Side-Effects of Anti-Inflammatory Drugs 3 K. D. Rainsford, G.P. Velo, 2012-12-06 The contents of this book represent papers which were presented at the Third International Meeting on Side Effects of Anti Inflammatory and Analgesic Drugs which was held under the auspices of the University of Verona Institute of Pharmacology in Verona on 8-11 May 1991. This meeting was held in conjunction with the 13th European Workshop on Inflammation and although publications from this part of the meeting are not published here they appear in *Agents and Actions*. We were fortunate in having a group of people interested in inflammation from varying backgrounds. The success of the third meeting followed previous meetings held in Cambridge and Verona respectively and continue a tradition which has now become well established. The meeting brought together physicians, scientists and those concerned with the production and use of anti-inflammatory drugs to a very stimulating conference to discuss basic issues affecting all aspects of side effects of anti-inflammatory and analgesic drugs as well as their detection and treatment. The meeting was held in the Auditorium of Glaxo Italy and we are very grateful to that company for use of their facilities as well as to the University of Verona Institute of Pharmacology for valuable secretarial and administrative help. The success of the conference would not have been possible without valuable financial assistance of the companies listed separately under Acknowledgements as well as to the organizers of the 13th European Workshop on Inflammation who collaborated with us.

Side-Effects of Anti-Inflammatory Drugs K. D. Rainsford, G.P. Velo, 2012-12-06 These two volumes contain the proceedings of a 3-day international meeting held at the University of Cambridge and Queens College Cambridge from 31st July to 2nd August 1985 on the Side Effects of Anti Inflammatory Analgesic Drugs. The first meeting was held in Verona, Italy, in 1982 and the organisers felt that with a number of recent developments including the withdrawal of a number of new anti-inflammatory drugs and concern being expressed in the lay and specialist medical press and other media about the safety of these drugs that it was appropriate to have a second such meeting. The meeting was attended by some 300 delegates and the discussion focussed most intently on the

recent issues e g the value of adverse drug reaction reporting of the non steroidal anti inflammatory NSAID drugs certain side effects associated with particular NSAID drugs the predictive value of animal models etc Organising a meeting de novo without outside help would not have been possible without the immensely valuable help given enthusiastically by people and financial assistance given most generously by those pharmaceutical companies listed below These financial contributions were given despite current economic difficulties and moves to restrict the proportion of profits towards educational activities

Adverse Reactions to Non-Steroidal Anti-Inflammatory Drugs: Clinical Pharmacoepidemiology M. Kurowski, 2013-11-21 Non steroidal anti inflammatory drugs NSAIDs are among the most frequently prescribed drugs in the Western world During the past decade a large number of new compounds were marketed some of which had to be withdrawn after a short while because of adverse drug reactions These experiences led to an understanding that a complete picture of the safety of these drugs can only be obtained after their introduction into the marketplace Different methods of post marketing surveillance PMS serve as important tools for monitoring the frequency of adverse reactions and for generating and corroborating hypotheses Experience with PMS has thus far been quite limited in Germany In 1987 a non profit organization Verein zur Langzeituntersuchung von Arzneimittelnwirkungen auf dem Gebiet der Rheumatologie e V VLAR was founded by interested physicians and pharmacologists to raise funds and perform investigations on the safety of NSAIDs The first project by the VLAR SPALA Safety Profile of Antirheumatics in Long Term Administration was sponsored by F Hoffmann La Roche AG Basel Switzerland In July 1990 when the project was successfully terminated almost 30 000 patients had been completely documented and their medical records entered into a computer for subsequent review by a select panel of experts with experience in monitoring adverse reactions to NSAIDs The comments criticisms and ideas of these experts were brought together at a symposium organized by the VLAR at the Klinikum Steglitz Berlin Germany on 12 October 1990

D. Rainsford,Michael Powanda,2012-12-06 The availability of analgesics and non steroidal anti inflammatory drugs NSAIDs sold over the counter OTC to the public without prescription has become an issue of major concern in recent years The problem has been highlighted in the UK USA and other countries because of the continuing high rates of cases of poisoning and the influence of switching from prescription only status for many NSAIDs to OTC sale brought about in a large part by governments and health maintenance organisations especially in the USA anxious to save on costs of these drugs Concern in

the UK about poisoning from paracetamol and the appreciable morbidity and mortality from aspirin was such that a major review was initiated in 1996 by the UK government's Medicines Control Agency MCA. Doubtless many other governments have also undertaken reviews of the safety issues concerning OTC analgesics and NSAIDs. In the UK the situation has culminated in the decision announced in August 1997 as this book was going to press that the number of tablets/capsules of the solid dosage forms of paracetamol and aspirin would be limited for sale. OTC. This decision was essentially based on the need to limit the unit quantity of these drugs so as to reduce the likelihood of poisoning with paracetamol and the development of gastrointestinal and other more serious side effects from aspirin. Time will tell whether these new regulations will influence the occurrence of these adverse events.
