are chapters delving with the developmental consequences of the nuclear threat in childhood adolescence and adulthood and those exploring the technical issues raised by the occurrence in analytic and psychotherapeutic hours of material related to the nuclear threat Additional chapters bring a psychoanalytic perspective to bear on such issues as the need to have enemies silence as the real crime love work and survival in the nuclear age the relationship of the nuclear threat to issues of mourning and melancholia apocalyptic fantasies the paranoid process considerations of the possible impact of gender on the nuclear threat and the application of psychoanalytic thinking to nuclear arms strategy Finally the volume includes the first case report in the English language albeit a brief psychotherapy involving the treatment of a Hiroshima survivor A noteworthy event in psychoanalytic publishing Psychoanalysis and the Nuclear Threat betokens analytic engagement with the most pressing political and moral issue of our time a cultivating of Freud's soft voice of the intellect in an area where it is desperately needed

Psychoanalytic Terms and Concepts Elizabeth L. Auchincloss, Eslee Samberg, American Psychoanalytic Association, 2012-10-30 This is the first revised expanded and updated edition of Psychoanalytic Terms and Concepts since its third edition in 1990 It presents a scholarly exposition of English language psychoanalytic terms and concepts including those from all contemporary schools of theory and practice Each entry starts with a brief definition that is followed by an explanation of the significance of the term concept for psychoanalysis its historical development and the present day controversies about best usage
