Forshaw,2012-08-09 It is not surprising that Australian grassfinches are highly popular with ornithologists and aviculturists for included among the species are one of the most beautiful of all birds the Gouldian Finch *Erythrura gouldiae* and one of the most familiar cagebirds the Zebra Finch *Taeniopygia guttata* Despite a scarcity in published works on finches interest in the species is growing leading to a dramatic advancement in our knowledge of many species For example we have gained new information from field observations carried out on little known species including the Blue faced Parrot Finch *Erythrura trichroa* and the Red eared Firetail *Stagonopleura oculata* Significant advances in taxonomic research largely as a consequence of the development and refinement of biochemical analyses often involving DNA DNA hybridisation have given us a new insight into relationships among species with some unexpected alliances being determined Additionally dramatic changes have taken place in avicultural practices and in virtually all countries aviculture has taken on a new professional approach with the most notable results being increased productivity and success with a wider variety of species After a lapse of almost half a century since publication of Klaus Immelmann s eminent work on finches based on extensive field studies the time has come for a new examination of Australian grassfinches In *Grassfinches in Australia* Joseph Forshaw Mark Shephard and Anthony Pridham have summarised our present knowledge of each species and have given readers a visual appreciation of the birds in their natural habitats and in aviculture The resulting combination of superb artwork and scientifically accurate text ensures that this volume will become the standard reference work on Australian grassfinches In addition to enabling

aviculturists to know more about these finches in the wild as a guide to their own husbandry techniques detailed information on current management practices for all species in captivity is provided The book also includes colour plates depicting some of the more common mutations held in Australian and overseas collections *Australian national bibliography* ,1961
