Conservation Fallout John Wills, 2012-08-15 An unprecedented look at nuclear politics in California Vehement widespread opposition accompanied the rise of the U S nuclear industry during the 1960s and 1970s In *Conservation Fallout* John Wills examines one of the most controversial atomic projects of the period Pacific Gas and Electric Company s decision to build its premier nuclear power plant at Diablo Canyon a relatively unsettled biologically rich and especially scenic part of the central California coastline Two competing visions of California emerged while the plant underwent construction Environmentalists used Diablo as a symbol of impending ecological doomsday while PG E envisioned it as the model that would usher in a new age of energy production The Sierra Club almost disbanded over whether to condone or protest the reactor project Divisions also emerged in the local community as residents and politicians enticed by the promise of cheap electricity and lucrative tax revenues found themselves pitted against others who feared the dangers of radiation in their own backyards The controversy intensified when a fault line was discovered within three miles of the plant Grassroots groups The Mothers for Peace a local women s group and The Abalone Alliance a statewide nonviolent direct action organization did their utmost to stop the plant from going on line In 1979 an Alliance rally in San Francisco attracted

25 000 people while 40 000 others gathered in San Luis Obispo During a two week long blockade of the Diablo plant in 1981 over 1 900 activists were jailed the largest arrest in the history of American antinuclear protest Despite its significance in the history of twentieth century environmental issues and the continuing debate over the safety of nuclear power the full story of Diablo Canyon has not been told until now Wills bases his account on extensive interviews with the individuals involved as well as on the archives of the Sierra Club several protest organizations public agencies PG E and others The result is an engaging balanced examination of nuclear politics in California By focusing on one of the last wild places in the state and its transformation into a major technological center and on the evolution and strategies of the little studied grassroots protest groups determined to protect California and resist the spread of nuclear technology Wills has made a major contribution to our understanding of America s nuclear age *Conservation and Environmentalism* Robert C. Paehlke,2013-04-03 Focusing on both problems and solutions this authoritative reference work maintains a healthy balance between science and the social sciences in its coverage of all aspects of the environment The book is arranged alphabetically and is divided into three major sections Ecology Pollution and Sustainability The list of 240 contributors reads like a who s who of the world s leading conservation and environmental professionals Best Reference Source Outstanding Reference Source *Dead Pool* James Lawrence Powell,2023-11-15 Where will the water come from to sustain the great desert cities of Las Vegas Los Angeles and Phoenix In a provocative exploration of the past present and future of water in the West James Lawrence Powell begins at Lake Powell the vast reservoir that has become an emblem of this story At present Lake Powell is less than half full Bathtub rings ten stories tall encircle its blue water boat ramps and marinas lie stranded and useless To refill it would require surplus water but there is no surplus burgeoning populations and thirsty crops consume every drop of the Colorado River Add to this picture the looming effects of global warming and drought and the scenario becomes bleaker still *Dead Pool* featuring rarely seen historical photographs explains why America built the dam that made Lake Powell and others like it and then allowed its citizens to become dependent on their benefits which were always temporary Writing for a wide audience Powell shows us exactly why an urgent threat during the first half of the twenty first century will come not from the rising of the seas but from the falling of the reservoirs Where will the water come from to sustain the great desert cities of Las Vegas Los Angeles and Phoenix In a provocative exploration of the past present and future of water in the West James Lawrence Powell begins at Lake Powell the vast reservoir t *Lost in the Swamps of Time* Pasquale De Marco,2025-05-05 *Lost in the Swamps of Time* takes readers on a captivating journey through Florida s rich history diverse landscapes and fascinating people From the earliest Native American tribes to the Spanish explorers and American settlers Florida s unique allure has drawn people from far and wide This book explores the state s humble beginnings its challenges and its triumphs shedding light on the characters and events that shaped Florida s destiny Readers will meet the intrepid pioneers who carved out a life in the wilderness the visionaries who transformed the state into a global tourist destination and the everyday people who have
