## **Self And Its Body In Hegels Phenomenology Of Spirit:**

**The Self and Its Body in Hegel's Phenomenology of Spirit** John Russon, 2001-01-01 A major criticism of Hegel's philosophy is that it fails to comprehend the experience of the body. In this book John Russon shows that there is in fact a philosophy of embodiment implicit in Hegel's *Phenomenology of Spirit*. Russon argues that Hegel has not only taken account of the body but has done so in a way that integrates both modern work on embodiment and the approach to the body found in ancient Greek philosophy. Although Russon approaches Hegel's *Phenomenology* from a contemporary standpoint, he places both this standpoint and Hegel's work within a classical tradition. Using the Aristotelian terms of nature and habit, Russon refers to the classical distinction between biological nature and a cultural second nature. It is this second nature that constitutes, in Russon's reading of Hegel, the true embodiment of human intersubjectivity. The development of spirit as mapped out by Hegel is interpreted here as a process by which the self establishes for itself an embodiment in a set of social and political institutions in which it can recognize and satisfy its rational needs. Russon concludes by arguing that self-expression and self-interpretation are the ultimate needs of the human spirit and that it is the degree to which these needs are satisfied that is the ultimate measure of the adequacy of the institutions that embody human life. This link with classicism in itself a serious contribution to the history of philosophy provides an excellent point of access into the Hegelian system. Russon's work, which will prove interesting reading for any Hegel scholar, provides a solid and reliable introduction to the study of Hegel.

**Reading Hegel's Phenomenology** John Russon, 2004-10-19 In *Reading Hegel's Phenomenology* John Russon uses the theme of reading to clarify the methods, premises, evidence, reasoning, and conclusions developed in Hegel's seminal text. Russon's approach facilitates comparing major sections and movements of the text and demonstrates that each section of *Phenomenology of Spirit* stands independently in its focus on the themes of human experience. Along the way, Russon considers the rich relevance of Hegel's philosophy to understanding other key Western philosophers such as Aristotle, Descartes, Kant, Husserl, Heidegger, and Derrida. Major themes include language, embodiment, desire, conscience, forgiveness, skepticism, law, ritual, multiculturalism, existentialism, deconstruction, and absolute knowing. An important companion to contemporary Hegel studies, this book will be of interest to all students of Hegel's philosophy.

**The Unconscious Abyss** Jon Mills, 2012-02-01 Offering the first comprehensive examination of Hegel's theory of the unconscious abyss, Jon Mills rectifies a much neglected area of Hegel scholarship. Mills shows that the unconscious is the foundation for conscious and self-conscious life and is responsible for the normative and pathological forces that fuel psychic development. In addition, Mills illustrates how Hegel's idea of the unconscious abyss transcends his time and is a pivotal concept to his entire philosophical system, one that advances the current understanding of the psychoanalytic mind.

**The Severed Self** Michael Nathan Steinmetz, 2021-09-07 The concept of sin permeates Søren Kierkegaard's writing. This study looks at the entirety of his works in order to systematize his doctrine of sin. It demonstrates four key aspects: sin as misrelation, sin as untruth, sin as an

existence state and sin as redoubling in the crowd Upon categorizing Kierkegaard's doctrine of sin his writings are examined to determine if his hamartiology is consistent across his numerous pseudonyms To conclude the study places Kierkegaard's doctrine of sin within the broader theological discussion

Drake, 2016-12-05 Violence is virtually synonymous in the popular imagination with the period of the Later Roman Empire a time when waves of barbarian invaders combined with urban mobs and religious zealots to bring an end to centuries of peace and serenity All of these images come together in the Visigothic sack of the city of Rome in A D 410

**The Nature of the Self** Paul Gulian Cobben, 2009-08-17 In the contemporary practical philosophy recognition is one of the central concepts Humans are

thematized as individuals who recognize one another as moral and legal persons The central problem of the globalized multicultural societies is how to harmonize the legal persons who are free and equal with moral persons who may have their unique identity In *The Nature of the Self* the thesis is elaborated that in the contemporary discussion a central dimension of recognition is lacking All forms of moral and legal recognition presuppose the recognition at a more fundamental level the recognition of the body by the mind The systematic development of this relation can be performed with the help of a critical reconstruction of Hegel's project in the *Phenomenology of Spirit* and the *Philosophy of Right* This reconstruction results in a differentiated concept of the self in three forms of the self corresponding with three forms of recognition and their institutional embodiment This concept of the self not only competes with the position of Jürgen Habermas and Axel Honneth as it is explicitly elaborated but also with the one of John Rawls
