The Last Door Gladys I. McCormick, 2025-05-06 As guerrilla groups sprouted up across Mexico in the early 1970s the military and police routinely resorted to extreme acts of violence including the systematic use of torture In *The Last Door* Gladys McCormick provides the most thorough account of how torture became a crucial and routine practice of the Mexican government's war against subversives Drawing from extensive oral history interviews and declassified government documents McCormick describes experiences of arrest torture and detention in which forced disappearances became all too common and advocates for justice rallied around political prisoners Torture was not always about extracting information it was also about inflicting punishment on a faceless so called enemy and instilling terror into advocates of social change As McCormick argues torture became a quotidian practice of state making in Mexico during the 1970s leaving individuals and their families forever changed The lack of repercussions for government officials notorious for employing torture even in spite of a growing movement for truth and justice has led to entrenched impunity that is endemic in Mexico as its contemporary security crisis continues *Constructing Identity in Contemporary Architecture* Peter Herrle, Stephanus Schmitz, 2009 The global spread of uniform modes of production and cultural values has been accompanied by a dissemination of stereotypes of modern architecture styles almost everywhere around the globe Paradoxically the reverse process has also emerged In some countries the elites feel the necessity to counterbalance the loss of identity and defend their own cultures against the intruding forces of globalization What started as a defensive notion has developed into a more progressive attempt to re create what has allegedly been lost This trend is being strongly expressed in discourses about architecture in countries of the South Who are the actors feeling compelled to construct new identities How are these new identities in architecture created in various parts of the world And which are the ingredients borrowed from various historical and ethnic traditions and other sources These and other questions are discussed in five case studies from different parts of the world written by renowned scholars from Brazil Mexico Egypt India and Singapore **Bibliografía peruana**, 1995 Regenerating Cultural Religious Heritage Olimpia Niglio, 2022-09-03 This book introduces important reflections on understanding the meaning of cultural religious heritage in an international context and their relationship with issues of sustainability at the local community level Through a holistic approach the book charts new courses in analyzing different cultural policies and methods for preserving and enhancing cultural heritage Stemming from an intercultural seminar promoted by the International Scientific Committee Places of Religion and Ritual ICOMOS PRERICO under the theme of Reuse and regenerations of cultural religious heritage in the world Comparison among cultures the book examines the scientific diplomacy and cultural strategies promoted by countries in dialogue with the UN 2030 Agenda as well as Agenda 21 for Culture The book seeks to reinforce the value of local cultural policies for supporting and enhancing cultural religious

heritage through specific programs and collaborations in dialogue with government policies This collection is relevant to scholars working in areas relating to cultural heritage religious heritage architectural restoration protection of the local inheritances law and management of the cultural sites **Hispania** ,1927 **Learn Spanish News Vol.2:** Nik Marcel, LEARN SPANISH NEWS Vol 2 English Spanish THIS EDITION The dual language text has been arranged into sentences and shorter paragraphs for quick and easy cross referencing The source text is the Spanish language edition of Voice of America VOA The Spanish text has been translated into English for this dual language project The reader can choose between four formats Section 1 English to Spanish Section 2 Spanish to English Section 3 English Section 4 Spanish A methodology for getting the most out of this bilingual format is explained in the book s Foreword The primary purpose of this text is to equip a foreign language learner with the ability to start reading news in the particular foreign language to be able to read only in the foreign language and extract enough understanding to continue the language learning process fruitfully this way A reader might like to go back to reading dual language news for reinforcement and further development returning to foreign language only news with a deeper understanding By going back to the same old news you are going over words word patterns and passages with which you already have a certain familiarity The process of reinforcement learning or retaining of what is new and exposure to what is unfamiliar is much easier this way even though the news may seem a little dated The aim of informing the reader about actual news is secondary especially given that the content will become less current and less relevant over time If you are having trouble with the level of difficulty in the text a suggested path for learning languages is as follows Familiarise yourself with a basic language instruction book or re read the one you have Once a student has studied the basics a suitable book about basic grammar can be helpful The suggestion is that any grammar book be studied more with the intent of recognition and understanding rather than memorising and obsessive rote learning Go through as much of the grammar book you feel you can digest maybe even the whole book skipping over what is not easily understood After this read through a portion of text in a book called Spanish Sentences by 2LanguageBooks looking for examples of what you have picked up or gleaned in your hopefully not so arduous study of grammar Even repeatedly seeing a word that you remember seeing listed as a subject pronoun or a third person plural verb of some sort is a great help Then depending on your inclination return to the grammar book or your basic Spanish book or move on to lengthier bilingual text like in 2Language Books texts containing news or stories for example or find some suitable Spanish text a simple novel a Spanish news website etc Grammar books will likely have some verb charts However there are currently good on line resources that go further dictionaries with a verb conjugation search option Many basic language books offer some form of audio support Internet services primarily news based radio stations offer podcasts Audio from television is an additional resource and can be formatted for use on various digital platforms However if audio is an important component of your interest in languages electronic devices that support quality text to speech TTS will likely be appealing With a library card TTS technology in a

device that supports the relevant content and the above mentioned resources an entire language learning system is available for not much more than a cup of coffee There is no substantial financial outlay to get you started Furthermore there are no additional ongoing fees and updates and there are no expiry dates on premium content and resources A Dual Language Book Project 2Language Books *TÚ ERES PEDRO* Mario Madrid-Malo Garizábal,2005 *Selecciones de Matemáticas Aplicadas* Max H. Economic Elites, Political Parties and the Electoral Arena Felipe Monestier,2023-12-14 This book delves into the intricate dynamics between economic elites and the political party system in Argentina Chile and Uruguay particularly during their democratization phases in the twentieth century It introduces a novel framework for comprehending the diverse political strategies adopted by these countries economic elites during this critical period The central premise of this book is that the interplay between the cohesion of economic elites and the mobilization of popular sectors at specific historical junctures profoundly influences the nature of elite political involvement While existing literature has extensively discussed the strategies employed by economic elites to safeguard their interests this book takes a fresh approach by considering three primary configurations of relationships between economic elites and political parties It explores cases where economic elites are the primary constituency of parties they have founded as well as instances where upper class interests are predominantly defended outside the party system through mechanisms such as the armed forces pressure groups and lobbying Additionally it examines scenarios where economic elites align themselves with parties boasting a polyclass constituency exerting limited influence over these parties This book goes beyond traditional analyses by proposing a theory that elucidates how the interaction between elite cohesion and popular sector mobilization determines the

specific forms of elite political involvement It also charts the historical sequences of this process emphasizing the evolution of the causal relationship over time To illustrate this theory the book employs a comparative historical analysis scrutinizing the three aforementioned cases to identify factors that account for the different forms of economic elite political participation It discerns that the level of cohesion among economic elites and the degree of mobilization among popular sectors are pivotal factors shaping elite party relationships
