[The Iconography of Humiliation in New Kingdom Egypt](#) Mark D. Janzen,2024-11-26 This volume analyzes the iconography of bound foreigners on New Kingdom monuments and artifacts to better understand Egyptian perspectives on foreigners and their treatment of prisoners of war Depictions of foreign captives in humiliating or torturous poses are ubiquitous in Egyptian iconography and reflect the celebratory nature of royal ideology in this case by degrading enemies Egyptologists have scrutinized these scenes for details regarding various military matters but existing scholarly literature offers few studies focused on enemy captives and the sheer physical brutality of the depictions of their bindings Janzen examines the bound foreigner motif in New Kingdom sources demonstrating that these prisoners of war played vital roles in Egyptian ideology and religion Their depictions in bizarre or torturous poses served to reinforce ideological underpinnings of pharaoh s right to rule perpetually ritualizing their defeat and or punishment through the presence of this iconography on ceremonial objects used primarily by the king and on temple walls and monuments The subjugation of foreigners also constituted an important economic function as incorporating prisoners of war into the Egyptian

workforce was crucial for economic prosperity and growth in New Kingdom Egypt The volume also explores cross cultural and anthropological parallels placing Egyptian treatment of foreign prisoners in its ancient context The book provides a fascinating study of the subject suitable for scholars and students of Egyptology and ancient history particularly that of New Kingdom Egypt as well as those working on power warfare and violence in the ancient world more broadly

The Social Context of Technological Change Andrew J. Shortland, 2016-12-16 The technological capabilities of the ancient world have long fascinated scholars and the general public alike though scholarly debate has often seen material culture not as the development of technology but as a tool for defining chronology and delineating the level of interactions of neighboring societies These fourteen papers arising from a conference held in Oxford in September 2000 take the approach that technology plays a vital role in past socioeconomic systems They cover the Near East and associated areas including Greece Crete Cyprus Anatolia the Levant Mesopotamia and Egypt from the end of the Middle Bronze Age to the Late Bronze Age 1650-1150 BC a period when many technological innovations appear for the first time
