

Youth Antisocial Behaviour: Britain

✓ Exclusively available on IvyPanda

The problem of the youth antisocial behaviour in the British society is discussed at several levels. Today definite Antisocial Behaviour Orders are developed by the government as one of the main measures in order to control and correct the facts of antisocial behaviours in community.

Nevertheless, the effectiveness of this practice is argued by the researchers, sociologists, and psychologists because of the complexity of the notion of antisocial behaviour and its connection with the adolescents' behaviour (Burney 2009; Connell et al. 2011).

That is why the major issues which are discussed in the literature on the topic of reducing youth antisocial behaviour with the help of legislative programmes are associated with the questions of the definition of the term, the problem of the programmes' effectiveness, the possible success in the usage of the community-related programmes, and the role of the family in the process.

The term 'antisocial behaviour' is rather broad and has different variants of its interpretation from the position of the governors, psychologists, and sociologists. There is also a number of associated notions. Thus, Burney states that it is necessary to distinct between the notions which can be discussed by the public as equal ones because they refer to the same field, but are connected with different problems.

These terms are, for instance, 'disorder', 'crime', and 'antisocial behaviour'. According to Burney, "'disorder' is a term applied collectively to communities; 'anti-social behaviour' is something done by individuals who are thereby singled out and blamed for the harm they inflict upon communities" (Burney 2009, p. 2).

Following Burney's considerations, it is possible to say that antisocial behaviour is predominantly connected with the specific behaviour of a person or a group of person which influences the character of their interactions with other representatives of the community negatively.
