Controversial Issues in Adventure Programming Bruce Martin, Mark Wagstaff, 2012-05-04 *Controversial Issues in Adventure Programming* offers an engaging approach to the consideration of enduring current and emerging issues in the field. Written primarily for upper level undergraduate and graduate students, the text presents 20 issues in a debate format challenging students to participate in critical discourse concerning these issues as practitioners in the field of adventure programming. Respected authors Bruce Martin and Mark Wagstaff have assembled a team of more than 50 contributors from around the globe to reassess some of the underlying assumptions on which adventure programming is based. They have critically examined implications of new developments for emerging practice and discussed how best to position the field of adventure programming in addressing broader societal concerns. To set the stage for the debate, each issue is prefaced with a general overview including the evolution of the issue and its significance in light of broader social concerns. Then contributors present the pros and cons of each issue. A debate format helps students develop an understanding of the key points around each issue while also becoming familiar with current research pertinent to these issues. This approach also encourages students to grapple with these issues and begin to develop their own informed thoughtful perspectives as they prepare for careers in adventure programming. *Controversial Issues in Adventure Programming* is divided into two parts. Part I begins by discussing issues of ongoing concern in the field, including the certification debate, motorized versus nonmotorized forms of outdoor recreation, and program accreditation. In part II, contemporary and emerging issues are presented, such as the use of online educational programming in the field of adventure programming. As a reference for practitioners and policy makers, *Controversial Issues in Adventure Programming* offers new and updated perspectives on enduring and emerging issues as well as a synthesis of the most recent related scholarly literature. In addition, the text serves as a resource in understanding how the adventure programming industry can contribute to addressing issues of broad concern in society, such as public health, global climate change, stewardship of public lands and waterways, and education reform. *Controversial Issues in Adventure Programming* encourages readers to participate in some of the central debates occurring in the field. In particular, this timely resource will help students broaden their understanding of the field as they critically examine and respond to a range of enduring, contemporary, and emerging topics in adventure programming.

Innovative Interventions in Child and Adolescent Mental Health Christine Lynn Norton, 2010-09-13 *Innovative Interventions in Child and Adolescent Mental Health* is a unique composite of the literature on various innovative interventions for children and adolescents and provides a developmental and neurobiological rationale for utilizing innovative interventions with this population.
