## Short Wave:

*Short-Wave Solar Radiation in the Earth's Atmosphere* Irina N. Melnikova, Alexander V. Vasilyev, 2005-08-29 Based on data from an experiment which ran for ten years this book summarizes the results of the Atmospheric Physics Department of the St Petersburg University and the Main Geophysical Observatory The processed data now forms a rich dataset of spectral values of radiative characteristics under different atmospheric conditions The analysis of this database clearly shows that the solar radiative absorption in a dusty and cloudy atmosphere is significantly higher than assumed to date Both graduate students of atmospheric sciences as well as scientists and researchers in the field of meteorology and climatology will find a wealth of new data and information in this monograph

**The Early Shortwave Stations** Jerome S. Berg, 2013-10-04 In July 1923 less than three years after Westinghouse station KDKA signed on company engineer Frank Conrad began regular simulcasting of its programs on a frequency in the newly discovered shortwave range It was an important event in a technological revolution that would make dependable worldwide radio communication possible for the first time In subsequent years countless stations in practically all countries followed suit taking to shortwave to extend reception domestically or reach audiences thousands of miles away Shortwave broadcasting would also have an important role in World War II and in the Cold War In this his fourth book on shortwave broadcast history the author revisits the period of his earlier work *On the Short Waves 1923 1945* and focuses on the stations that were on the air in those early days The year by year account chronicles the birth and operation of the large international broadcasters as well as the numerous smaller stations that were a great attraction to the DXers or long distance radio enthusiasts of the time With more than 100 illustrations and extensive notes bibliography and index the book is also a valuable starting point for further study and research

*Wave Dynamics and Radio Probing of the Ocean Surface* O. M. Phillips, Klaus Hasselmann, 2012-12-06 In 1960 Dr George Deacon of the National Institute of Oceanography in England organized a meeting in Easton Maryland that summarized the state of our understanding at that time of ocean wave statistics and dynamics It was a pivotal occasion spectral techniques for wave measurement were beginning to be used wave wave interactions had just been discovered and simple models for the growth of waves by wind were being developed The meeting laid the foundation for much work that was to follow but one could hardly have imagined the extent to which new techniques of measurement particularly by remote sensing new methods of

calculation and computation and new theoretical and laboratory results would in the following twenty years build on this base When Gaspar Valenzuela of the V S Naval Research Laboratory perceived that the time was right for a second such meeting it was natural that Sir George Deacon would be invited to serve as honorary chairman for the meeting and the entire waves community was delighted at his acceptance The present volume contains reviewed and edited papers given at this second meeting held this time in Miami Florida May 13 20 1981 with the generous support of the Office of Naval Research the National Aeronautics and Space Administration and the National Oceanic and Atmospheric Administration

**Wireless Internationalism and Distant Listening** Simon J. Potter, 2020-05-21 During the 1920s and 1930s the new medium of radio broadcasting promised to transform society by fostering national unity and strengthening and popularising national cultures However many hoped that wireless would also encourage international understanding and world peace Intentionally or otherwise wireless signals crossed borders bringing talk music and news to enthusiastic distant listeners in other countries In Europe radio was regulated through international consultation and cooperation to restrict interference between stations and to unleash the medium's full potential to carry programmes to global audiences A distinctive form of wireless internationalism emerged reflecting and reinforcing the broader internationalist movement and establishing structures and approaches which endured into the Second World War the Cold War and beyond This study reveals this untold history Wireless Internationalism and Distant Listening also explores the neglected interwar experience of distant listening revealing the prevalence of listening across borders and explaining how individuals struggled to overcome unwanted noise tune in as many stations as possible and comprehend and enjoy what they heard The volume shows how radio brought the world to Britain and Britain to the world It revises our understanding of early BBC broadcasting and the BBC Empire Service the precursor to today's World Service and shows how government influence shaped early BBC international broadcasting in English Arabic Spanish and Portuguese It also explores the wider European and trans Atlantic context demonstrating how Fascism in Italy and Germany the Spanish Civil War and the Japanese invasion of China combined to overturn the utopianism
