Unstable Images Brenda Johnson Clay, 2005-07-31 The subject of colonialism encompasses a multitude of analytic concerns about the nature and extent of political controls economic inequalities and social hierarchies Underlying the varied conditions of power and subordination are the diverse sometimes contested representations of human difference that motivate support or question colonial practices and projects *Unstable Images* concentrates a critical gaze on this discursive side of colonialism through close readings of a series of Western texts on the people of New Ireland from the 1870s to the 1930s when the status of the New Ireland New Britain region changed from precolonial to German control and finally to a League of Nations mandated Australian administration

Glaser Israeli ceramicist and immigrant Rachel Siblingstein artist Stanley Spencer and philosopher Friedrich Nietzsche he shows how we can have the capacity and inclination to formulate life projects It is in the pursuit of these life projects that is making our life our work that we can avoid the structures of ideology and institution *The Lihir Destiny* Nicholas A. Bainton,2010-10-01 The people of the Lihir Islands in Papua New Guinea have long held visions of a prosperous new future often referred to by local leaders as the Lihir Destiny When large scale gold mining activities commenced on the main island of Lihir in 1995 many hoped that this new world had finally arrived The Lihir Destiny provides a nuanced account of the social structural and cultural transformations engendered by large scale resource extraction Tracing the history of Lihirian engagement with outside forces from the colonial period through to recent mining activities this book brings new light to bear on the bigger question of what development means in contemporary Melanesia The Lihir Destiny explores how Lihirian leaders devised future plans for a cultural revolution based upon the maximisation of mining activities and the influential philosophies of the Personal Viability movement However reaching the Lihir Destiny is no simple affair and many Lihirians find themselves negotiating divergent formulations of culture sociality and economic engagement The Lihir Destiny will appeal to readers interested in the social impacts of large scale resource development the processes of cultural continuity and change and the ways in which modernity is configured in local terms **Biomedical Entanglements** Franziska A. Herbst,2016-10-01 Biomedical Entanglements is an ethnographic study of the Giri people of Papua New Guinea focusing on the indigenous population s interaction with modern medicine In her fieldwork Franziska A Herbst follows the Giri people as they circulate within and around ethnographic sites that include a rural health center and an urban hospital The study bridges medical anthropology and global health exploring how the biomedical is imbued with social meaning and how biomedicine affects Giri ways of life Ways of Baloma Mark S. Mosko,2017-11-15 Bronislaw Malinowski s path breaking research in the Trobriand Islands shaped much of modern anthropology s disciplinary paradigm Yet many conundrums remain For example Malinowski asserted that baloma spirits of the dead were responsible for procreation but had limited influence on their living descendants in magic and other matters claims largely unchallenged by subsequent field investigators until now Based on extended fieldwork at Omarakana village home of the Tabalu Paramount Chief Mark S Mosko argues instead that these and virtually all contexts of indigenous sociality are conceived as sacrificial reciprocities between the mirror worlds that baloma and humans inhabit Informed by a synthesis of Strathern s model of dividual personhood and L vy Bruhl s theory of participation Mosko upends a century of discussion and debate extending from Malinowski to anthropology s other leading thinkers His account of the intimate interdependencies of humans and spirits in the cosmic generation and coordination of life momova and death kaliga strikes at the nexus of anthropology s received wisdom and Ways of Baloma will inevitably lead practitioners and students to reflect anew on the discipline s multifold theories of personhood ritual agency and sociality Hoarding New Guinea Rainer F. Buschmann,2023-07 Hoarding New

Guinea provides a new cultural history of colonialism that pays close attention to the millions of Indigenous artifacts that serve as witnesses to Europe's colonial past in ethnographic museums Rainer F Buschmann investigates the roughly two hundred thousand artifacts extracted from the colony of German New Guinea from 1870 to 1920 Reversing the typical trajectories that place ethnographic museums at the center of the analysis he concludes that museum interests in material culture alone cannot account for the large quantities of extracted artifacts Buschmann moves beyond the easy definition of artifacts as trophies of colonial defeat or religious conversion instead employing the term hoarding to describe the irrational amassing of Indigenous artifacts by European colonial residents Buschmann also highlights Indigenous material culture as a bargaining chip for its producers to engage with the imposed colonial regime In addition by centering an area of collection rather than an institution he opens new areas of investigation that include non professional ethnographic collectors and a sustained rather than superficial consideration of Indigenous peoples as producers behind the material culture Hoarding New Guinea answers the call for a more significant historical focus on colonial ethnographic collections in European museums

Mundane Objects Pierre Lemonnier, 2016-06-16 This concise book shows the importance of objects that are considered ordinary by cultural outsiders and scholars yet lie at the heart of the systems of thought and practices of their makers and users This volume demonstrates the role of these objects in nonverbal communication both in non ritual and in ritual situations Lemonnier shows that some objects their physical properties and their material implementation are wordless expressions of fundamental aspects of a way of living and thinking as well as sometimes the only means of expressing the inexpressible Through the study of the most mundane technical activities such as fence building creating models cars or trapping fish we often gain a better understanding of what these objects mean and how they work within their cultures of origin In addition to anthropologists and archaeologists this book will also be of interest to sociologists historians philosophers cognitive anthropologists and primatologists for whom the intertwining of function and style is the very mark of all cultural behavior
