Dialogic: Education for the Internet Age Rupert Wegerif,2013-01-04 Dialogic Education for the Internet Age argues that despite rapid advances in communications technology most teaching still relies on traditional approaches to education built upon the logic of print and dependent on the notion that there is a single true representation of reality In practice the use of the Internet disrupts this traditional logic of education by offering an experience of knowledge as participatory and multiple

This new logic of education is dialogic and characterises education as learning to learn think and thrive in the context of working with multiple perspectives and ultimate uncertainty The book builds upon the simple contrast between observing dialogue from an outside point of view and participating in a dialogue from the inside before pinpointing an essential feature of dialogic the gap or difference between voices in dialogue which is understood as an irreducible source of meaning Each chapter of the book applies this dialogic thinking to a specific challenge facing education re thinking the challenge and revealing a new theory of education Areas covered in the book include dialogical learning and cognition dialogical learning and emotional intelligence educational technology dialogic spaces and consciousness global dialogue and global citizenship dialogic theories of science and maths education The challenge identified in Wegerif s text is the growing need to develop a new understanding of education that holds the potential to transform educational policy and pedagogy in order to meet the realities of the digital age Dialogic Education for the Internet Age draws upon the latest research in dialogic theory creativity and technology and is essential reading for advanced students and researchers in educational psychology technology and policy   Creating Web Sites Matthew MacDonald,2006 Provides information on creating a Web site covering such topics as HTML style sheets frames graphics attracting visitors JavaScript and blogs   **Creating a Website: The Missing Manual** Matthew MacDonald,2011-05-03 Think you need an army of skilled programmers to build a website Think again With nothing more than an ordinary PC some raw ambition and this book you ll learn how to create and maintain a professional looking visitor friendly site This Missing Manual gives you all the tools techniques and expert advice you need Plan your site Create web pages by learning the basics of HTML and HTML5 Control page design with CSS Format text images links tables and other elements Attract visitors Ensure that people can find your site through popular search engines Build a community Add forums fresh content and a feedback form to encourage repeat visits Get smart Use free tools to identify your site s strengths and weaknesses Create your own blog Post your musings with a free blog hosting service Bring in cash Host Google ads sell Amazon s wares or push your own products Add pizzazz Include audio video interactive menus and more   The Rise of Digital Sex Work Kurt Fowler,2023-11-14 Written in a clear accessible voice Virtually Yours is an intimate look into the changing face of sex work on the internet telling the stories of workers themselves how they share information grow their business and build a worldwide sex worker community   **Infoselves** Demetra Garbasevschi,2021-02-09 Infoselves delivers a multifaceted analysis of the commodification of self identity online from both a domination and a liberation perspective Drawing on multiple resources the book places its discussion of online identity within the larger context of self identity evolution arguing for the recognition of online identity as a legitimate component of the self identity system Advertising executive turned academic Demetra Garba evschi offers readers the means to understand the way our online identities are formed and used to reflect on the future of self identity and to become more aware of the radical implications of our digital footprint Readers will discover what it means to be an infoself in a deep digital context from exploring the informational
