

Apparent dispersal routes of the earliest anatomically and behaviorally modern populations across Europe, as reflected in the archeological data

The northern (Danubian) route is represented by the "classic" Aurignacian (Upper Palaeolithic) technologies, while the southern (Mediterranean) route is represented by different but still Upper Palaeolithic bladelet technologies with their inferred origins in the preceding early Upper Paleolithic technologies in the Near East and southeastern Europe.

Dates indicate the earliest radiocarbon dates for these technologies in different areas, expressed in thousands of radiocarbon years BP. (Note that these are likely to underestimate the true (calendrical) ages of the sites by between 2,000 and 4,000 years.)

Sugar,2024-10-28 The multi national region of Europe situated between the German speaking lands and those of the former Soviet Union has witnessed many varied manifestations of nationalism over the last two centuries Professor Sugar has been in the forefront of those seeking to understand and explain these Eastern European nationalisms and eleven of his essays on the subject are included in this second selection of his studies The first two essays deal with problems of ethnicity and its specific manifestations in the region the next three present the growth of national antagonisms during the 19th century The third and longest section then sets out to examine the interaction of fully developed nationalism in Eastern Europe with the various political movements and religious organizations that impacted upon these lands Beyond Balkanism Diana Mishkova,2018-07-17 In recent years western discourse about the Balkans or balkanism has risen in prominence Characteristically this strand of research sidelines the

academic input in the production of western representations and Balkan self understanding Looking at the Balkans from the vantage point of balkanism has therefore contributed to its further marginalization as an object of research and the evisceration of its agency This book reverses the perspective and looks at the Balkans primarily inside out from within the Balkans towards its self and the outside world where the west is important but not the sole referent The book unravels attempts at regional identity building and construction of regional discourses across various generations and academic subcultures with the aim of reconstructing the conceptualizations of the Balkans that have emerged from academically embedded discursive practices and political usages It thus seeks to reinstate the subjectivity of the Balkans and the responsibility of the Balkan intellectual elites for the concept and the images it conveys The book then looks beyond the Balkans inviting us to rethink the relationship between national and transnational self representation and the communication between local and exogenous Western Central and Eastern European concepts and definitions more generally It thus contributes to the ongoing debates related to the creation of space and historical regions which feed into rethinking the premises of the new area studies Beyond Balkanism The Scholarly Politics of Region Making will interest researchers and students of transnationalism politics historical geography border and area studies

The Balkans and the West Andrew Hammond, 2017-03-02 This collection of essays locates investigates and challenges the manner in which the Balkans and the West have constructed each other since 1945 Scholars from the two sections of the

continent explore a wide range of fiction film journalism travel writing and diplomatic records both to analyse Western European balkanism and to study Balkan representations of the West over the last fifty years The first section looks back to the Cold War examining the divergent often favourable images of the Balkans that existed in Western culture as well as the variety of responses that appeared in South East European writings on the West The second section analyses the transitions that took place in representation during the 1990s Here contributors explore both the harsh denigration of the Balkans which came to dominate western discourse after the initial euphoria of 1989 and the emerging tradition of contesting Western balkanism in South East European cultural production Through this dual emphasis the volume exposes the representational practices that help to maintain a deeply divided Europe and challenges the economic and political injustices that result Despite the rise to prominence of postcolonial theory with its awareness of global inequality the current crises in many parts of South East Europe have received scant attention in literary and cultural studies The Balkans and the West addresses this deficiency Ranging in focus from Serbian cinema to Romanian travel literature from Western economic writings to Yugoslav fiction and from public discourse in Albania to NATO's vast propaganda machine the essays offer wide insight into representation and power in the contemporary European context

The Balkans D. Hupchick, 2002-01-11 The tragedies of Bosnia and Kosovo are often explained away as the unchangeable legacy of centuries old hatreds In this richly detailed expertly balanced chronicle of the Balkans across fifteen centuries Hupchick sets a complicated record straight Organized around the three great civilizations of the region Western European Orthodox Christian and Muslim this is a much needed guide to the political social cultural and religious threads of Balkan history with a clear convincing account of the reasons for nationalist violence and terror

Entangled Histories of the Balkans - Volume Four Roumen Dontchev Daskalov, Diana Mishkova, Tchavdar Marinov, Alexander Vezhenkov, 2017-02-06 The present volume is the last in the Entangled Balkans series and marks the end of several years of research guided by the transnational entangled history and *histoire croisée* approaches The essays in this volume address theoretical and methodological issues of Balkan or Southeast European regional studies not only questions of scholarly concepts definitions and approaches but also the extra scholarly ideological political and geopolitical motivations that underpin them These issues are treated more systematically and by a presentation of their historical evolution in various national traditions and schools Some of the essays deal with the articulation of certain forms of Balkan heritage in relation to the geographical spread and especially the cultural definition of the Balkan area Concepts and definitions of the Balkans are thus complemented by self representations that reflect on their cultural foundations

