

2023 Clinical Radiology ST1 Self-Assessment

Guidance

As part of your application for Clinical Radiology ST1, you will be required to complete a self-assessment along with submitting supporting evidence to justify the score you choose.

You select the most appropriate option from the below 8 domains. You should use your discretion to choose the descriptor that best fits your own personal experience and achievements. All achievements should be dated after the commencement of your first relevant undergraduate degree, and in any case, within the last 10 years.

Scoring

For each domain, select one of the scores available. These scores are non-summative (i.e. if you match more than one descriptor within a domain, you cannot claim multiple). If you meet the requirements for more than one score, select the single highest which applies.

If an achievement legitimately may fit under multiple domains, it is valid to claim in both categories (for example, academic work which was presented orally then subsequently published).

Scores are final when the form is submitted; this means they cannot be edited in the event of a mistake, or an additional achievement completed after the deadline.

Completed Achievements Only

This self-assessment must be accurate at the time of submission. You should not include any achievement which is not fully completed, e.g. a degree which has not yet been awarded. Publications may be included if they are accepted by the journal, passed peer review, but remain "in press" or "pre-print". In this case evidence should include the acceptance letter from the relevant Editor. Presentations are only valid once actually given.

Over-claiming

You should be honest with your evaluation and not attempt to gain unfair advantage by exaggerating or misrepresenting achievements. If this is identified, it would represent a probity matter and could lead to outright rejection of your application, and in extreme cases, fitness to practice proceedings.

Scores are reviewed and, based on your evidence, can be revised up or down.

Please note, additional undergraduate degrees have been removed from scoring this year according to national policy for all medical and dental specialist recruitment.
