**Cities for People** Jan Gehl, 2013-03-05 For more than forty years Jan Gehl has helped to transform urban environments around the world based on his research into the ways people actually use or could use the spaces where they live and work In this revolutionary book Gehl presents his latest work creating or recreating cityscapes on a human scale He clearly explains the methods and tools he uses to reconfigure unworkable cityscapes into the landscapes he believes they should be cities for people Taking into account changing demographics and changing lifestyles Gehl emphasizes four human issues that he sees as essential to successful city planning He explains how to develop cities that are Lively Safe Sustainable and Healthy Focusing on these issues leads Gehl to think of even the largest city on a very small scale For Gehl the urban landscape must be considered through the five human senses and experienced at the speed of walking rather than at the speed of riding in a car or bus or train This small scale view he argues is too frequently neglected in contemporary projects In a final chapter Gehl makes a plea for city planning on a human scale in the fast growing cities of developing countries A Toolbox presenting key principles overviews of methods and keyword lists concludes the book The book is extensively illustrated with over 700 photos and drawings of examples from Gehl's work around the globe

**Sidewalk City** Annette Miae Kim, 2015-05-27 For most the term public space conjures up images of large open areas community centers for meetings and social events the ancient Greek agora for political debates green parks for festivals and recreation In many of the world's major cities however public spaces like these are not a part of the everyday lives of the public Rather business and social lives have always been conducted along main roads and sidewalks With increasing urban growth and density primarily from migration and immigration rights to the sidewalk are being hotly contested among pedestrians street vendors property owners tourists and governments around the world With *Sidewalk City* Annette Miae Kim provides the first multidisciplinary case study of sidewalks in a distinctive geographical area She focuses on Ho Chi Minh City Vietnam a rapidly growing and evolving city that throughout its history her multicultural residents have built up alternative legitimacies and norms about how the sidewalk should be used Based on fieldwork over 15 years Kim developed methods of spatial ethnography to overcome habitual seeing and recorded both the spatial patterns and the social relations of how the city's vibrant sidewalk life is practiced In *Sidewalk City* she transforms this data into an imaginative array of maps progressing through a primer of critical cartography to unveil new insights about the importance and potential of this quotidian public space This richly illustrated and fascinating study of Ho Chi Minh City's sidewalks shows us that it is possible to have an aesthetic sidewalk life that is inclusive of multiple publics aspirations and livelihoods particularly those of migrant vendors

Domingo, 2016-03-29 Why did eighteenth century writers employ digression as a literary form of diversion and how did their readers come to enjoy linguistic and textual devices that self consciously disrupt the reading experience Darryl P Domingo answers these questions through an examination of the formative period in the commercialization of leisure in

England and the coincidental coming of age of literary self consciousness in works published between approximately 1690 and 1760 During this period commercial entertainers tested out new ways of gratifying a public increasingly eager for amusement while professional writers explored the rhetorical possibilities of intrusion obstruction and interruption through their characteristic use of devices like digression Such devices adopt similar forms and fulfil similar functions in literature as do diversions in culture they unbend the mind and reveal the complex reciprocity between commercialized leisure and commercial literature in the age of Swift Pope and Fielding
