Self Deception Studies In Philosophical Psychology:

Self-deception (Studies in philosophical psychology). Herbert Fingarette, **Self-Deception** Herbert Fingarette, 2000-02-23 How can one deceive oneself if the very idea of deception implies that the deceiver knows the truth The resolution of this paradox leads Fingarette to fundamental insights into the mind at work He questions our basic ideas of self and the unconscious personal responsibility and our ethical categories of guilt and innocence Fingarette applies these ideas to the philosophies of Sartre and Kierkegaard as well as to Freud's psychoanalytic theories and to contemporary research into neurosurgery *Self-deception* Joan S. Lockard, Delroy L. Paulhus, 1988 *Perspectives on Self-Deception* Brian P. McLaughlin, 1988-09 Students of philosophy psychology sociology and literature will welcome this collection of original essays on self deception and related phenomena such as wishful thinking bad faith and false consciousness The book has six sections each exploring self deception and related phenomena from a different perspective *Self-deception and Morality* Mike W. Martin, 1986 This book systematically explores the moral issues surrounding self deception While many articles and books have been written on the concept of self deception in recent years Martin's gives much greater emphasis to self deception as a significant topic for both ethical theory and applied ethics Self deception is perplexing from a moral point of view It seems tailor made to camouflage and foster immorality Does all self deception involve some guilt and is it among the most abhorrent evils as some moralists and theologians have charged Or is it only wrong sometimes such as when it has bad consequences Could it on occasion be permissible or even desirable to deceive ourselves just as we are sometimes justified in deceiving other people Are self deceivers perhaps more like innocent victims than perpetrators of deceit and as such deserving of compassion and help Or paradoxically are they best viewed with ambivalence culpable as deceivers and simultaneously innocent as victims of deception from the introduction Martin develops a conception of self deception as the purposeful evasion of acknowledging to oneself truths or one's view of truth He details a systematic framework for understanding the main moral perspectives and traditions concerning self deception that have emerged in western philosophy In so doing he clarifies related concepts like sincerity authenticity honesty hypocrisy weakness of will and self understanding Ranging across traditions both philosophical Kant Kierkegaard and Sartre and non philosophical Freud Eugene O'Neill and Henrik Ibsen Martin shows why self deception is as morally complex as any other major form of behavior The appeal of this book is broad The volume will challenge professional philosophers and psychologists yet it is organized and written to be accessible to students in courses on ethics philosophy of mind and philosophy of literature Martin's numerous literary examples should also interest literary critics **Self-deception and the Common Life** Lloyd H. Steffen, 1986 Self Deception and the Common Life investigates the topic of self deception from three points of view philosophical psychology ethics and theology Empirical evidence and an ordinary language analysis support the case that the linguistic expression self deception is literally meaningful and that the language of the common life can be trusted After

critically analyzing the cognition translation and action accounts along with the contributions of Freud and Sartre Steffen proposes a new synthetic emotional perception account one that avoids paradox Giving attention to relevant moral issues he argues that self deception is not immoral but represents a peculiar form of akrasia Finally because theologians employ self deception to describe the cognitive component of sin Steffen considers the logic of theological self deception His study seeks an intimate acquaintance with self deception and exemplifies a method of analysis relevant to constructive theological inquiry

Self-Deception Eric Funkhouser,2019-06-03 Self deception poses longstanding and fascinating paradoxes Philosophers have questioned whether and how self deception is even possible evolutionary theorists have debated whether it is adaptive For Sigmund Freud self deception was a fundamental key to understanding the unconscious and from The Bible to The Great Gatsby literature abounds with characters renowned for their self deception But what exactly is self deception Why is it so puzzling How is it performed And is it harmful In this thorough and clearly written introduction to the philosophy and psychology of self deception Eric Funkhouser examines and assesses these questions and more Clarification of the conceptual background and Basic problem of self deception including Freud and Davidson and the important debate between intentionalists and motivationalists Deflationary accounts that appeal to cognitive and motivational biases with emphasis on how motives and emotions drive self deception Intentional self deception and the divided mind including the role of the unconscious in recent psychological research Challenges that self deception poses for philosophy of mind and psychology especially for our understanding of intention belief and deception Biology and moral psychology of self deception Is self deception functional or beneficial Are the self deceived to be held accountable Combining philosophical analysis with the latest psychological research and including features such as chapter summaries annotated recommended reading and a glossary Self Deception is an excellent resource for students of philosophy of mind and psychology moral psychology and ethics as well as those in related fields such as psychology and cognitive science *Cognitivity of Religion* J.

