Shutdown At Youngstown:

Shutdown at Youngstown Terry F. Buss, F. Stevens Redburn, 1983-06-30 In spite of the gravity of the problem of mass unemployment and its periodic recurrence in industrial societies few scientific studies have been undertaken which serve to define the impact of plant closings on workers families and the community to evaluate individual group or community responses to closings and to offer suggestions for the future Shutdown at Youngstown meets this need It presents the findings of a multidisciplinary scientific study of the closing of the steel mills in Youngstown in 1977 which put 5 000 persons out of work Research reported in the text is based on personal interviews social indicator data and data from health and human service agencies The authors conclude by developing a public policy for dealing with plant closings and the crisis of mass unemployment Shutdown United States Commission on Civil Rights. Illinois Advisory Committee, 1981

Shutdown of Youngstown Sheet and Tube Clingan Jackson, Philip Bracy, 1981 *Closing Chapters* Thomas G. Welsh, 2011-01-01 Closing Chapters attempts to explain the disintegration of urban parochial schools in Youngstown Ohio a onetime industrial center that lost all but one of its eighteen Catholic parochial elementary schools between 1960 and 2006 Through this examination of Youngstown Welsh sheds light on a significant national phenomenon the fragmentation of American Catholic identity *City in Transition* Frank Akpadock, 2012-03 In a climate of scarce financial resources where federal and state fiscal assistance to cities has dwindled quantitatively all civic leaders must somehow find a way to provide long term vision a good business climate and diverse economic development planning strategies to grow their cities economies Such plans should be strategically flexible and adaptable to change yet strong enough to withstand the whirlwinds and vicissitudes of the constantly changing national and global economies Youngstown Ohio achieved its success through the visionary leadership of its city mayors who partnered with local University leadership tapping into their invaluable assets of knowledge capital and technology transfer capacities while at the same time mobilizing public support from labor businesses foundations and other entrepreneurial stakeholders to provide assistance with the city s economic recovery City in Transition is a landmark testimonial assessment of tried and true economic development strategies of Youngstown mayors visionary leaderships to revive and grow the city s declining economy following its steel mill closings in the late 1970s Economic development strategies together with city size reclassification into a smaller post industrial city created a classic leadership story of foresight that transcended the city s economic regeneration per se to garner both national recognition and international attention **Toxic burn [electronic resource]** Thomas C. Shevory, 2007 A Race of Singers Bryan K. Garman, 2018-07-25 When Walt Whitman published Leaves of Grass in 1855 he dreamed of inspiring a race of singers who would celebrate the working class and realize the promise of American democracy By examining how singers such as Woody Guthrie Bob Dylan and Bruce Springsteen both embraced and reconfigured Whitman s vision Bryan Garman shows that Whitman succeeded In doing so Garman celebrates the triumphs yet also exposes the limitations of Whitman s legacy While

Whitman's verse propounded notions of sexual freedom and renounced the competitiveness of capitalism; it also safeguarded the interests of the white workingman, often at the expense of women and people of color. Garman describes how each of Whitman's successors adopted the mantle of the working class hero while adapting the role to his own generation's concerns. Guthrie condemned racism in the 1930s, Dylan addressed race and war in the 1960s, and Springsteen explored sexism, racism, and homophobia in the 1980s and 1990s. But as Garman points out, even the Boss, like his forebears, tends to represent solidarity in terms of white male bonding and homosocial allegiance. We can hear America singing in the voices of these artists, Garman says, but it is still the song of a white male America.

The Global Restructuring of the Steel Industry Anthony D'Costa, 1999-01-28 Drawing upon case studies of the steel industry in the US, Japan, South Korea, Brazil, and India, this book explains how and why the steel industry has shifted from advanced capitalist countries to late industrializing countries. Anthony P. D. Costa examines the relationship between industrial change and institutional responses to technological diffusion.

Empty Mills Timothy J. Minchin, 2012-12-16 With the economy struggling, there has been much discussion about the effects of deindustrialization on American manufacturing. While the steel and auto industries have taken up most of the spotlight, the textile and apparel industries have been profoundly affected. In *Empty Mills*, Timothy Minchin provides the first book-length study of how both industries have suffered since WWII and the unwavering efforts of industry supporters to prevent that decline. In 1985, the textile industry accounted for one in eight manufacturing jobs, and unlike the steel and auto industries, more than fifty percent of the workforce was women or minorities. In the last four decades, over two million jobs have been lost in the textile and apparel industries alone, as more and more of the manufacturing moves overseas. Impeccably well researched, providing information on both the history and current trends, *Empty Mills* will be of importance to anyone interested in economics, labor, the social historical, as well as the economic significance of the decline of one of America's biggest industries.

Moral Rights in the Workplace Gertrude Ezorsky, 1987-01-01 This book focuses on the moral problems that arise for people who labor in ordinary places: factories, schools, mines, stores, and farms. *Moral Rights in the Workplace* examines problems of freedom and coercion that develop on the job, issues of the right to meaningful work, occupational health and safety, whistleblowing, the right to union organization, unemployment, and the flight of factories, the rights of health care workers, and workers' self-management. Issues of employment discrimination, such as comparable worth, seniority, affirmative action, and worksharing, that have been given scant attention in other books are also discussed.

The Fight Against Shutdowns Staughton Lynd, 1982

Farm and Factory Daniel Nelson, 1995-12-22 *Farm and Factory* illuminates the importance of the Midwest in U.S. labor history. America's heartland, often overlooked in studies focusing on other regions or particular cities or industries, has a distinctive labor history characterized by the sustained simultaneous growth of both agriculture and industry. Since the transfer of labor from farm to factory did not occur in the Midwest until after World War II, industrialists recruited workers elsewhere, especially from Europe and the American South. The region's

relatively underdeveloped service sector shaped by the presumption that goods were more desirable than service ultimately led to agonizing problems of adjustment as agriculture and industry evolved in the late twentieth century

Industrial Sunset Steven High, 2003-12-15 Plant shutdowns in Canada and the United States from 1969 to 1984 led to an ongoing and ravaging industrial decline of the Great Lakes Region Industrial Sunset offers a comparative regional analysis of the economic and cultural devastation caused by the shutdowns and provides an insightful examination of how mill and factory workers on both sides of the border made sense of their own displacement The history of deindustrialization rendered in cultural terms reveals the importance of community and national identifications in how North Americans responded to the problem Based on the plant shutdown stories told by over 130 industrial workers and drawing on extensive archival and published sources and songs and poetry from the time period covered Steve High explores the central issues in the history and contemporary politics of plant closings In so doing this study poses new questions about group identification and solidarity in the face of often dramatic industrial transformation

The Disposable American Louis Uchitelle, 2007-04-10 A timely eye opening account from an award winning reporter that reveals how layoffs in America are counterproductive and what companies can do to avoid them and help create jobs benefiting workers corporations and the nation as a whole Effectively wrecks the claim that all this downsizing makes the country more productive more competitive more flexible A strong case that the whole middle class is at risk The New York Times Layoffs have become a fact of life in today s economy initiated in the mid 1970s they are now widely expected and even accepted It doesn t have to be that way In *The Disposable American* Louis Uchitelle offers an eye opening account of layoffs in America how they started their questionable necessity and their devastating psychological impact on individuals at all income levels Through portraits of both executives and workers at companies such as Stanley Works United Airlines and Citigroup Uchitelle shows how layoffs are in fact counterproductive rarely promoting efficiency or profitability in the long term Recognizing that a global competitive economy makes tightening necessary Uchitelle offers specific recommendations for government policies that would encourage companies to avoid layoffs and help create jobs
