America for the disadvantaged the weak in body or mind and those born without close family ties The disparity between rich and poor in our immensely wealthy nation and the corrupting influence of money on politics to the advantage of the few over the many form the heart of his critique Friedenberg emphasizes that the New Deal concern for the underdog the major social achievement of the first half of the 20th century has been gradually abandoned by presidents in the latter half of the century along with tax policies that shifted wealth from the well to do to the less privileged Though paying lip service to democracy in fact recent presidents have upheld a system designed to maximize the influence of a powerful elite a flexible plutocracy as Friedenberg describes it This has good and bad aspects On the one hand the innovations launched by powerful business leaders such as Henry Ford Thomas J Watson IBM and Bill Gates Microsoft have resulted in millions of new jobs and advanced the overall prosperity of the nation On the other hand the system does little to help the poor rise to a higher level and it has kept the middle class stagnating for the last thirty years The effect of presidential policies is a divide between the haves and have nots that today is every bit as stark as it was before the Great Depression Friedenberg pleads for a new focus on improved education for all to narrow the widening gap between rich and poor instead of the current folly of building gated communities for the wealthy and ever more prisons for the law breaking underprivileged The vast technological resources unleashed by the computer revolution can and should be used to create a more equitable American future