Kellenberger,1985-06-18 **Seeing through Self-Deception** Annette Barnes,1998-01-22 What is it to deceive someone And how is it possible to deceive oneself Does self deception require that people be taken in by a deceitful strategy that they know is deceitful The literature is divided between those who argue that self deception is intentional and those who argue that it is nonintentional In this study Annette Barnes offers a challenge to both the standard characterization of the deception of others and current characterizations of self deception examining the available explanations and exploring such questions as the self deceiver s false consciousness bias and the irrationality of self deception *Self-Deception's Puzzles and Processes* Jason Kido Lopez,2016-08-16 The contemporary literature on self deception was born out of Jean Paul Sartre s work on bad faith lying to oneself As time has progressed the conception of self deception has moved further and further away from Sartre s conception of bad faith In Self Deception s Puzzles and Processes A Return to a Sartrean View Jason Kido Lopez argues that this departure is a mistake and that we should return to thinking about self deception in a Sartrean fashion

in which we are self deceived when we intentionally use the strategies and methods of interpersonal deception on ourselves Since literally tricking ourselves cannot work we will always see through our own self deception after all self deception merely consists of the attempt to trick ourselves in this way Other scholars have rejected this notion of self deception historically dismissing it as paradoxical Lopez argues first that it isn't paradoxical and he further suggests that moving away from this notion of self deception has caused the contemporary literature on the topic to be littered with disparate and conflicting theories Indeed there are a great many ways to avoid the allegedly paradoxical Sartrean notion of self deception and the resulting plethora of accounts lead to a fragmented picture of self deception If however the Sartrean view isn't paradoxical then there was no need for the host of contradictory theories and most researchers on self deception have missed what was originally so intriguing about self deception that it like bad faith is the process of literally trying to trick oneself into believing what is false or unwarranted Self Deception's Puzzles and Processes will be of great interest to students and scholars of epistemology philosophy of mind psychology and continental philosophy and to anyone else interested in the problems of self deception

Relationship Morality James Kellenberger, 2010-11-01

The Presence of God and the Presence of Persons James Kellenberger, 2019-07-31 This book treats the presence of God and the presence of persons The experience of the presence of God is a well recognized religious experience in theistic traditions The experience of the presence of persons this book argues is an analogous moral experience As it is possible for individuals to come into the presence of God to have this phenomenal experience so it is possible for them to come into the presence of persons Kellenberger explores how coming into the presence of persons is structurally analogous with coming into the presence of God Providing a highly focused analysis of the two seemingly distinct concepts normally thought to fall under different subfields of philosophy the chapters carefully draw parallels between them Kellenberger then goes on to show how analogous to the death of God a loss of the consciousness of the reality of God and his presence is a death of persons felt as a loss of the sense of the inherent worth of persons and their presence This volume finishes with an examination of the concrete moral and religious ethical implications of coming into the presence of persons and in particular the implications of coming into the presence of all persons

Self-deception and Self-understanding Mike W. Martin, 1985

Intuition, Imagination, and Philosophical Methodology Tamar Szabó Gendler, 2013-07-18 Tamar Gendler draws together in this book a series of essays in which she investigates philosophical methodology which is now emerging as a central topic of philosophical discussions Three intertwined themes run through the volume imagination intuition and philosophical methodology Each of the chapters focuses in one way or another on how we engage with subject matter that we take to be imaginary This theme is explored in a wide range of cases including scientific thought experiments early childhood pretense thought experiments concerning personal identity fictional emotions self deception Gettier cases and the general relation of conceivability to possibility Each of the chapters explores in one way or another the implications of this for how thought

experiments and appeals to intuition can serve as mechanisms for supporting or refuting scientific or philosophical claims And each of the chapters self consciously exhibits a particular philosophical methodology that of drawing both on empirical findings from contemporary psychology and on classic texts in the philosophical tradition particularly the work of Aristotle and Hume By exploring and exhibiting the fruitfulness of these interactions Gendler promotes the value of engaging in such cross disciplinary conversations in illuminating philosophical issues *Social Justice in Practice* Juha Räikkä,2014-07-08 In this book the practical dimension of social justice is explained using the analysis and discussion of a variety of well known topics These include the relation between theory and practice in normative political philosophy the issue of justice under uncertainty the question of whether we can and should unmask social injustices by means of conspiracy theories the issues of privacy and the right to privacy the issue of how certain psychological states may affect our moral obligations in particular the obligation to treat others fairly and finally the concepts of morality fairness and self deception The primary goal of the book is to provide readers with an updated discussion of some important and practical social justice issues These issues are presented from a new perspective based on the author s research It is hoped that bringing these topics together in a single book will promote the emergence of new insights and challenges for future research Juha R ikk is a professor at the Department of Philosophy at the University of Turku Finland His research focuses on ethics and political philosophy

