constitution in both theory and application Building on the research and analysis of Vincent Ostrom who as one of America s leading scholars on constitutions has spent a lifetime writing about constitutions in America and overseas Each chapter shows how particular countries governments and organizations devise constitutions to reflect their visions of governance and sets of rules for their leaders On a higher theoretical level the contributors emphasize the importance of choosing the rules of the political game in order to determine the nature of the game itself Extending Ostrom s intellectual quest to solve constitutional dilemmas the scholars gathered here discuss a wide variety of issues ranging from the problems of water scarcity and local public economies in Africa to the prospect of a new political order in the European North Book jacket

Nexus ,2002 *Modern American Poetry and the Architectural Imagination* Jo Gill,2023 Modern American Poetry and the Architectural Imagination The Harmony of Forms assesses the relationship between architectural and poetic innovation in the United States across the twentieth century Taking the work of five key poets as case studies and drawing on the work of a rich range of other writers architects artists and commentators this study proposes that by examining the sustained and productive if hitherto overlooked engagement between the two disciplines we enrich our understanding of the complexity and interrelationship of both The book begins by tracing the rise of what was conceived of as modern and often international style architecture and by showing how poetry and architecture in the early decades of the century developed in dialogue and within a shared and often transnational context It then moves on to examine the material aesthetic and social conditions that helped shape both disciplines offering new readings of familiar poems and bringing other pertinent resources to light It considers the uses to which poets of the period put the insights of architecture and vice versa In closing Gill turns to modern and contemporary architects written accounts of their own practice in memoirs and other commentaries and examines how they have assimilated or resisted the practice and vision of poetry
