Selecting An Ada Environment:

Selecting an Ada Environment T. G. Lyons, J. C. D. Nissen, 1986-07-24 This book is a guide to the selection of an Ada Programming Support Environment and can also be used for the specification of such an environment Most of the features of an environment are not programming language specific and so the guide will also be applicable to users of languages other than Ada The guide assumes that an environment will support all phases of a project not just programming It has been written from the point of view of a potential user wishing to select in environment and provides questions to ask about the environment under consideration The guide does not attempt to specify absolute requirements but rather indicate possible requirements together with advantages and disadvantages which will need to be balanced by the reader according to his particular circumstances Resources in Ada ,1990 **Selected Water Resources Abstracts** ,1990-10 **Distributed**

User-Centred Requirements for Software Engineering Environments David J. Gilmore, Russel L. Winder, Francoise Detienne, 2013-06-29 The idea for this workshop originated when I came across and read Martin Zelkowitz's book on Requirements for Software Engineering Environments the proceedings of a small workshop held at the University of

Maryland in 1986 Although stimulated by the book I was also disappointed in that it didn't adequately address two important questions Whose requirements are these and Will the environment which meets all these requirements be usable by software engineers And thus was the decision made to organise this workshop which would explicitly address these two questions As time went by setting things up it became clear that our workshop would happen more than five years after the Maryland workshop and thus at the same time as addressing the two questions above this workshop would attempt to update the Zelkowitz approach Hence the workshop acquired two halves one dominated by discussion of what we already know about usability problems in software engineering and the other by discussion of existing solutions technical and otherwise to these problems This scheme also provided a good format for bringing together those in the HCI community concerned with the human factors of software engineering and those building tools to solve acknowledged but rarely understood problems
