## **Selfhypnosis The Chicago Paradigm:**

**Self-Hypnosis** Erika Fromm, Stephen Kahn, 1990-08-03 While used abundantly in clinical work self hypnosis has been somewhat neglected as a subject of systematic study An outstanding exception to this trend has been the work of Erika Fromm and her colleagues at the University of Chicago who have for the last two decades extended the theoretical and empirical base of this technique Now key publications of this research group are compiled in one volume along with much new material by these authors providing a full perspective on the development of their methods and theories As such SELF HYPNOSIS is the first systematic empirically oriented exploration of the phenomena and characteristics of self initiated self hypnosis Moreover its examination of self hypnosis taking the experiential rather than the behavioral approach yields a more complete study of the aspects of the self that can unfold during hypnosis In the early 1970s Fromm and her colleagues set out to answer several intriguing questions about self hypnosis What are the boundaries of the self hypnosis experience How does self hypnosis compare with traditional hypnotist present hypnosis Can self hypnosis be taught following the guidelines of traditional hypnosis What type of individual is more susceptible to or skilled in self hypnosis This volume presents the methods and results of this group s work an approach that has come to be known as the Chicago paradigm Introductory chapters establish the theoretical framework utilized They provide an overview of the literature review the methods procedures qualitative samples quantitative data and clinical applications and evaluate pilot study results on the phenomenological similarities and differences of self hypnosis and heterohypnosis At the core of SELF HYPNOSIS is its presentation of key empirical research involving two separate areas First is the analysis of extensive questionnaires that compare self hypnosis and heterohypnosis and examine self hypnosis proper as well as the unfolding of self hypnosis over time Second is an examination of cognitive processes self hypnosis and their relationship to personality These processes include the modes of ego in self hypnosis the role of imagery and the process of absorption Clinical implications and applications are considered as are therapist patient factors that contribute to successful self hypnosis A major contribution to the scientific study of self initiated self hypnosis SELF HYPNOSIS THE CHICAGO PARADIGM is essential reading for all researchers and theoreticians in the field of hypnosis and in phenomenological psychology In addition it will be of enormous value to those psychologists physicians and dentists seeking to more effectively utilize self hypnosis in clinical practice
