get more out of your life Spreading the Light Archie Crawford, 2004 This book is about life and is written in plain everyday language The author boldly faces up to those fundamental questions rankling at the back of one's mind such as Is there really a God Where is He What is the nature of the soul What is truth Is reincarnation true Is there any purpose in the universe Does God cause suffering Do angels exist Who am I Can effect become cause Does space and time really exist etc He probes deep into the structure of your mind and with great clarity shows you how your mind works and how you can use it to find success in everything you do He shows how we attract our present circumstances and how emotionally intense events are not only registered in our psychic memory but also in the memories of the cells of our body and what this means for us He devotes a chapter in which he advocates going within through meditation to find solutions to our problems Religion is examined with candor He explains the many positive benefits of religion examines its dark side and points out that like individuals some religions must resolve and get rid of the baggage of past evil deeds before they and their followers can step into the light The author shows how in spite of itself science through its quantum theories is currently making discoveries which lead to a new view of the universe more in line with that of the essence of the religions and the experiences of the mystics of this world He shows how science and religion are at last beginning to merge For example there is now scientific proof of the value of prayer proof that the mind is non local that is it is not located in the brain and also can cause actions over distance that there is no solid matter in the universe it is all energy in one form or another He further states that a field of energy outside the material universe has been discovered where speeds exceed that of light It has also been found that our human consciousness is directly connected with matter and influences at least its microscopic particles The nature of the universe as being holographic is explored These scientific findings have profound spiritual significance He quotes experts on the future of mankind including Arthur C Clark Nobel physicist Brian Josephson Stephen Hawking etc and many more Reading this book will prepare you for the new age that is fast enveloping the earth The author's message is that in spite of the terrorism and devastation of the earth currently going on there is powerful hope There are powerful spiritual forces at work which will overcome the present chaos and lead us into a life of enlightenment and eventually of love **Handbook of**

Counselling for Anxiety Problems Diana Sanders, Frank Wills, 2002-12-20

Any cognitive therapy text which quotes from Alice in Wonderland is off to a good start, and in the case of *Counselling for Anxiety Problems* it gets better and better. This is an excellent book written by counselling psychologists aimed primarily at counselling psychologists. Diana Sanders and Frank Wills are experienced cognitive therapists who through various books are performing a valuable role of building bridges between counsellors and the practice of cognitive therapists. In doing so they lay to rest many of the misconceptions counsellors may have about cognitive therapy, often based on an 80s version of the therapy, and place particular emphasis on the central importance of therapeutic relationship in cognitive therapy, as in counselling. Their review and discussion of the anxiety disorders is comprehensive and contemporary, as indicated by the number of references from the past five years. Furthermore, their clinical experience, as well as their humour, shines through. Although primarily aimed at the counselling market, it will be just as useful for therapists from a variety of backgrounds. I can thoroughly recommend this book.

Amazon Review: Anxiety is one of the most common psychological problems for which people seek help. Through research, major advances have been made in understanding the causes of anxiety, the different forms it takes, and how problems perpetuate. In turn, this has led to the development of more targeted ways of helping sufferers. Based on these findings, *Counselling for Anxiety Problems*, Second Edition, presents accessible and up-to-date guidelines on the most effective ways of helping clients with anxiety problems. The authors outline general methods of working with anxiety sufferers and highlight the issues specific to this client group. Counsellors need to select appropriate interventions depending on the particular problems experienced by each client. The second part of the book therefore shows how to adapt counselling interventions to different forms of anxiety, such as panic, worry, agoraphobia, social and other phobias, health anxiety, and obsessive compulsive disorder (OCD). Whilst being cognitive in focus, the book is accessible to counsellors from different orientations who wish to broaden their understanding and skills in relation to anxiety. Based on the authors' own clinical experience, the book makes extensive use of detailed case examples to illustrate different ways of formulating and working with anxiety. *Counselling for Anxiety Problems*, Second Edition, is suitable for practitioners of all levels, from those in training to those with more experience who wish to update and refresh their methods of working with anxious clients.
