**The Thin Woman** Helen Malson, 1998 In *The Thin Woman* Helen Malson aims to place gender in a position of central importance in the discussions surrounding anorexia She argues that anorexia is not just a medical issue should be viewed within a wider social political context

*Criminal Law Without Punishment* Valerij Zisman, 2023-09-05 How can criminal punishment be morally justified Zisman addresses this classical question in legal philosophy He provides two maybe surprising answers to the question First as for a methodological claim it argues that this question cannot be answered by philosophers and legal scholars alone Rather we need to take into account research from social psychology economy anthropology and so on in order to properly analyze the arguments in defense of criminal punishment Second the book argues that when such research is properly accounted for none of the current attempts to justify criminal punishment succeed But that does not imply that the state should do nothing about criminal wrongdoing Rather the arguments that were supposed to justify criminal punishment actually speak in favor of an alternative approach to criminal law restitution to the victim and restorative justice That is to say the state should coerce offenders to provide restitution for the harm inflicted on victims and whenever possible restorative approaches should be taken to address criminal wrongdoing

Self-Injury Robin E. Connors, 2008 In this perceptive work Dr Robin Connors offers helpful guidelines to clinicians that will improve their capacity to respond in a direct effective and respectful way to people who self injure Key to this work is understanding the function of self inflicted violence and its relationship to unresolved traumas and losses including the role of trauma in disrupting the formation of the self boundary Dr Connors identifies fundamental therapeutic tasks gives clear examples of interventions and offers concrete recommendations for interacting with patients

about their self injury      *Embodying Punishment* Anastasia Chamberlen, 2018-10-05 *Embodying Punishment* offers a theoretical and empirical exploration of women's lived experiences of imprisonment in England. It puts forward a feminist critique of the prison arguing that prisoner bodies are central to our understanding of modern punishment and particularly of women's survival and resistance during and after prison. Drawing on a feminist phenomenological framework informed by a serious engagement with scholars such as Maurice Merleau-Ponty, Simone de Beauvoir, Erwin Goffman, Michel Foucault, Sandra Lee Bartky, and Tori Moi, *Embodying Punishment* revisits and expands the literature on the pains of imprisonment and offers an interdisciplinary examination of the embodiment and identities of prisoners and former prisoners, pressing the need for a body-aware approach to criminology and penology. The book develops this argument through a qualitative study with prisoners and former prisoners discussing themes such as the perception of the prison through time, space, smells, and sounds; the change of prisoner bodies; the presentation of self in and after prison, including the centrality of appearance and prison dress in the management of prisoner and ex-prisoner identities; and a range of coping strategies adopted during and after imprisonment, including prison food, drug misuse, and a case study on women's self-injuring practices. *Embodying Punishment* brings to the fore and critically analyses longstanding and urgent problems surrounding women's multifaceted oppression through imprisonment, including matters of discriminatory and gendered treatment, as well as issues around penal harm, and argues for an experientially grounded critique of punishment.

*Handbook of the Psychology of Self-Forgiveness* Lydia Woodyatt, Everett L. Worthington, Jr., Michael Wenzel, Brandon J. Griffin, 2017-09-07 The present volume is a ground-breaking and agenda-setting investigation of the psychology of self-forgiveness. It brings together the work of expert clinicians and researchers working within the field to address questions such as: Why is self-forgiveness so difficult? What contexts and psychological experiences give rise to the need for self-forgiveness? What approaches can therapists use to help people process difficult experiences that elicit guilt, shame, and self-condemnation? How can people work through their own failures and transgressions? Assembling current theories and findings, this unique resource reviews and advances our understanding of self-forgiveness and its potentially critical function in interpersonal relationships and individual emotional and physical health. The editors begin by exploring the nature of self-forgiveness. They consider its processes, causes, and effects, how it may be measured, and its potential benefits to theory and psychotherapy. Expert clinicians and researchers then examine self-forgiveness in its many facets: as a response to guilt and shame; a step toward processing transgressions; a means of reducing anxiety; and an essential component of, or under some circumstances, a barrier to psychotherapeutic intervention. Contributors also address self-forgiveness as applied to diverse psychosocial contexts, such as addiction and recovery, couples and families, healthy aging, the workplace, and the military. Among the topics in the *Handbook*: An evolutionary approach to shame-based self-criticism; self-forgiveness and compassion; Working through psychological needs following transgressions to arrive at self-forgiveness; Self-forgiveness and health: a stress and coping model; Self-forgiveness and personal and relational well-being; Self-

