Hut Pavilion Shrine: Architectural Archetypes in Mid-Century Modernism Miles David Samson, 2016-03-09 The phase of American architectural history we call mid century modernism 1940 1980 saw the spread of Modern Movement tenets of functionalism social service and anonymity into mainstream

practice It also saw the spread of their seeming opposites Temples arcades domes and other traditional types occur in both modernist and traditionalist forms from the 1950s to the 1970s Hut Pavilion Shrine examines this crossroads of modernism and the archetypal and critiques its buildings and theory The book centers on one particularly important and omnipresent type the pavilion a type which was the basis of major work by Louis I Kahn Paul Rudolph Philip Johnson Minoru Yamasaki and other eminent architects While focusing primarily on the architecture culture of the United States it also includes the work of British European Team X and Scandinavian designers and writers Making connections between formal analysis historical context and theory the book continues lines of inquiry which have been pursued by Neil Levine and Anthony Vidler on representation and by Sarah Goldhagen and Alice Friedman on modernism s forbidden elements of the honorific and the visually pleasurable It highlights the significance of pavilionizing mid century designers such as Victor Lundy John Johansen Eero Saarinen and Edward Durell Stone and shows how frequently essentialist and traditionalist types appeared in the roadside vernacular of drive in restaurants gas stations furniture and car showrooms branch banks and motels The book ties together the threads in mid century architectural theory that addressed aspects of type essential structure and primal humanistic aspects of environment making and discusses how these concerns outlived the mid century moment and in the designs and writings of Aldo Rossi and others they paved the way for Post Modernism

Post-Western Histories of Architecture Pilar Maria Guerrieri, Marco Biraghi, 2023-06-23 This book seeks to provide an alternative post Western perspective to the history of contemporary architecture It puts forward detailed critical analyses of various areas of the world including Europe Latin America Africa China Australia India and Japan where particular movements of architecture have developed as active political acts The authors focus on a broad spectrum of countries architectures and architects that have developed a design approach closely linked to the building context The concept of context is broad and includes various economic social cultural political and natural aspects In all cases the architects selected in this book have chosen to view context as an opportunity However each architect has considered certain specific aspects of context some have been very attentive to the social context others to material aspects or typological issues and still others to aspects related to political visions or economic factors The analysis critically highlights interesting creative and respectful design approaches towards local conditions such as sustainability in Nordic Europe climate conscious design in Africa and the bottom up sensitivity of India The book s main aim is to retrace through both theoretical arguments and case studies the debate that focuses on politics and the environment Thanks to its valuable examples this book strives to make a conscious contribution to establishing a bulwark against the current flattening out processes that architecture is experiencing This book will be of relevance to researchers teachers and students interested in the history of architecture architecture and planning and postcolonial studies

Architecture as the Ethics of Climate Jin Baek, 2016-06-10 At a time when climate and ethics have become so important to architectural debate this book proposes an entirely new way for architects to engage with these core

