**New Pioneers** Jeffrey Jacob, 2010-11 Practically everyone I know is nursing fantasies about escaping the life they're trapped in and creating one that makes more sense writes the editor of Utne Reader in a recent issue The people I most admire though are those who actually do it who break free and pursue a higher calling no matter how great the risk New Pioneers is about one such group of people the hundreds of thousands of urban North Americans who over the past three decades have given up their city or suburban homes for a few acres of land in the countryside Jeffrey Jacob's new pioneers are ordinary people who have tried to break away from the mainstream consumer culture and return to small town and rural America He traces the development of the movement and identifies seven different kinds of back to the lander the weekender country romantic purist country entrepreneur pensioner micro farmer and apprentice From over 1 300 survey responses interviews and in depth case studies at both the regional and national levels of representative back to the landers Jacob analyzes their values use of appropriate technology family division of labor on their acreages and predisposition toward environmental activism Jacob finds that back to the landers for the most part are not completely independent of the mainstream economy and consequently their lives do reflect the contradictions

between the available conveniences of a high technology culture and the movement's goals of self-reliant labor. He analyzes their ambivalent attitudes toward technology: hoes and shovels versus mini hydroelectric systems, wood stoves versus microwave ovens and so on. After examining the experiences of the back-to-the-country people who live on the margins of a postindustrial society, Jacob creates a clearer appreciation of the preconditions necessary to translate the idea of sustainable living into concrete action on a society-wide scale. While *New Pioneers* describes an important social movement, it also shows how far a group of highly motivated individuals and families can go by themselves in breaking away from the prevailing consumer culture. The dilemmas, frustrations, adaptations, and triumphs of these neo-homesteaders offer valuable insights to anyone contemplating a move back to the land.

*Reynolda* Barbara Babcock Millhouse, 2011. Reynolda with its family home and gardens, experimental farm, village, and woodland is an excellent example of the Country Place era. This popular destination in Winston-Salem, North Carolina, was created between 1906 and 1924 through the collaboration of three talented people: visionary Katharine Reynolds, architect Charles Barton Keen, and landscape architect Thomas W. Sears. With the financial backing of her husband, founder of the R.J. Reynolds Tobacco Company, Katharine Reynolds transformed a patchwork of worn-out farmland into a landscape of great natural beauty that includes a formal garden, 16-acre lake, recreational facilities, and some of the finest cropland. The sparkling white cluster of village buildings and their occupants are also integral to this story.

**Origins of Southern Radicalism** Lacy K. Ford, 1988. In the sixty years before the American Civil War, the South Carolina Upcountry evolved from an isolated subsistence region that served as a stronghold of Jeffersonian Republicanism into a mature cotton-producing region with a burgeoning commercial sector that served as a hotbed of Southern radicalism. This groundbreaking study examines this startling evolution, tracing the growth logic and strategy of pro-slavery radicalism and the circumstances and values of white society and politics to analyze why the white majority of the Old South ultimately supported the secession movement that led to bloody civil war.
