Spare the Birds! Carolyn Merchant, 2016-08-23 In 1887 a year after founding the Audubon Society explorer and conservationist George Bird Grinnell launched Audubon Magazine The magazine constituted one of the first efforts to preserve bird species decimated by the women's hat trade hunting and loss of habitat Within two years however for practical reasons Grinnell dissolved both the magazine and the society Remarkably Grinnell's mission was soon revived by women and men who believed in it and the work continues today In this the only comprehensive history of the first Audubon Society 1886 1889 Carolyn Merchant presents the exceptional story of George Bird Grinnell and his writings and legacy The book features

Grinnell's biographies of ornithologists John James Audubon and Alexander Wilson and his editorials and descriptions of Audubon's bird paintings. This primary documentation combined with Carolyn Merchant's insightful analysis casts new light on Grinnell, the origins of the first Audubon Society and the conservation of avifauna. [Bird Painting Between Art and Science](#) Hugh Ridley, 2024-02-02 Have you ever wondered why so many scientific handbooks on birds use paintings rather than photographs or why the painters Killian Mullarney and Lars Johnson are such significant figures in ornithology? This book gives an account of the 500 years during which bird painting reached such heights and it traces the growth of scientific realism in this field. It shows how scientific understanding has shaped the art and how artistic style has left its mark on the science. Birds cross frontiers unhindered and the language of painting too knows no national barriers. This book explores the huge contribution of German painting to the international tradition. It looks at the work of great artists Dürer and Rembrandt. It introduces the fascinating but neglected artists who made the landmark handbooks of the past. It pays tribute to those major figures of the last 150 years who brought the art to its perfection: Josef Wolf and Bruno Liljefors and looks briefly at the competition with photography at the start of the twentieth century. It reveals the interlocking of art with the science of ornithology as it was developed by figures such as Buffon and Darwin. The seventeenth century witnessed a great flourishing of Dutch trade and culture. Over the course of the first half of the century, the northern Netherlands secured independence from the Spanish crown and the nascent republic sought to establish its might in global trade, often by way of diplomatic relations with the Ottoman Empire and other Muslim powers. Central to the political and cultural identity of the Dutch Republic were curious foreign goods the Dutch called rarities. *Rarities of These Lands* explores how these rarities were obtained, exchanged, stolen, valued and collected, tracing their global trajectories and considering their role within the politics of the new state. Claudia Swan's insightful, engaging analysis offers a novel and compelling account of how the Dutch Republic turned foreign objects into expressions of its national self-conception. *Rarities of These Lands* traces key elements of the formation of the Dutch Republic, artistic and colonialist ventures alike, offering new perspectives on this momentous period in the history of the Netherlands and its material culture.
