constructions reflecting the social economic and political needs of the societies that invest in them As Asia faces the challenges posed by the knowledge economy its schools have taken on a new and quite different importance This informative book outlines the broad policy contexts in which these transformations are taking place and the practical strategies that are needed to meet this objective The authors argue that the future of Asian societies depends on a transformation that requires a fundamental restructuring of schools as we know them while maintaining their long held cultural values This valuable insight provides an overview of educational issues in Asian societies establishes a broad theoretical framework in which these issues can be understood contextualizes issues by providing country case studies acknowledges the important role of culture influencing educational priorities It should be of interest to all those working in education policy and comparative education
