*Self and World* Ogilvy,2001      **Self and World** James A. Ogilvy,1980      **Culture And Self** Douglas B. Allen,Ashok Malhotra,2018-02-02 Traditional scholars of philosophy and religion both East and West often place a major emphasis on analyzing the nature of the self In recent decades there has been a renewed interest in analyzing self but most scholars have not claimed knowledge of an ahistorical objective essential self free from all cultural determinants The contributors of this volume recognize the need to contextualize specific views of self and to analyze such views in terms of the dynamic dialectical relations between self and culture An unusual feature of this book is that all of the chapters not only focus on traditions and individuals East and West but include as primary emphases comparative philosophy religion and culture reinforcing individual and cultural creativity Each chapter brings specific Eastern and Western perspectives into a dynamic comparative relation This comparative orientation emphasizes our growing sense of interrelatedness and interdependency

male philosophical discourse While many critics have addressed the thematic content of these writers work few scholars have taken up this question while focusing on the style of the writing This book shows how these feminist poets used seemingly small stylistic choices in poetry to make necessary contributions to contemporary philosophical discourses ultimately rendering these philosophical conversations more inclusive **Global Democracy and Human Self-Transcendence** Glen T. Martin,2019-01-15 This volume examines the dynamics of self transcendence for both individuals and humanity as a whole In doing so it illuminates the definitive relationship between self transcendence and global democracy Drawing upon a vast literature of philosophy psychology and religion ancient and modern East and West this book reveals the power of human futurity in actualizing our higher potential It represents a real breakthrough in understanding our emerging new era in the evolution of humanity It describes our transition from personal consciousness to global consciousness The book includes chapters on the fundamental ideas that animate our self understanding and define our common humanity Through careful scholarship it examines the dynamics of human dignity freedom love community intrinsic rights and global ethics It explores each of these concepts as a dimension of our human temporality as we envision and move into an ever transcending future a future that includes a World Parliament and planetary democracy In our time of apparent hopelessness and despair this volume reveals the grounds for a powerful hope that we can establish one world civilization of peace justice freedom and sustainability It makes a truly unique contribution not found elsewhere in today s literature revealing the astonishing dignity and potential of being human It is essential reading for all those concerned for the future of humanity and our precious planet Earth **How Physics Makes Us Free** J. T. Ismael,2016-02-03 J T Ismael s book will be the first to truly examine the question of what physics actually tell us about whether or not we are free to act Her conclusions are surprising and engaging and importantly show that physics does actually not say that we are not free **Self and Deception** Roger T. *Creative Virtualities in Human Self-Interpretation-in-Culture* Anna-Teresa Tymieniecka,2012-12-06 It would seem that modern humanity has unthroned the human spirit undercutting the very foundation of the validity of truth moral values and principles There appears to be no attempt to discern what is beautiful and true it is functional and pragmatic usefulness that seem to dominate human evaluations and transactions with other humans and indeed animals Humanity is becoming detached from the higher aesthetic moral and intellectual works of the human spirit and thus the life of the spirit is often situated on the other side of a gulf opposed to science with its rationality Culture is in danger of becoming reduced to science In other words the great metaphysical questions those of telos of sense often are answered in terms of scientific conceptions But these are at least incomplete if not fragmentary and in principle hypothetical which still leaves the questions unanswered But it is culture that is the manifestation of the human spirit being the historical process of human self interpretation in existence All manifestations of the creative forge of the human being find a role in the fabric of culture which involves

progressively widening circles of the human community demanding an integration and attunement with others in their changing conditions of life This consideration of culture involves all areas of philosophical reflection moral aesthetic metaphysical epistemological semiological cognitive and more      Citizenship, the Self and the Other Malik Ajani, 2015-02-05