Sub-State Nationalism Helen Catt, Michael Murphy, 2003-09-02 This book provides a much needed categorization and genuinely comparative analysis of the political voice gained by sub state national groups in multinational democratic communities

The Politics of Nation-Building Harris Mylonas, 2013-02-18 What drives a state's choice to assimilate accommodate or exclude ethnic groups within its territory In this innovative work on the international politics of nation

building Harris Mylonas argues that a state's nation building policies toward non core groups individuals perceived as an ethnic group by the ruling elite of a state are influenced by both its foreign policy goals and its relations with the external patrons of these groups Through a detailed study of the Balkans Mylonas shows that how a state treats a non core group within its own borders is determined largely by whether the state's foreign policy is revisionist or cleaves to the international status quo and whether it is allied or in rivalry with that group's external patrons Mylonas injects international politics into the study of nation building building a bridge between international relations and the comparative politics of ethnicity and nationalism

Balkan Ghosts Robert D. Kaplan, 2014-04-01 A new edition of the classic travelogue exploring the Balkan Peninsula's political social religious and economic past From the assassination that triggered World War I to the ethnic warfare in Serbia Bosnia and Croatia the Balkans have been the crucible of the twentieth century the place where terrorism and genocide first became tools of policy Chosen as one of the Best Books of the Year by the New York Times and greeted with critical acclaim as the most insightful and timely work on the Balkans to date Boston Globe Kaplan's prescient enthralling and often chilling political travelogue is already a modern classic This new edition of *Balkan Ghosts* includes six opinion pieces written by Robert Kaplan about the Balkans between 1996 and 2000 beginning just after the implementation of the Dayton Peace Accords and ending after the conclusion of the Kosovo war with the removal of Slobodan Milosevic from power Praise for *Balkan Ghosts* The product of over a decade of travel and research this is one of precious few works that allows a Western reader a look into the tortured soul of the Balkan peoples A superior narrative Kaplan is a master of this genre Library Journal A memorable portrait of an increasingly important region Kirkus Review [East Central Europe](#)

Lawrence D. Orton, 1989 **The Routledge History Handbook of Central and Eastern Europe in the Twentieth Century** Jochen Böhrer, Włodzimierz Borodziej, Joachim von Puttkamer, 2022-02-15 Violence analyzes both the violence exerted on the societies of Central and Eastern Europe during the twentieth century by belligerent powers and authoritarian and or totalitarian regimes and armed conflicts between ethnic social and national groups as well as the interaction between these two phenomena Throughout the twentieth century Central and Eastern Europe was hit particularly hard by war violence and repression with armed conflicts in the Balkans at the start and end of the period and two world wars in between In the shadow of these full scale wars ethnic social and national conflicts were intensified found new forms and were violently played out The interwar period witnessed the emergence of authoritarian states who enforced their claim to power through continued violence against political opponents stigmatized ethnic national and social groups and were themselves fought with subversive or terrorist techniques This volume focuses specifically on physical violence war and civil war ethnic cleansing systematic starvation policies deportations and expulsions forced labour and prison camps persecution by state security such as intensive surveillance which had an enormous impact on the lives of those it affected and other forms of government oppression and militant resistance Geographically it considers the western regions of Belarus and Ukraine as

sites of extreme violence that had a noticeable impact on neighbouring Central and Eastern European countries as well The concluding volume in a four volume set on Central and Eastern Europe in the twentieth century it is the go to resource for those interested in violence in this complex region **Austria in World War II** Robert H. Keyserlingk,1990 Not only does Keyserlingk show that Great Britain and the US recognized the Anschluss both in fact and in law throughout the war he also reveals the growing importance of propaganda as a tool of government *Historians as Nation Builders* Dennis Deletant,Harry Hanak,1988-06-18 A selection of papers from a conference held in honour of Professor Hugh Seton Watson on the occasion of his retirement in 1983 The aim of the contributors is to illustrate the role of the historian in the political life of Central and East European nations *Austria* Denys Salt,Arthur Farrand Radley,1986 *Forging a Multinational State* John Deak,2015-09-23 The Habsburg Monarchy ruled over approximately one third of Europe for almost 150 years Previous books on the Habsburg Empire emphasize its slow decline in the face of the growth of neighboring nation states John Deak instead argues that the state was not in eternal decline but actively sought not only to adapt but also to modernize and build Deak has spent years mastering the structure and practices of the Austrian public administration and has immersed himself in the minutiae of its codes reforms political maneuverings and culture He demonstrates how an early modern empire made up of disparate lands connected solely by the feudal ties of a ruling family was transformed into a relatively unitary modern semi centralized bureaucratic continental empire This process was only derailed by the state of emergency that accompanied the First World War Consequently Deak provides the reader with a new appreciation for the evolving architecture of one of Europe s Great Powers in the long nineteenth century **Southeastern Europe** ,1980