Religion as Make-Believe Neil Van Leeuwen,2023-11-21 Drawing on a range of hard evidence Neil Van Leeuwen shows that the psychological mechanisms underlying religious belief are the same as those enabling imaginative play He argues that we should therefore understand religious belief as a form of make believe that people use to define their group identity and express the values sacred to them Advances in Experimental Philosophy of Action Paul Henne,Samuel

Murray,2023-04-20 What is self control Does a person need to be conscious to act Are delusions always irrational Questions such as these are fundamental for investigations into action and rationality as well as how we assign responsibility for wrongdoing and assess clinical symptoms Bridging the gap between philosophy and psychology this interdisciplinary collection showcases how empirical research informs and enriches core questions in the philosophy of action Exploring issues such as truth moral judgement agency consciousness and cognitive control chapters offer an overview of the current state of research present new empirical findings and identify where future experimental work can further advance the frontier between philosophy and psychology This is an essential resource for anyone looking to better understand how science and philosophy can meaningfully inform our knowledge of human agency Self and Deception Roger T. Ames,Wimal Dissanayake,1996-07-03 This volume contains essays by a range of distinguished philosophers on the problem of self deception or rather self and deception The work proceeds from the assumption that changing constructions of self within Western cultures and alternative notions of self in other cultures requires that we rethink traditional strategies for explaining the phenomenon of self deception The concept of self is central to any sustained inquiry into self deception the pertinent

issue being what sort of self is victim or beneficiary of self deception Several of the authors here base their thinking on the model of other deception and include discussion of the notions of double selves multiple selves and subsystems of the self to address this troubling problem Other authors argue that other deception is not an adequate or reliable model to guide our thinking on this issue The psychological and moral dimensions of self deception generate a rich discussion as do its epistemic implications The concept of emotionality also receives sustained attention **Disturbed Consciousness** Rocco J.

Gennaro,2024-05-28 Essays defend discuss and critique specific theories of consciousness with respect to various psychopathologies In *Disturbed Consciousness* philosophers and other scholars examine various psychopathologies in light of specific philosophical theories of consciousness The contributing authors some of them discussing or defending their own theoretical work consider not only how a theory of consciousness can account for a specific psychopathological condition but also how the characteristics of a psychopathology might challenge such a theory Thus one essay defends the higher order thought HOT theory of consciousness against the charge that it cannot account for somatoparaphrenia a delusion in which one denies ownership of a limb Another essay argues that various attempts to explain away such anomalies within subjective theories of consciousness fail Other essays consider such topics as the application of a model of unified consciousness to cases of brain bisection and dissociative identity disorder prefrontal and parietal underconnectivity in autism and other psychopathologies self deception and the self model theory of subjectivity schizophrenia and the vehicle theory of consciousness and a shift in emphasis away from an internal or brainbound approach to psychopathology to an interactive one Each essay offers a distinctive perspective from the intersection of philosophy consciousness research and psychiatry Contributors Alexandre Billon Andrew Brook Paula Droege Rocco J Gennaro Philip Gerrans William Hirstein Jakob Hohwy Uriah Kriegel Timothy Lane Thomas Metzinger Erik Myin Inez Myin Germeys Myrto Mylopoulos Gerard O'Brien Jon Opie J Kevin O'Regan Iuliia Pliushch Robert Van Gulick *Exploring Mormon Thought* Blake T. Ostler,2006-03-01 In volume 2 of the series *Exploring Mormon Thought* The Problems of Theism and the Love of God Blake Ostler explores issues related to soteriology or the theory of salvation He argues that the commitment that God loves us and respects our dignity as persons entails that God must leave us free to choose whether to have a saving relationship with him He explores the logic of love and argues that the LDS doctrine of a war in heaven embodies the commitment that God leaves us free to choose whether to enter into relationship with God He explores the nature of inter personal prayer and the contributions of LDS beliefs to a robust prayer dialogue He offers a view consistent with LDS commitments that makes sense out of asking God to assist others to alter the natural environment and to grow in relationship with God He then turns to the concept of grace and argues that the traditional views lead to insurmountable problems He argues that though God does not owe any obligation to us to give us grace God does so out of love However because divinity arises from loving relationships he argues that God could not fail to give sufficient grace to all persons and remain a loving God
