**A Lexical Semantic Study of Chinese Opposites** Jing Ding, 2017-11-15 This book studies Chinese opposites It uses a large corpus GigaWord to trace the behavior of opposite pairings co occurrence focusing on the following questions In what types of constructions from window size restricted and bi syllabic to quad syllabic will the opposite pairings appear together And on a larger scale i e in constrained free contexts in which syntactic frames will the opposite pairings appear together The data suggests aspects that have been ignored by

previous theoretical studies such as the ordering rules in co-occurring pairings, the differences between the three main subtypes of opposites that is antonym, complementary, converse, in discourse function distributions. The author also considers the features of this Chinese study and compares it to similar studies of English and Japanese.