directed intervention to promote self forgiveness Understanding the role of forgiving the self in the act of hurting oneself The Handbook of the Psychology of Self Forgiveness serves many healing professionals It covers a wide range of problems for which individuals often seek help from counselors clergy social workers psychologists and physicians Research psychologists philosophers and sociologists studying self forgiveness will also find it an essential handbook that draws together the advances made over the past several decades and identifies important directions for the road ahead

**The Conception of Punishment in Early Indian Literature** Terence Day, 2006-01-01 Early textual source of the vast body of Dharmasastra literature of India on religion law and morality contain numerous statements that present or imply an undefined conception of punishment Yet nowhere is this conception formally defined as if knowledge of its nature and structure were generally known In this first ever attempt to provide a definition of the conception and to recover its ideational infrastructure the author has drawn on these sources to reconstruct the theoretical backgrounds of its distinctive metaphysical religious juridical social and moral components He shows that the conception is the totality of correction principles powers agents processes and operations through which acts contrary to the Universal Order are counteracted and compensated The volume contains extensive documentation a glossary of Sanskrit terms a selected bibliography and an index

Narcissism and the Self R. Behrendt, 2015-02-03 The book examines how coevolved intraspecific aggression and appeasement gestures can give rise to complex social cultural and psychopathological phenomena It argues that the individual's need regulate narcissistic supplies and maintain feelings of safety is the overriding determinant of human conduct and thought in mental health and illness

*Remorse, Penal Theory and Sentencing* Hannah Maslen, 2015-04-30 This monograph addresses a contested but under discussed question in the field of criminal sentencing should an offender's remorse affect the sentence he or she receives Answering this question involves tackling a series of others is it possible to justify mitigation for remorse within a retributive sentencing framework Precisely how should remorse enter into the sentencing equation How should the mitigating weight of remorse interact with other

aggravating and mitigating factors Are there some offence or offender characteristics that preclude remorse based mitigation Remorse is recognised as a legitimate mitigating factor in many sentencing regimes around the world with powerful effects on sentence severity Although there has been some discussion of whether this practice can be justified within the literature on sentencing and penal theory this monograph provides the first comprehensive and in depth study of possible theoretical justifications Whilst the emphasis here is on theoretical justification the monograph also offers analysis of how normative conclusions would play out in the broader context of sentencing decisions and the guidance intended to structure them The conclusions reached have relevance for sentencing systems around the world

**Making Amends** Linda Radzik,2009-02-02 Can wrongs be righted Can we make up for our misdeeds or does the impossibility of changing the past mean that we remain permanently guilty While atonement is traditionally considered a theological topic Making Amends uses the resources of secular moral philosophy to explore the possibility of correcting the wrongs we do to one another Philosophers generally approach the problem of past wrongdoing from the point of view of either a judge or a victim They assume that wrongdoing

can only be resolved through punishment or forgiveness But this book explores the responses that wrongdoers can and should make to their own misdeeds responses such as apology repentance reparations and self punishment Making Amends explores the possibility of atonement in a broad spectrum of contexts from cases of relatively minor wrongs in personal relationships to crimes to the historical injustices of our political and religious communities It argues that wrongdoers often have the ability to earn redemption within the moral community Making Amends defends a theory of atonement that emphasizes the rebuilding of respect and trust among victims communities and wrongdoers The ideal of reconciliation enables us to explain the value of repentance without restricting our interest to the wrongdoer s character to account for the power of reparations without placing a dollar value on dignity to justify the suffering of guilt without falling into a simplistic endorsement of retribution and to insist on the moral responsibility of wrongdoing groups without treating their members unfairly

**Law as Punishment / Law as Regulation** Austin Sarat, Lawrence Douglas, 2011-08-29 This book considers the problem of law s physical control of persons and it illuminates competing visions of the law as both a tool of regulation and as an instrument of coercion or punishment

