Stephens,1893 *Community Energy Self-reliance* ,1980 *How to be a Green Liberal* Simon A. Hailwood,2014-12-18 It is often claimed by environmental philosophers and green political theorists that liberalism the dominant tradition of western political philosophy is too focused

on the interests of human individuals to give due weight to the environment for its own sake In *How to be a Green Liberal* Simon Hailwood challenges this view and argues that liberalism can embrace a genuinely green non instrumental view of nature The book s central claim is that nature s otherness its being constituted of independent entities and processes that do not reflect our purposes is a basis for value and can be incorporated within liberal political philosophy as a fundamental commitment alongside human freedom and equality Hailwood argues that the conceptual resources already exist within mainstream liberalism for a thoroughly non instrumental perspective Adopting a rigorous philosophical approach Hailwood tackles a wide range of themes across environmental ethics including holistic theories deep ecology eco feminism and eco anarchism as well as issues in value theory and political philosophy more generally In making the case for liberalism s green credentials *How to be a Green Liberal* is a formidable challenge to recent green political theory and will be required reading not only for students of political philosophy but for all those interested in the natural world and man s relationship to it In the Way of Development Mario Blaser,Harvey A. Feit,Glenn McRae,2004 Authored as a result of a remarkable collaboration between indigenous people s own leaders other social activists and scholars from a wide range of disciplines this volume explores what is happening today to indigenous peoples as they are enmeshed almost inevitably in the remorseless expansion of the modern economy and development at the behest of the pressures of the market place and government It is particularly timely given the rise in criticism of free market capitalism generally as well as of development The volume seeks to capture the complex power laden often contradictory features of indigenous agency and relationships It shows how peoples do not just resist or react to the pressures of market and state but also initiate and sustain life projects of their own which embody local history and incorporate plans to improve their social and economic ways of living **Addresses on the Local**

Self-government ,1926 **Preparing Indonesian Youth** ,2020-08-25 *Preparing Indonesian Youth* A Review of Educational Research offers insights into the challenges and prospects in preparing Indonesian youth for 21st century living The chapters feature empirically based case studies focusing on three key aspects of education in Indonesia teachers and teaching school practices programs and innovations and the social contexts of youth and schooling The case studies also represent different vantage points contributing to an enriched understanding of how larger social phenomenon for example education decentralisation in Indonesia rural urban and transnational migration international benchmarking assessments and the global feminist and women s movement impact and interact with enacted visions of preparing all youth educationally for work as well as for meaningful participation in their respective communities and the Indonesian society at large Contributors are Anindito Aditomo Hasriadi Masalam Juliana Murniati Ahmad Bukhori Muslim Wahyu Nurhayati Shuki Osman Margaretha Purwanti Esti Rahayu Ila Rosmilawati Andrew Rosser Widjajanti M Santoso Anne Suryani Aries Sutantoputra Novita W Sutantoputri Isabella Tirtowaluyo Nina Widyawati and David Wright **Self-Sufficient Agriculture** Robert Tripp,2012-04-27 Low external input technology or LEIT is an increasingly prominent subject in discussions of sustainable

agriculture There are growing calls for self sufficient agriculture in an era experiencing diminishing returns from reliance upon expensive synthetic pesticides and fertilizers There are many reasons to support strategies for low external input farming including a concern for environmental sustainability increased attention to resource poor farmers and marginal environments and the conviction that a better use of local resources in small scale agriculture can improve farm productivity and innovation But despite the increased attention to self sufficient agriculture there is little evidence available on the performance and impact of LEIT This book examines the contributions and limitations of low external input technology for addressing the needs of resource poor farmers For the first time a balanced analysis of LEIT is provided offering in depth case studies an analysis of the debates an extensive review of the literature and practical suggestions about the management and integration of low external input agriculture in rural development programmes