issues Drawing on Tetsuro Watsuji's 1889-1960 philosophy the book illuminates climate not as a collection of objective natural phenomena but as a concrete form of bond in which who we are the subjective human experience is indivisibly intertwined with the natural phenomena The book further elucidates the inter personal nature of climatic experiences criticizing a view that sees atmospheric effects of climate under the guise of personal experientialism and reinforcing the linkage between climate and ethos as the appropriateness of a setting for human affairs This ethical premise of climate stretches the horizon of sustainability as pertaining not only to man's solitary relationship with natural phenomena a predominant trend in contemporary discourse of sustainability but also to man's relationship with man Overcoming climatic determinism regional determinism too and expanding the ethics of the inter personal to the level where the whole and particulars are joined through the dialectics of the mutually negating opposites Jin Baek develops a new thesis engaging with the very urgent issues inherent in sustainable architecture Crucially the book explores examples that join climate and the dynamics of the inter personal including Japanese vernacular residential architecture the white residential architecture of Richard Neutra contemporary architectural works and urban artifacts by Tadao Ando and Aldo Rossi Beautifully illustrated this book is an important contribution to the discourse which surrounds architecture climate and ethics and encourages the reader to think more broadly about how to respond to the current challenges facing the profession *Building Institution* Kim Förster, 2024-02-21 Building Institution chronicles the expansion of architecture as a profession and discipline in the postmodern era Kim Förster traces the compelling history of the Institute for Architecture and Urban Studies which was active in New York from 1967 to 1985 Drawing on extensive archival research and oral histories he constructs a collective biography that details the Institute's diverse roles and the dynamic interplay between research and design education culture and publishing By exploring the transformation of cultural production into a practice as well as the culturalization and global postmodernization of architecture the volume contributes significantly to the institutional history of architecture **Catalog of Copyright Entries** Library of Congress. Sandaker, 2007-09-12 In this richly illustrated book with many practical examples Bjorn Sandaker provides readers with a better understanding of the relationship between technology and architecture As an experienced teacher and writer Sandaker offers a well founded aesthetic theory to support the understanding and evaluation of a structure's form and design examining concepts and viewpoints from both the professions of engineering and architecture Comprehensively covering structure and aesthetics this book is ideal for students professionals and academics in the areas of architecture and building Exploitation of Natural Resources in the 21st Century M. Design for the Crowd Joanna Merwood-Salisbury, 2019-10-03 Situated on Broadway between Fourteenth and Seventeenth Streets Union Square occupies a central place in both the geography and the history of New York City Though this compact space was originally designed in 1830 to beautify a residential neighborhood and boost property values by the early days of the Civil War New Yorkers had transformed Union Square into a gathering place for political debate and protest As public use of the square changed so too did its design When Frederick Law Olmsted and Calvert Vaux redesigned the park in the late nineteenth century they sought to enhance its potential as a space for the orderly expression of public sentiment A few decades later anarchists and Communist activists including Emma Goldman turned Union Square into a regular gathering place where they would advocate for radical change In response a series of city administrations and business groups sought to quash this unruly form of dissidence by remaking the square into a new kind of patriotic space As Joanna Merwood Salisbury shows us in *Design for the Crowd* the history of Union Square illustrates ongoing debates over the proper organization of urban space and competing images of the public that uses it In this sweeping history of an iconic urban square Merwood Salisbury gives us a review of American political activism philosophies of urban design and the many ways in which a seemingly stable landmark can change through public engagement and design Published with the support of Furthermore a program of the J M Kaplan Fund

A Topology of Everyday Constellations Georges Teyssot, 2013-02-22 The threshold as both boundary and bridge investigations of spaces public and private local and global Today spaces no longer represent a bourgeois haven nor are they the sites of a classical harmony between work and leisure private and public the local and the global The house is not merely a home but a position for negotiations with multiple spheres the technological as well as the physical and the psychological In *A Topology of Everyday Constellations* Georges Teyssot considers the intrusion of the public sphere into private space and the blurring of notions of interior privacy and intimacy in our societies He proposes that we rethink design in terms of a new definition of the practices of everyday life Teyssot considers the door the window the mirror and the screen as thresholds or interstitial spaces that divide the world in two the outside and the inside Thresholds he suggests work both as markers of boundaries and as bridges to the exterior The stark choice between boundary and bridge creates a middle space an in between that holds the possibility of exchanges and encounters If the threshold no longer separates public from private and if we can no longer think of the house as a bastion of privacy Teyssot asks does the body still inhabit the house or does the house evolving into a series of microdevices inhabit the body

The Architecture of Modern Italy Terry Kirk, 2005-06-02 Modern Italy

may sound like an oxymoron For Western civilization Italian culture represents the classical past and the continuity of canonical tradition while modernity is understood in contrary terms of rupture and rapid innovation Charting the evolution of a culture renowned for its historical past into the 10 modern era challenges our understanding of both the resilience of tradition and the elasticity of modernity We have a tendency when imagining Italy to look to a rather distant and definitely premodern setting The ancient forum medieval cloisters baroque piazzas and papal palaces constitute our ideal itinerary of Italian civilization The Campo of Siena Saint Peter s all of Venice and San Gimignano satisfy us with their seemingly unbroken panoramas onto historical moments untouched by time but elsewhere modern intrusions alter and obstruct the view to the landscapes of our expectations As seasonal tourist or seasoned historian we edit the encroachments time and change have wrought on our image of Italy The learning of history is always a complex task one that in the Italian environment is complicated by the changes wrought everywhere over the past 250 years Culture on the peninsula continues to evolve with characteristic vibrancy Italy is not a museum To think of it as such as a disorganized yet phenomenally rich museum unchanging in its exhibits is to misunderstand the nature of the Italian cultural condition and the writing of history itself
