Siebold and Japan A. Kouwenhoven,Matthi Forrer,2000 Philipp Franz von Siebold 1796 1866 played a major role in the development of Western scientific disciplines in Japan in particular medicine Equally important were his contributions to Western knowledge about Japan Siebold and Japan depicts the life of this impassioned man whose love for Japan and its people resulted in the creation of several definitive ethnographic zoological and botanical collections These are now part of the collections of the world renowned National Museum of Ethnology and the Naturalis National Museum of Natural History in Leiden The Netherlands **Philipp Franz von Siebold and His Era** A. Thiede,Y. Hiki,G. Keil,2013-04-17 The Dutch East Indian Company was founded about 400 years ago and in 1641 the artificial island of Dejima in the port of Nagasaki became its base This island represented the only bridge between Japan at that time in self isolation and the European countries the Netherlands in particular The physician and surgeon Philipp Franz von Siebold born in W rzburg in 1796 was appointed as factory doctor of the Dutch East Indian Company in Dejima and later on he made history as the scientific discoverer of Japan for the Western world His grandfather Karl Kaspar von Siebold was the first real university surgeon in W rzburg from 1796 until 1807 and was the prominent surgeon of Southern Germany In commemoration of Philipp Franz von Siebold his 200th birthday and the developments introduced by him were celebrated by various events in Nagasaki and W rzburg in 1996 The present volume casts spotlights on medicine and surgery during this time his achievements and his surroundings as well as on modern developments and the relationship between Europe and Japan **Renaming Plants and Nations in Japanese Colonial Korea** Jung Lee,2025-04-10 This book studies a striking example of intensely negotiated colonial scientific practice the case of botanical practice in Korea during the Japanese colonisation from 1910 to 1945 The shared aim of botanists who encountered one another in colonial Korea to practise modern Western botany is successfully revealed through analysis of their fieldwork and subsequent publications By exploring the variations in what that term should mean and the politically charged nature of the interactions between both imperial and colonial players it reveals how botanists of the region created to a form of scientific practice that was neither clearly Western nor particularly modern It shows how the botany that evolved in this context was a product of colonially resourced globally connected practice immersed in intertwined traditions rather than simply a copy of modern Western botany Utilizing extensive primary sources this book will be of interest to students and scholars of the history of science colonial Korean history and environmental history *History of Soybeans and Soyfoods in Japan, and in Japanese Cookbooks and Restaurants outside Japan (701 CE to 2014)* William Shurtleff,Akiko Aoyagi,2014-02-19 The world s most comprehensive well documented and well illustrated book on this subject with 445 photographs and illustrations Plus an extensive index *History of Soybeans and Soyfoods in Austria and the Austro-Hungarian Empire (1781-2020)* William Shurtleff, Akiko Aoyagi,2020-05-02 The world s most comprehensive well documented and well illustrated book on this subject With extensive subject and geographic index 166 photographs and

Lost Wolves of Japan Brett L. Walker, 2009-11-23 Many Japanese once revered the wolf as Oguchi no Magami or Large Mouthed Pure God but as Japan began its modern transformation wolves lost their otherworldly status and became noxious animals that needed to be killed By 1905 they had disappeared from the country In this spirited and absorbing narrative Brett Walker takes a deep look at the scientific cultural and environmental dimensions of wolf extinction in Japan and tracks changing attitudes toward nature through Japan's long history Grain farmers once worshiped wolves at shrines and left food offerings near their dens beseeching the elusive canine to protect their crops from the sharp hooves and voracious appetites of wild boars and deer Talismans and charms adorned with images of wolves protected against fire disease and other calamities and brought fertility to agrarian communities and to couples hoping to have children The Ainu people believed that they were born from the union of a wolflike creature and a goddess In the eighteenth century wolves were seen as rabid man killers in many parts of Japan Highly ritualized wolf hunts were instigated to cleanse the landscape of what many considered as demons By the nineteenth century however the destruction of wolves had become decidedly unceremonious as seen on the island of Hokkaido Through poisoning hired hunters and a bounty system one of the archipelago's largest carnivores was systematically erased The story of wolf extinction exposes the underside of Japan's modernization Certain wolf scientists still camp out in Japan to listen for any trace of the elusive canines The quiet they experience reminds us of the profound silence that awaits all humanity when as the Japanese priest Kenko taught almost seven centuries ago we look on fellow sentient creatures without feeling compassion "Travel, Collecting, and Museums of Asian Art in Nineteenth-Century Paris" Ting Chang, 2017-07-05 Travel Collecting and Museums of Asian Art in Nineteenth Century Paris examines a history of contact between modern Europe and East Asia through three collectors Henri Cernuschi Emile Guimet and Edmond de Goncourt Drawing on a wealth of material including European travelogues of the East and Asian reports of the West Ting Chang explores the politics of mobility and cross cultural encounter in the nineteenth century This book takes a new approach to museum studies and institutional critique by highlighting what is missing from the existing scholarship the foreign labors social relations and somatic experiences of travel that are constitutive of museums yet left out of their histories The author explores how global trade and monetary theory shaped Cernuschi's collection of archaic Chinese bronze Exchange systems both material and immaterial determined Guimet's museum of religious objects and Goncourt's private collection of Asian art Bronze porcelain and prints articulated the shifting relations and frameworks of understanding between France Japan and China in a time of profound transformation Travel Collecting and Museums of Asian Art in Nineteenth Century Paris thus looks at what Asian art was imagined to do for Europe This book will be of interest to scholars and students interested in art history travel imagery museum studies cross cultural encounters and modern transnational histories **History of Soybeans and Soyfoods in Austria and Switzerland (1781-2015)** William Shurtleff; Akiko Aoyagi, 2015-07-05 The world's most comprehensive well documented and well illustrated book on this subject With extensive