**A Therapist's Handbook to Dissolve Shame and Defense** Susan Warren Warshaw, 2022-01-17 The effort to surmount shame and formidable defenses in psychotherapy can trigger shame and self doubt in therapists Susan Warren Warshaw offers a user friendly guide to help therapists move past common treatment barriers This unique book avoids jargon and breaks down complex concepts into digestible elements for practical application The core principles of Dynamic Emotional Focused Therapy DEFT a comprehensive treatment approach for demonstrable change are illustrated with rich and abundant clinical vignettes This engaging often lyrical handbook emphasizes shame sensitivity to create the safety necessary to achieve profound interpersonal connection Often overlooked in treatment shame can undermine the entire process The author explains the therapeutic transfer of compassion for self a relational phenomenon that purposefully generates affective expression She introduces a three step robust framework The Healing Triad to orient therapists to intervene effectively when the winds of resistance arise Chapters clarify Why we focus on feelings How to identify and move beyond shame and anxiety How to transform toxic guilt into reparative actions How to disarm defenses while avoiding ruptures This book is essential reading for both advanced and newly practicing mental health practitioners striving to access the profound emotions in their clients for transformative change

**Self-Preservation at the Center of Personality** Ralf-Peter Behrendt, 2016-10-01 The book discusses personality as a unified set of evolved and culturally developed structures that serves a single and definable purpose to maintain the individual s safety in the context of dyadic relationships group processes and more abstract and fluid social configurations The infant mother relationship remains the blueprint for modes of relating to the social surround at whatever level of complexity and for approximating the sense of safety originally provided by the mother The personality is organized around the need to maintain self esteem thereby preserving the individual s sense of safety and warding off deep seated paranoid anxiety which signals the potential

of annihilation of the self Paranoid anxiety is the counterpart of intraspecific aggression and the potential of the group as a whole to attack and annihilate the individual Paranoid anxiety which was recognized by Melanie Klein as playing a critical role in infant development is not overcome as development proceeds but remains latent buried under layers of personality organization that are essentially concerned with sourcing recognition and approval from the social environment thereby inhibiting others aggression and guarding against annihilation of the self The book adds to self psychology Kohut by showing how the principle of self preservation underpins all aspects of normal and abnormal character dynamics It integrates self psychology with other branches psychoanalytic theory and revives the link between psychoanalysis and ethology Ethology Lorenz Hass Eibl Eibesfeldt has provided insights into how interrelated intraspecific aggression and appeasement gestures are critically important for the evolution of social behavior in higher animals as well as for cultural evolution in humans insights that allow more generally for a bridging of the gap between psychoanalysis and the biology of social behavior Furthermore an evolutionary approach to character dynamics and related social phenomena will have important implications for understanding psychopathological vulnerabilities and self perpetuating processes in mental illness *Law, Resources and Time-Space Constructing* Zhang Shiming, 2022-01-17 This book studies the judicial evolution of the Qing Dynasty It sums up the changes from six major aspects 1 Banfang emerged in the late Qianlong period 2 The opening of capital appeals early in Jiaqing s reign 3 The consular jurisdiction was established during Daoguang s reign 4 The execution on the spot was started in Daoguang and Xianfeng periods 5 The introduction of fashenju a interrogatory court happened during Tongzhi s reign 6 Late in Guangxu s reign banishment was abolished and reforms were made for prisons In the past people did not have a comprehensive understanding of these big changes From the perspective of legal culture scholars often criticize traditional Chinese law focuses on criminal law while ignores civil law in terms of legal culture but this situation can be explained in part by the inadequate allocation of resources and authoritarian resources in traditional societies Using a large number of archives and precious materials such as private notes that were not noticed by academics in the past this book adopts the research path of new historical jurisprudence to explore the inner logic of judicial evolution in the Qing Dynasty focusing on the triangular connection between legal rules resources and temporal and spatial constructions which is an important contribution to the study of traditional Chinese law **The Borderline Personality Disorder Survival Guide** Alexander L. Chapman, Kim L. Gratz, 2007-12-01 This book offers a complete overview of borderline personality disorder BPD its symptoms and treatment and ways BPD sufferers can navigate their lives with this complicated condition
