Children, Consumerism, and the Common Good Mary M. Doyle Roche,2009-09-17 *Children Consumerism and the Common Good* explores the impact of consumer culture on the lives of children in the United States and globally focusing on two phenomena advertising to children and child labor Christian communities have a critical role to play in securing the well being of children and challenging the cultural trends that undermine that well being Themes in the tradition of Catholic social teaching can move us beyond the tensions between children's rights activists and those who propose a return to family values and can inform practices of resistance participation and transformation Roche argues that children are full interdependent members of the communities of which they are a part They have a claim on the fruits of our common life and are called to participate in that life according to their age and ability The principle of the common good forms the benchmark for analyzing children's participation in the market and the ways in which market logic shapes other institutions of civil society particularly educational institutions The Cristo Rey Network of schools is highlighted as an example of institutional transformation which shapes children's participation in education and the economic life of their families and communities in a spirit of solidarity

Mass Media James B. Martin,2002 Mass media has become an integral part of the human experience News travels around the world in a split second affecting people in other countries in untold ways Although being on top of the news may be good at least for news junkies mass media also transmits values or the lack thereof condenses complex events and thoughts to simplified sound bites and often ignores the essence of an event or story The selective bibliography gathers the books and magazine literature over the previous ten years while providing access through author title and subject indexes

Stop Teaching Our Kids to Kill Lt. Col. Dave Grossman,Gloria Degaetano,2009-11-04 There is perhaps no bigger or more important issue in America at present than youth violence Columbine Sandy Hook Aurora We know them all too well and for all the wrong reasons kids some as young as eleven years old taking up arms and with deadly frightening

accuracy murdering anyone in their paths What is going on According to the authors of Stop Teaching Our Kids to Kill there is blame to be laid right at the feet of the makers of violent video games called murder trainers by one expert the TV networks and the Hollywood movie studios the people responsible for the fact that children witness literally thousands of violent images a day Authors Lt Col Dave Grossman and Gloria DeGaetano offer incontrovertible evidence much of it based on recent major scientific studies and empirical research that movies TV and video games are not just conditioning children to be violent and unaware of the consequences of that violence but are teaching the very mechanics of killing Their book is a much needed call to action for every parent teacher and citizen to help our children and stop the wave of killing and violence gripping America's youth And most important it is a blueprint for us all on how that can be achieved In Paducah Kentucky Michael Carneal a fourteen year old boy who stole a gun from a neighbor's house brought it to school and fired eight shots at a student prayer group as they were breaking up Prior to this event he had never shot a real gun before Of the eight shots he fired he had eight hits on eight different kids Five were head shots the other three upper torso The result was three dead one paralyzed for life The FBI says that the average experienced qualified law enforcement officer in the average shootout at an average range of seven yards hits with less than one bullet in five How does a child acquire such killing ability What would lead him to go out and commit such a horrific act

Toward a Better Understanding of Youth Culture, 2000 **The Ivory Tower of Babel** David Demers, 2011 Mainstream social science has come under fierce criticism in recent decades for failing to have more impact on public policy Critics say the social sciences are incapable of generating knowledge that can solve social problems Others contend that partisan politics and university administrations are the problem Politicians are more concerned about special interests than scientific research and administrators care more about scholarly publications than solving social problems Are the social sciences failing to live up to their promises Have they outlived their usefulness Have they become an Ivory Tower

of Babel Like the Babylonians who built the infamous Tower of Babel social scientists for the past two centuries have been building a tower of sorts only this time it s composed of knowledge rather than bricks The primary goal of these scholars anthropologists communication scholars economists political scientists sociologists and social psychologists has been to solve problems of social integration The Babylonian tower was designed in part to unite people to one geographical area Similarly social scientists see their tower of knowledge as a means for solving social problems such as poverty crime drug abuse inequality unemployment abuse of power that alienate people and groups from modern society The Babylonians failed because of divine intervention according to the Bible The social scientists aren t finished building their tower But according to critics the results so far look less like a tower of knowledge for solving social problems than an Ivory Tower of Babel one in which social scientists routinely dispute each other s theories and data and even uncontested or well supported findings rarely influence public policy Disputes over the nature of truth and knowledge are so commonplace in the social sciences that many scholars believe a social science which uses methods from the natural sciences is incapable of generating knowledge that can solve social problems This book examines the history and philosophy of the social sciences and theoretical and empirical research on the impact of social science Suggestions are offered at the end for enhancing the impact of the social sciences A number of scientific articles and books have been written about the impact or lack thereof of the social sciences on public policy but none has been written specifically to appeal to both academics and a broader market composed of the general public and students in both undergraduate and graduate level courses The author takes the reader on a journey inside one of the best kept secrets in higher education that much if not most of the research conducted in the social sciences has very little impact on public policy or on solving social problems Are taxpayers getting their money s worth

Dads and Daughters Joe Kelly, 2002-06-18 Every father can make a huge difference in his daughter s life As the primary male role model in a girl s life fathers influence their daughters in profound ways from how they see themselves to what they come to expect from men and the world at large But men often don t realize the importance of their interactions or may shy away from too close involvement because of their inexperience or conditioning Especially as girls move into adolescence fathers may find themselves feeling distant from their daughters or awkward with the changing dynamic Communication becomes difficult and parenting issues more complicated But this is also the time when daughters most need their fathers to be an even greater presence in their lives *Dads and Daughters* is a tool to bridge that gap and build a rewarding and joyful father daughter relationship From father to father and with insights from many other dads Joe Kelly shows men how they can strengthen their relationships with their daughters and explores the tremendous rewards this relationship can bring Starting with a self assessment quiz titled How Am I Doing as My Daughter s Father dads can immediately see what kind of role they play in their daughter s life To educate fathers and offer solutions when problems arise *Dads and Daughters* then offers thoughtful coverage of the most pivotal issues today s girls face such as sex and dating body image alcohol and drugs media
