Contract Law in Electronic Commerce Ralf Holthöfer, 2001-01-31 Inhaltsangabe Abstract This paper was written during my studies at Georgia State University Atlanta in Fall 2000 in the context of an exchange program between Georgia State University and Technische Universität Darmstadt Its subject is the new contract law in electronic commerce The paper starts with an illustration of the situation of legal uncertainty prior to the establishment of a specific contract law in electronic commerce Many laws governing contract formation were drafted before the existence of electronic messaging and did not adequately address the challenges of electronic transactions Furthermore electronic transactions were often hindered by the diversity of state laws This situation was considered to place some severe legal obstacles to the development of electronic commerce In 1997 President Clinton and Vice President Gore unveiled their Framework for Global Electronic Commerce This issue defined the main goals for the future development of both domestic and global electronic commerce The general objective was to establish a Uniform Commercial Code for this ascending sector of commerce in order to facilitate and enforce electronic transactions The legislative efforts to achieve those goals recently resulted in two uniform acts the Uniform Computer Information Transactions Act UCITA and the Uniform Electronic Transactions Act UETA and the federal Electronic Signatures in Global and National Commerce Act E sign Act The paper deals with these new legislative approaches Aside from the presentation of the scopes of the different acts the paper focuses on their fundamental principles and major provisions Furthermore it discusses the new enactments in the context of a selection of fundamental legal issues raised by electronic commerce This discussion finally shows that although there have been a number of serious endeavors to achieve the above mentioned goals by drafting several electronic commerce statutes the recent enactments relating to contract law in electronic commerce are not able to achieve the goals set out in the Framework for Global Electronic Commerce There still remain significant legal obstacles that prohibit electronic commerce from reaching its full potential Zusammenfassung Diese Arbeit wurde während meines Studienaufenthaltes an der Georgia State University Atlanta im Herbstsemester 2000 im Rahmen eines Austauschprogramms zwischen der Georgia State University und der Technischen

David Slawson, 1996-07-08 During its classical period American contract law had three prominent characteristics nearly unlimited freedom to choose the contents of a contract a clear separation from the law of tort the law

of civil wrongs and the power to make contracts without regard to the other party's ability to understand them. Combining incisive historical analysis with a keen sense of judicial politics, W. David Slawson shows how judges brought the classical period to an end about 1960 with a period of reform that continues to this day. American contract law no longer possesses any of the prominent characteristics of its classical period. For instance, courts now refuse to enforce standard contracts according to their terms; they implement the consumer's reasonable expectations instead. Businesses can no longer count on making the contracts they want. Laws for certain industries or for businesses generally set many business obligations regardless of what the contracts say. A person who knowingly breaches a contract and then tries to avoid liability is subject to heavy penalties. As Slawson demonstrates, judges accomplished all these reforms, although with some help from scholars. Legislation contributed very little despite its presence in massive amounts and despite the efforts of modern institutions of law reform such as the Conference of Commissioners on Uniform State Laws. Slawson argues persuasively that this comparison demonstrates the superiority of judge-made law to legislation for reforming private law of any kind.

The Involvement of EU Law in Private Law Relationships Dorota Leczykiewicz, Stephen Weatherill, 2013-03-12

The involvement of the EU in regulating private conduct and relationships between individuals is increasing. As a result, EU law affects the scope of private autonomy in ever wider contexts, sparking tensions with fundamental concepts of national private law systems. This volume offers a descriptive and normative account of the involvement of EU law in private law relationships. The recurring theme in the collected papers is the scope of policy objectives which are apt to legitimise the European Union's as yet unsystematic tendency to serve as a source of restrictions of private autonomy. The nature and purpose of the involvement of European Union law in private law relationships is investigated by the authors from both the substantive and the constitutional perspective. The papers look at such sectors regulating private law relationships as consumer law, labour law, competition law, equal treatment law, and the law of remedies. While focusing on private law relationships, the authors investigate more general concepts of EU law such as the Internal Market freedoms and general principles of law and the different modes of ensuring the effective application of EU secondary law.
