Self Person World:

The Eschatological Person Andrew T. J. Kaethler, 2022-07-12 Both Alexander Schmemmann and Joseph Ratzinger insist that the human person remains shrouded in mystery without God's self disclosure in the person of Jesus Christ. Like us, Jesus lived in a particular time and location and therefore time and temporality must be part of the ontological question of what it means to be a human person. Yet Jesus, the one who has time for us, ascended to the Father and the bride of Christ awaits his return and therefore time and temporality are conditioned by the eschatological. With this in mind, the ontological question of personhood and temporality is a question that concerns eschatology: how does eschatology shape personhood? Bringing together Schmemmann and Ratzinger in a theological dialogue for the first time, this book explores their respective approaches and answers to the aforementioned question. While the two theologians share much in common, it is only Ratzinger's relational ontological approach that, by being consistently relational from top to bottom, consistently preserves the meaningfulness of temporal existence.

The Psychology of Personhood Jack Martin, Mark H. Bickhard, 2012-11-29 What is a person? Surprisingly little attention is given to this question in psychology. For much of the past century, psychology has tended to focus on the systematic study of processes rather than on the persons who enact and embody them. In contrast to the reductionist picture of much mainstream theorising, which construes persons as their mental lives, behaviours, or neurophysiological particulars, *The Psychology of Personhood* presents persons as irreducibly embodied and socially situated beings. Placing the study of persons at the centre of psychology, this book presents novel insights on the typical everyday actions and experiences of persons in relation to each other and to the broader society and culture. Leading scholars from diverse academic disciplines paint an integrative portrait of the psychological person within evolutionary, historical, cultural, developmental, and everyday contexts.

The Social Construction of the Person K.J. Gergen, K.E. Davis, 2012-12-06 This volume grew out of a discussion between the editors at the Society for Experimental Social Psychology meeting in Nashville in 1981. For many years, the Society has played a leading role in encouraging rigorous and sophisticated research. Yet our discussion that day was occupied with what seemed a major problem with this finely honed tradition: namely, it was preoccupied with accurate renderings of reality while generally insensitive to the process by which such renderings are achieved. This tradition presumed that there were brute facts to be discovered about human interaction with little consideration of the social processes through which factuality is established. To what degree are accounts of persons constrained by the social process of rendering, as opposed to the features of those under scrutiny? This concern with the social process by which persons are constructed was hardly ours alone. In fact, within recent years, such concerns have been voiced with steadily increasing clarity across a variety of disciplines. Ethnomethodologists were among the first in the social sciences to puncture the taken-for-granted realities of life. Many sociologists of science have also turned their attention to the way social organizations of scientists create the facts necessary to sustain these organizations. Historians of science have

entered a similar enterprise in elucidating the social economic and ideological conditions enabling certain formulations to flourish in the sciences while others are suppressed Many social anthropologists have also been intrigued by cross cultural variations in the concept of the human being Getting the Message George A. Goens,2021-03-15 Society today is fragmented There are frequent examples of harsh and abrasive discourse in social employment personal and political settings Name calling conceit and vulgarity are frequently used in social media and other forms of social interaction and discussion Communication is a critical issue in today s society We live in a technological time with the means to easily contact people However the quality and effectiveness of communication is problematic real connections with others require understanding and insight into them and their thinking That is the purpose of true communication Individuals must understand the content and intent of communication The missing link in quality and effective communication is listening Everyone wants to be heard but they fail to realize that all parties must listen Listening is an essential skill and is more than simply hearing Communication is essential in all facets of life because it concerns not only the physical process of talking and listening but also emotional and psychological concerns and ethics The nature of the conversation brings expectations and either opens or closes doors to further communication **Persons — What Philosophers Say about You** Warren Bourgeois,2006-01-01 Can a person suffer radical change and still be the same person Are there human beings who are not persons at all Western philosophers from the ancient Greeks to contemporary thinkers gave the concept of person great importance in their discussions They saw it as crucial to our understanding of our world and our place in it Prompted by tragedy a loved one s descent into dementia Warren Bourgeois explored Western philosophical ideas to discover what constitutes a person The first edition of *Persons What Philosophers Say About You* was the result of his search This new second edition focuses on making this material easily available and accessible to students and has been redesigned as an introduction to the philosophy of mind and its history concentrating on the central concept of person in contemporary controversies concerning abortion euthanasia genetic engineering and human rights Bourgeois has mined Western philosophy for ideas students can apply today as technology challenges their beliefs about what we are He then uses the concept of person to unite the various subdivisions of philosophy applying theories of knowledge reality and value to help students understand what we believe about ourselves The result is a living philosophy and an introductory text with a difference While the ideas of the great philosophers cannot be meaningfully summarized in one introductory text this book provides a comparison of what many of them say about the concept of person and will encourage students to read further An Intelligent Person's Guide to Philosophy Roger Scruton,1999-02-01 Philosophy s the love of wisdom can be approached in two ways by doing it or by studying how it has been done so writes the eminent philosopher Roger Scruton In this user friendly book he chooses to introduce philosophy by doing it Taking the discipline beyond theory and intellectualism he presents it in an empirical accessible and practical light The result is not a history of the field but a vivid energetic and personal account to guide the reader making his or her own

A Metaphysics of Creation for the Information Age Liran Shia Gordon, 2022-05-23 The metaphysical and theological writings of John Duns Scotus 1265-1308 one of the most intriguing albeit if now nigh forgotten philosophers of the late Middle Ages were seminal in the emergence of modernity A Metaphysics of Creation for the Information Age A Dialogue with Duns Scotus uses the prism of the concept of Creation as the leitmotif to assemble and interpret Scotus s system of thought in a unified manner In doing so Liran Shia Gordon reframes Scotus s metaphysics such that it confronts the challenges posed by information technology and its impact on our lives thought and actions Surprisingly although there has been great interest in the emergence and dissemination of information technology through the popular media there has not yet been a genuine and vigorous philosophical consideration of the multiple ways information technology alters the basic categories by which we perceive and understand reality Juxtaposing medieval philosophy and information technology offers an unconventional horizon to frame the foundational
