

Shot Put **TECHNIQUES**

Baryshnikov Technique / Spin Shot Put

This technique was first used by Aleksandr Baryshnikov in 1972 and was invented by his coach Viktor Alexeyev. It involves a spin just like Discus Throw with the help of rotational momentum for power.

Steps to follow for "Baryshnikov Technique"

Step 1

In this technique the athlete stands side ways on to the marker, while bringing the supporting arm across body and bends the back knee sideways.

Step 2

The leading arm rotates around the body as the free arm is straight with the back leg leaning further to get the maximum power.

Step 3

As the hips thrust forward with the Shot Put touching the neck meanwhile the arm swings round to get prepared to push the Shot Put.

Step 3

Now, push the Shot Put forward, using legs and shoulder power while landing over the previously bent leg with arms and body in rotation.

Summary of Mark Broadie's Every Shot Counts Everest Media, 2022-05-26T22:59:00Z Please note This is a companion version not the original book Sample Book Insights 1 The importance of putting is as old as golf itself For more than two centuries the mistaken idea that putting is the key to scoring has been the settled wisdom of experts and nonexperts alike 2 The observation that a missed putt can't be made up for with a good putt is literally true but it is wrong to attribute each golfer's score to a single shot The final score on a hole typically results from the accumulation of fractional gains and losses on each stroke 3 The effects of one shot on another are not limited to putting Some golfers may gain confidence from booming a drive down the middle of the fairway while knocking an approach shot to within one foot of the hole takes the

pressure off the putt 4 Anecdotal evidence abounds that history revolves around the putt The list of important off green shots is just as impressive
