Selected Walks 1979 1996:

Selected Walks 1979-1996 Richard Long, 1999 Art Poetry SELECTED WALKS is the most recent of Richard Long's artist books and marks a return to the radical simplicity of earlier works Long is an internationally renowned artist whose work explores the landscape and the landscape tradition This book takes an innovative approach to Long's use of text a constant in his work This book was co published with Centre for Artist Books based in new Dundee Contemporary Art Centre which exhibited a selection of Long's books in Autumn of 1999 This paperback chapbook is bound in pulpboard **The Art of Richard Long** William Malpas, 2007 A critical study of the work of British artist Richard Long *Open Systems* Johanna Burton, Mark Godfrey, Boris Grois, 2005-09 Published on the occasion of the exhibition Open systems rethinking art c 1970 Tate Modern London 1 June 29 August 2005 International Who's Who in Poetry 2004 Europa Publications, 2003 Provides up to date profiles on the careers of leading and emerging poets **C Magazine**, 2001 *Walking Each Other Home* Jean Denton, 2021-11-16 Dementia changes everything and not just for the person who receives the diagnosis Each of the 56 million Americans with dementia has one or more caregivers struggling to make meaning while watching their loved one's personality vanish The caregiver is sure to be changed not only by the myriad tasks and responsibilities but by the soul searching questions Dare I hope Who's to blame What do I do with my anger Where's God in this These questions of doubt guilt intimacy depression and acceptance are ultimately questions of spirit This book is distinctive it directly addresses the spiritual needs of the caregiver It invites the reader to explore his or her own spiritual journey rather than offering pre determined answers Appropriate both for people with faith and people without religion it encourages dementia caregivers to probe their spiritual questions along with a sympathetic author one who walked her husband through early onset Alzheimer's disease *Random Walks on Infinite Graphs and Groups* Wolfgang Woess, 2000-02-13 The main theme of this book is the interplay between the behaviour of a class of stochastic processes random walks and discrete structure theory The author considers Markov chains whose state space is equipped with the structure of an infinite locally finite graph or as a particular case of a finitely generated group The transition probabilities are assumed to be adapted to the underlying structure in some way that must be specified precisely in each case From the probabilistic viewpoint the question is what impact the particular type of structure has on various aspects of the behaviour of the random walk Vice versa random walks may also be seen as useful tools for classifying or at least describing the structure of graphs and groups Links with spectral theory and discrete potential theory are also discussed This book will be essential reading for all researchers working in stochastic process and related topics **Living with Herds** Natasha Fijn, 2011-04-11 Domestic animals have lived with humans for thousands of years and remain essential to the everyday lives of people throughout the world In this book Natasha Fijn examines the process of animal domestication in a study that blends biological and social anthropology ethology and ethnography She examines the social behavior of humans and animals in a contemporary Mongolian herding society After living with

Mongolian herding families Dr Fijn has observed through firsthand experience both sides of the human animal relationship Examining their reciprocal social behavior and communication with one another she demonstrates how herd animals influence Mongolian herders lives and how the animals themselves are active partners in the domestication process
