Monthly Bulletin of the Public Library of the District of Columbia District of Columbia. Public Library, 1913
Who's who in America ,1924 **Monthly Bulletin of the Public Library of the District of Columbia** ,1913
Bulletin ,1912 **The Kappa Alpha Journal** ,1919 Multilevel Selection and the Theory of Evolution Ciprian Jeler, 2018-06-07 This book puts multilevel selection theory into a much needed historical perspective This is achieved by discussing multilevel selection in the first half of the twentieth century the reasons for the energetic rejection of Wynne Edwards group selectionist stance in the 1960s Elisabeth Lloyd s contribution to the units of selection debate Price s hierarchical equation and its possible interpretations and finally species selection in macroevolutionary contexts Another idea also seems to emerge from these studies namely that perhaps a more sure footed position for multilevel selection theory would be acquired if we were to show a renewed interest in old group selection i e in scenarios in which the differential reproduction of the groups themselves affects the frequencies of either individual level or group level traits This book will be of interest to philosophers and historians of biology as well as to theoretically inclined biologists who have an interest in multilevel selection theory **Catalog of Copyright Entries** Library of Congress. Copyright Office, 1912 Bulletin of the Ohio State Library Ohio State Library, 1910 **Index-catalogue of the Library of the Surgeon-General's Office, United States Army** National Library of Medicine (U.S.), 1925 **Bulletin ...** Ohio State Library, 1911 **Imagine There's No Heaven** Mitchell Stephens, 2014-02-25 The historical achievements of religious belief have been large and well chronicled But what about the accomplishments of those who have challenged religion Traveling from classical Greece to twenty first century America Imagine There s No Heaven explores the role of disbelief in shaping Western civilization At each juncture common themes emerge by questioning the role of gods in the heavens or the role of a God in creating man on earth nonbelievers help move science forward By challenging the divine right of monarchs and the strictures of holy books nonbelievers including Jean Jacques Rousseau and Denis Diderot help expand human liberties and influence the early founding of the United States Revolutions in science in politics in philosophy in art and in psychology have been led on multiple occasions by those who are free of the constraints of religious life Mitchell Stephens tells the often courageous tales of history s most important atheists like Denis Diderot and Salman Rushdie Stephens makes a strong and original case for their importance not only to today s New Atheist movement but to the way many of us believers and nonbelievers now think and live *Darwin and the Making of Sexual Selection* Evelleen Richards, 2017-04-27 Darwin s concept of natural selection has been exhaustively studied but his secondary evolutionary principle of sexual selection remains largely unexplored and misunderstood Yet sexual selection was of great strategic importance to Darwin because it explained things that natural selection could not and offered a naturalistic as opposed to divine account of beauty and its perception Only now with Darwin and the Making of Sexual Selection do we have a comprehensive and meticulously researched account of Darwin s path to its

formulation one that shows the man rather than the myth and examines both the social and intellectual roots of Darwin's theory. Drawing on the minutiae of his unpublished notes, annotations in his personal library and his extensive correspondence, Evelleen Richards offers a richly detailed, multilayered history. Her fine-grained analysis comprehends the extraordinarily wide range of Darwin's sources and disentangles the complexity of theory, practice and analogy that went into the making of sexual selection. Richards deftly explores the narrative strands of this history and vividly brings to life the chief characters involved. A true milestone in the history of science, *Darwin and the Making of Sexual Selection* illuminates the social and cultural contingencies of the shaping of an important if controversial biological concept that is back in play in current evolutionary theory. *Quarterly Bulletin* Berkshire Athenaeum and Museum, 1918. Comparative Psychology Gary Greenberg, Maury M. Haraway, 1998. This volume traces the modern critical and performance history of this play, one of Shakespeare's most loved and most performed comedies.