In today's world people speak more than 6000 languages and identify with thousands of cultural groups and a large variety of different religions Despite such a number of differences these and other features of human diversity are housed politically inside roughly 200 nation states Globally speaking a diverse citizenry is an unavoidable fact for most countries across the planet Additionally developments such as transnational migrations rising socio economic inequalities the Wars on Terror and political movements based on absolutist ideologies continue to raise broader questions of justice governance equality quality of life and social cohesion As such recent decades have witnessed a revival of debates concerning what it means to be a citizen In response to such trends nations such as Australia Canada and Britain have committed themselves to teaching citizenship through their national curriculums Moreover all European Union member states have integrated some form of citizenship education into their primary and secondary curriculums Acknowledging such developments this book uses discussions with citizenship educators as a backdrop for a critical analysis of various conceptions of citizenship such as liberal social democratic civic republican cosmopolitan and multicultural citizenship It also analyses how these educators approach the contemporary reality of nation states which are richly composed of a diverse citizenry Given Britain's transformation into a multi ethnic and multi faith society this book develops as a case study an understanding of how religious and cultural difference can be approached What makes this work unique is that it gleans ideas and research from a wide field of international scholarship such as political science philosophy education and cultural studies A further unique aspect of the book is that it uses the q methodology a research method used to study people's viewpoints to reveal some shared perspectives on citizenship In doing so the path traced here leads to the discovery of spaces where citizenship educators despite their ethnic religious diversity display common ground on values beliefs and aims related to citizenship This book will prove to be a useful resource for academics educators and political leaders as well as interfaith and civil society professionals at large It is worth mentioning that even though this book has benefited from the generously contributed ideas of citizenship educators in England its scholarly research lessons arguments analysis and suggestions which focus on multi faith and multi ethnic societies will also be useful elsewhere      Global Origins of the Modern Self, from Montaigne to Suzuki Avram Alpert, 2019-04-16

In Global Origins of the Modern Self from Montaigne to Suzuki Avram Alpert contends that scholars have yet to fully grasp the constitutive force of global connections in the making of modern selfhood Alpert argues that canonical moments of self making from around the world share a surprising origin in the colonial anthropology of Europeans in the Americas While most intellectual histories of modernity begin with the Cartesian inward turn Alpert shows how this turn itself was an evasion of the impact of the colonial encounter He charts a counter history of

the modern self tracing lines of influence that stretch from Michel de Montaigne's encounter with the Tupi through the writings of Jean Jacques Rousseau into German Idealism American Transcendentalism postcolonial critique and modern Zen Alpert considers an unusually wide range of thinkers including Kant Hegel Fanon Emerson Du Bois Senghor and Suzuki This book not only breaks with disciplinary conventions about period and geography but also argues that these conventions obscure our ability to understand the modern condition      **Library of Congress Catalogs** Library of Congress,1976

*Self Impression* Max Saunders,2010-04-22 Ford Madox Ford A Dual Life Volume II The After War World Max Saunders

**Dying to Self and Detachment** James Kellenberger,2016-04-29 Exploring the religious category of dying to self this book aims to resolve contemporary issues that relate to detachment Beginning with an examination of humility in its general notion and as a religious virtue that detachment presupposes Kellenberger draws on a range of ancient medieval modern and contemporary sources that address the main characteristics of detachment including the work of Meister Eckhart St Teresa and Simone Weil as well as writers as varied as Gregory of Nyssa Rabi a al Adawiyya S ren Kierkegaard Andrew Newberg John Hick and Keiji Nishitani Kellenberger explores the key issues that arise for detachment including the place of the individual's will in detachment the relationship of detachment to desire to attachment to persons and to self love and self respect and issues of contemporary secular detachment such as inducement via chemicals This book heeds the relevance of the religious virtue of detachment for those living in the twenty first century      **Reading the Bible Ethically** Eric J.

Douglass,2014-09-11 All interpretive systems deal with the author Modern systems consider the text to be autonomous so that it is disconnected from the author's interests In Reading the Bible Ethically Eric Douglass reconsiders this connection His central argument is that the author is a subject who reproduces her culture and her subjectivity in the text As the author reproduces her subjectivity the text functions as the author's voice This allows Douglass to apply ethical principles to interpretation where that voice is treated as a subject for conversation and not an object for manipulation He uses this to texture the reading process so that an initial reading takes account of the author's communication while a second reading critiques that communication      **Kant and the Problem of Self-Knowledge** Luca Forgone,2018-10-17 This book

addresses the problem of self knowledge in Kant's philosophy As Kant writes in his major works of the critical period it is due to the simple and empty representation I think that the subject's capacity for self consciousness enables the subject to represent its own mental dimension This book articulates Kant's theory of self knowledge on the basis of the following three philosophical problems 1 a semantic problem regarding the type of reference of the representation I 2 an epistemic problem regarding the type of knowledge relative to the thinking subject produced by the representation I think and 3 a strictly metaphysical problem regarding the features assigned to the thinking subject's nature The author connects the relevant scholarly literature on Kant with contemporary debates on the huge philosophical field of self knowledge He develops a formal reading according to which the unity of self consciousness does not presuppose the identity of a real subject but a

formal identity based on the representation I think      Self Culture ,1896
