Sierra Pinacate:

The Sierra Pinacate Julian D. Hayden, 2023-01-10 South of the border a spectacular range of ancient volcanoes rises from the desert floor just a few miles from the Sea of Cortez Virtually untraveled the Sierra Pinacate in northwestern Mexico beckons adventurers and scientists Here in words and pictures is a remarkable introduction to this place of almost surreal beauty Sometimes veiled in clouds or dust storms the Pinacate have long been shrouded in mystery as well From prehistoric times until today people of Sonora have told tales of giants men and animals bottomless pits endless tunnels hostile Indians smoking caverns and ever present dangers found in the Pinacate This book takes readers deep into the heart of this fascinating area Julian Hayden who worked and traveled in the Pinacate for four decades introduces the natural history archaeology geology and human history of the area Spectacular color photographs by Jack Dykinga capture the magic and the isolation of this stunning region Hayden s text is presented in both English and Spanish The Mexican government has already declared the Pinacate an officially protected biosphere reserve still pending is its inclusion in the Man and the Biosphere program of the United Nations More than a natural history *The Sierra Pinacate* is an elegant appreciation of a place of wonder **Geology of the Sierra Del Pinacate Volcanic Field** Michael Francis Donnelly, 1974 *Field Man*

Julian D. Hayden, 2016-10-01 *Field Man* is the captivating memoir of renowned southwestern archaeologist Julian Dodge Hayden a man who held no professional degree or faculty position but who camped and argued with a who s who of the discipline including Emil Haury Malcolm Rogers Paul Ezell and Norman Tindale This is the personal story of a blue collar scholar who bucked the conventional thinking on the antiquity of man in the New World who brought a formidable pragmatism and hand sense to the identification of stone tools and who is remembered as the leading authority on the prehistory of the Sierra Pinacate in northwestern Mexico But *Field Man* is also an evocative recollection of a bygone time and place a time when archaeological trips to the Southwest were expeditions when a man might run a Civilian Conservation Corps crew by day and study the artifacts of ancient peoples by night when one could honeymoon by a still full Gila River and when a Model T pickup needed extra transmissions to tackle the back roads of Arizona To say that Julian Hayden led an eventful life would be an understatement He accompanied his father a Harvard trained archaeologist on influential excavations became a crew chief in his own right taught himself silversmithing married a city girl helped build the Yuma Air Field worked as a civilian safety officer and was a friend and mentor to countless students He also crossed paths with leading figures in other fields Barry Goldwater and even Frank Lloyd Wright turn up in this wide ranging narrative of a desert rat who was at once a throwback and as he only half jokingly suggests ahead of his time *Field Man* is the product of years of interviews with Hayden conducted by his colleagues and friends Bill Broyles and Diane Boyer It is introduced by noted southwestern anthropologist J Jefferson Reid and contains an epilogue by Steve Hayden one of Julian s sons *The Late Archaic across the Borderlands* Bradley J. Vierra, 2010-01-01 Why and when human societies shifted from nomadic hunting

and gathering to settled agriculture engages the interest of scholars around the world One of the most fruitful areas in which to study this issue is the North American Southwest where Late Archaic inhabitants of the Sonoran and Chihuahuan Deserts of Mexico Arizona and New Mexico turned to farming while their counterparts in Trans Pecos and South Texas continued to forage By investigating the environmental biological and cultural factors that led to these differing patterns of development we can identify some of the necessary conditions for the rise of agriculture and the corresponding evolution of village life The twelve papers in this volume synthesize previous and ongoing research and offer new theoretical models to provide the most up to date picture of life during the Late Archaic from 3 000 to 1 500 years ago across the entire North American Borderlands Some of the papers focus on specific research topics such as stone tool technology and mobility patterns Others study the development of agriculture across whole regions within the Borderlands The two concluding papers trace pan regional patterns in the adoption of farming and also link them to the growth of agriculture in other parts of the world
